

VIRGINIA ACTS OF ASSEMBLY -- 2000 SESSION

CHAPTER 14

An Act to amend and reenact § 10.1-607 of the Code of Virginia, relating to obsolete federal dam inspection reports.

[H 876]

Approved March 1, 2000

Be it enacted by the General Assembly of Virginia:

1. That § 10.1-607 of the Code of Virginia is amended and reenacted as follows:

§ 10.1-607. Safety inspections.

No one shall maintain a dam which unreasonably threatens the life or property of another. The Board shall cause safety inspections; ~~not to exceed that of a phase I inspection report as established by the U.S. Army Corps of Engineers,~~ to be made of impounding structures on such schedule as it deems appropriate. The time of the initial inspection and the frequency of reinspection shall depend on such factors as the condition of the structure and its size, type, location and downstream hazard potential. The owners of dams found to have deficiencies which could threaten life or property if not corrected shall take the corrective actions; ~~which may include a phase II inspection report as established by the U.S. Army Corps of Engineers,~~ needed to remove such deficiencies within a reasonable time. All safety inspections shall be conducted by or under the supervision of a licensed professional engineer. Each report shall bear the seal and signature of the licensed professional engineer responsible for the inspection.

The Board shall be responsible for the inspection and reinspection of flood control dams where the maintenance and operation of the dam is the responsibility of a soil and water conservation district and where the permit for operation of the impounding structure is held by such a district.
