

003946696

HOUSE BILL NO. 1043

Offered January 24, 2000

A BILL to amend and reenact § 22.1-253.13:1 of the Code of Virginia, as it shall become effective, relating to remediation of students.

 Patron—Darner

 Consent to introduce

 Referred to Committee on Appropriations

Be it enacted by the General Assembly of Virginia:

1. That § 22.1-253.13:1 of the Code of Virginia, as it shall become effective, is amended and reenacted as follows:

§ 22.1-253.13:1. (Effective July 1, 2000 until July 1, 2003) Standard 1. Basic skills, selected programs, and instructional personnel.

A. The General Assembly and the Board of Education believe that the fundamental goal of the public schools of this Commonwealth must be to enable each student to develop the skills that are necessary for success in school and preparation for life, and find that the quality of education is dependent upon the provision of the appropriate working environment, benefits, and salaries necessary to ensure the availability of high quality instructional personnel and adequate commitment of other resources.

B. The Board of Education shall establish educational objectives to implement the development of the skills that are necessary for success in school and for preparation for life in the years beyond. The current educational objectives, known as the Standards of Learning, shall not be construed to be regulations as defined in § 9-6.14:4; however, the Board of Education may, from time to time, revise these educational objectives to maintain academic rigor. In order to provide appropriate opportunity for input from the general public, teachers, and local school boards, the Board of Education shall conduct public hearings prior to establishing new educational objectives. Thirty days prior to conducting such hearings, the Board shall give written notice by mail of the date, time, and place of the hearings to all local school boards and any other persons requesting to be notified of the hearings and publish notice of its intention to revise these educational objectives in the Virginia Register of Regulations. Interested parties shall be given reasonable opportunity to be heard and present information prior to final adoption of any revisions of these educational objectives.

The Board shall seek to ensure that any revised educational objectives are consistent with the world's highest educational standards. These objectives shall include, but not be limited to, basic skills of communication, computation and critical reasoning including problem solving and decision making and the skills to manage personal finances and to make sound financial decisions, and the development of personal qualities such as self-esteem, sociability, self-management, integrity, and honesty.

With such funds as are made available for this purpose, the Board shall regularly review and revise the competencies for vocational education programs to require the full integration of English, mathematics, science and social studies Standards of Learning. Occupational vocational programs shall be aligned with industry and professional standard certifications, where they exist.

The Standards of Learning in all subject areas shall be subject to regular review and revision to maintain rigor and to reflect a balance between content knowledge and the application of knowledge in preparation for eventual employment and lifelong learning.

School boards shall implement these objectives or objectives specifically designed for their school divisions that are equivalent to or exceed the Board's requirements. Students shall be expected to achieve the educational objectives utilized by the school division at appropriate age or grade levels.

With such funds as are available for this purpose, the Board of Education may prescribe assessment methods to determine the level of achievement of these objectives by all students. Such assessments shall evaluate knowledge, application of knowledge, critical thinking, and skills related to the Standards of Learning being assessed. The Board, with the assistance of independent testing experts, shall conduct a regular analysis and validation process for these assessments.

By July 1, 1999, the Board shall develop and approve objectives for mathematics, at the middle and high school levels, for personal living and finances, which shall focus on money management skills for individuals and families. The personal living and finances objectives shall require instruction in those skills necessary to handle personal business and finances and shall include, but need not be limited to, the following: opening a bank account and how to judge the quality of a bank's services; balancing a

INTRODUCED

HB1043

60 checkbook; completing a loan application; the implications of an inheritance; the basics of personal
61 insurance policies; consumer rights and responsibilities; dealing with salesmen and merchants; debt
62 management, including retail and credit card debt; state and federal tax computation; local tax
63 assessments; computation of interest rates by various mechanisms; understanding simple contracts; and
64 how to contest an incorrect bill. These personal living and finances objectives shall not be required to be
65 included in the Board's Standards of Learning, and shall be developed in a manner to ensure that
66 instruction in the Standards of Learning shall not be de-emphasized. The Board shall not be required to
67 evaluate student achievement concerning such objectives in the Standards of Learning Assessment Tests
68 required by § 22.1-253.13:3.

69 C. Local school boards shall develop and implement a program of instruction for grades K through
70 12 which emphasizes reading, writing, speaking, mathematical concepts and computations, technological
71 proficiency, and scientific concepts and processes; essential skills and concepts of citizenship, including
72 knowledge of history, economics, government, foreign languages, international cultures, health and
73 physical education, environmental issues and geography necessary for responsible participation in
74 American society and in the international community; fine arts, which may include, but need not be
75 limited to, music and art, and practical arts; knowledge and skills needed to qualify for further education
76 and employment or, in the case of some handicapped children, to qualify for appropriate training; and
77 development of the ability to apply such skills and knowledge in preparation for eventual employment
78 and lifelong learning. School boards shall strive to employ licensed instructional personnel qualified in
79 the relevant subject areas, including qualified teachers, licensed through the Board of Education's
80 provisional licensure procedures, who have professional expertise in the relevant subject areas.

81 Local school boards shall also develop and implement programs of prevention, intervention, or
82 remediation for students who are educationally at risk including, but not limited to, those whose scores
83 are in the bottom national quartile on Virginia State Assessment Program Tests, who do not pass the
84 literacy tests prescribed by the Board of Education, or who fail to achieve a passing score on any
85 Standards of Learning assessment in grades three, five, and eight, *and those students who are otherwise*
86 *determined by their teachers to need such programs based on multiple measures of student achievement,*
87 *consisting primarily of a variety of locally-developed classroom assessments of student work, and other*
88 *relevant data, and supplemented by scores on standardized assessments, including the Standards of*
89 *Learning assessments.* Such programs may include summer school for all elementary and middle school
90 grades and for all high school academic courses, as defined by regulations promulgated by the Board of
91 Education, or other forms of remediation. Division superintendents shall require such students to take
92 special programs of prevention, intervention, or remediation which may include attendance in public
93 summer school programs, in accordance with clause (ii) of subsection A of § 22.1-254 and
94 § 22.1-254.01. The requirement for remediation may, however, be satisfied by the student's attendance in
95 a program of prevention, intervention or remediation which has been selected by his parent and is either
96 (i) conducted by an accredited private school or (ii) a special program which has been determined to be
97 comparable to the required public school remediation program by the division superintendent. The costs
98 of such private school remediation program or other special remediation program shall be borne by the
99 student's parent. Students required to attend such summer school programs or to participate in another
100 form of remediation shall not be charged tuition by the local school division. Based on the number of
101 students attending and the Commonwealth's share of the per pupil costs, additional state funds shall be
102 provided for summer and other remediation programs as set forth in the appropriation act.

103 Any student who does not pass the literacy tests or all Standards of Learning assessments in grades
104 three, five, and eight shall be required to attend a summer school program or participate in another form
105 of remediation. Such summer school program or other form of remediation shall be chosen by the
106 school division to be appropriate to the academic needs of the student. State funds shall be provided, as
107 set forth in the appropriation act, for the attendance in remediation programs conducted by local school
108 divisions for those students who do not pass the literacy tests beginning with the 1997-1998 fiscal year
109 and for students who do not pass all Standards of Learning assessments in grades three, five, and eight
110 beginning with the 1998-1999 fiscal year.

111 To ensure consistency in program quality, each school board may establish a remediation program
112 standards committee which may include, but need not be limited to, the superintendent or his designee,
113 a teacher, a parent, and one representative of the community at large. The remediation program
114 standards committee shall recommend the program components for the remediation programs and shall
115 evaluate the success of the programs. Such program components may include transition mechanisms for
116 children to ensure the smooth movement between remediation programs and regular programs,
117 pupil-teacher ratios, objectives, and time, site, and duration of the various programs.

118 Such remediation programs shall include, when applicable, a procedure for early identification of
119 students who are at risk of failure of the literacy tests or the Standards of Learning assessments in
120 grades three, five, and eight. The identified students shall be provided appropriate remediation activities.

121 The Board of Education shall establish standards for full funding of summer remedial programs

which shall include, but not be limited to, the minimum number of instructional hours or the equivalent thereof required for full funding and an assessment system designed to evaluate program effectiveness. Based on the number of students attending and the Commonwealth's share of the per pupil instructional costs, state funds shall be provided for the full cost of summer and other remediation programs as set forth in the appropriation act, provided such programs comply with such standards as shall be established by the Board, pursuant to § 22.1-199.2.

D. Local school boards shall also implement the following:

1. Programs in grades K through 3 which emphasize developmentally appropriate learning to enhance success.

2. Programs based on prevention, intervention, or retrieval designed to increase the number of students who earn a high school diploma or general education development (GED) certificate. As provided in the appropriation act, state funding, in addition to basic aid, shall be allocated to support programs grounded in sound educational policy to reduce the number of students who drop out of school. From such funds as may be appropriated for this purpose, sufficient funds shall be provided to hold all local school divisions harmless by providing no-loss funding which maintains the level of each school division's funding as allocated for drop-out prevention programs on July 1, 1996, if the level of funding for such school division's drop-out prevention programs would be less than its level of funding for such programs in fiscal year 1995. Effective on and after July 1, 1996, the Board of Education shall develop and implement a funding mechanism to ensure that no school board is penalized in its state funding for drop-out prevention programs for reducing the drop-out rate in its school division.

3. Career education programs infused into the K through 12 curricula that promote knowledge of careers and all types of employment opportunities including, but not limited to, apprenticeships, the military, career education schools, and the teaching profession, and emphasize the advantages of completing school with marketable skills. School boards may include career exploration opportunities in the middle school grades.

4. Competency-based vocational education programs, which integrate academic outcomes, career guidance and job-seeking skills for all secondary students including those identified as handicapped that reflect employment opportunities, labor market needs, applied basic skills, job-seeking skills, and career guidance. Career guidance shall include employment counseling designed to furnish information on available employment opportunities to all students, including those identified as handicapped, and placement services for students exiting school. Each school board shall develop and implement a plan to ensure compliance with the provisions of this subsection.

5. Academic and vocational preparation for students who plan to continue their education beyond secondary school or who plan to enter employment.

6. Early identification of handicapped students and enrollment of such students in appropriate instructional programs consistent with state and federal law.

7. Early identification of gifted students and enrollment of such students in appropriately differentiated instructional programs.

8. Educational alternatives for students whose needs are not met in programs prescribed elsewhere in these standards. Such students shall be counted in average daily membership (ADM) in accordance with the regulations of the Board of Education.

9. Adult education programs for individuals functioning below the high school completion level. Such programs may be conducted by the school board as the primary agency or through a collaborative arrangement between the school board and other agencies.

10. A plan to make achievements for students who are educationally at risk a divisionwide priority which shall include procedures for measuring the progress of such students.

11. A plan to notify students and their parents of the availability of advanced placement classes, the International Baccalaureate program, and Academic Year Governor's School Programs, the qualifications for enrolling in such classes and programs, and the availability of financial assistance to low-income and needy students to take the advanced placement and International Baccalaureate examinations.

E. Each local school board shall employ with state and local basic, special education, gifted, and vocational education funds a minimum number of licensed, full-time equivalent instructional personnel for each 1,000 students in average daily membership (ADM) as set forth in the appropriation act. Calculations of kindergarten positions shall be based on full-day kindergarten programs. Beginning with the March 31 report of average daily membership, those school divisions offering half-day kindergarten shall adjust their average daily membership for kindergarten to reflect eighty-five percent of the total kindergarten average daily memberships, as provided in the appropriation act.

F. In addition to the positions supported by basic aid and in support of regular school year remedial programs, state funding, pursuant to the appropriation act, shall be provided to fund certain full-time equivalent instructional positions for each 1,000 students in grades K through 12 estimated to score in the bottom national quartile on Virginia State Assessment Program Tests and those who fail the literacy

183 tests or Standards of Learning assessments for grades three, five, and eight prescribed by the Board.
184 State funding for remedial programs provided pursuant to this subsection and the appropriation act may
185 be used to support programs for educationally at-risk students as identified by the local school boards.
186 The Board of Education shall establish criteria for identification of educationally at-risk students, which
187 shall not be construed to be regulations as defined in § 9-6.14:4; however, the Board of Education may,
188 from time to time, revise these identification criteria. In order to provide appropriate opportunity for
189 input from the general public, teachers, and local school boards, the Board of Education shall conduct
190 public hearings prior to establishing or revising such identification criteria. Thirty days prior to
191 conducting such hearings, the Board shall give written notice by mail of the date, time, and place of the
192 hearings to all local school boards and any other persons requesting to be notified of the hearings and
193 publish notice of its intention to establish or revise such identification criteria in the Virginia Register of
194 Regulations. Interested parties shall be given reasonable opportunity to be heard and present information
195 prior to final adoption of any such identification criteria or revisions thereto.

196 G. Licensed instructional personnel shall be assigned by each school board in a manner that produces
197 divisionwide ratios of students in average daily membership to full-time equivalent teaching positions,
198 excluding special education teachers, principals, assistant principals, counselors, and librarians, that are
199 not greater than the following ratios: (i) twenty-four to one in kindergarten with no class being larger
200 than twenty-nine students; if the average daily membership in any kindergarten class exceeds
201 twenty-four pupils, a full-time teacher's aide shall be assigned to the class; (ii) twenty-four to one in
202 grade one with no class being larger than thirty students; (iii) twenty-four to one in grades two and three
203 with no class being larger than thirty students; (iv) twenty-five to one in grades four through six with no
204 class being larger than thirty-five students; and (v) twenty-four to one in English classes in grades six
205 through twelve.

206 Further, pursuant to the appropriation act, school boards may implement in kindergarten through third
207 grade, within certain schools, lower ratios of students in average daily membership to full-time
208 equivalent teaching positions by assigning instructional personnel in a manner that produces ratios of
209 students in average daily membership to full-time equivalent teaching positions, excluding special
210 education teachers, principals, assistant principals, counselors, and librarians, as follows: (i) in schools
211 having high concentrations of at-risk students, eighteen to one; and (ii) in schools having moderate
212 concentrations of at-risk students, twenty to one. For the purposes of this subsection, "schools having
213 high concentrations of at-risk students" and "schools having moderate concentrations of at-risk students"
214 shall be as defined in the appropriation act.

215 In addition, instructional personnel shall be assigned by each school board in a manner that produces
216 schoolwide ratios of students in average daily memberships to full-time equivalent teaching positions of
217 twenty-five to one in middle schools and high schools.

218 School boards shall, however, annually, on or before January 1, report to the public the actual
219 pupil-teacher ratios in elementary school classrooms by school for the current school year. Such actual
220 ratios shall include only the teachers who teach the grade and class on a full-time basis and shall
221 exclude resource personnel. School boards shall report pupil-teacher ratios which include resource
222 teachers in the same annual report. Any classes funded through the voluntary kindergarten through third
223 grade at-risk student/lower ratio program shall be identified as such classes. Any classes having waivers
224 to exceed the requirements of this subsection shall also be identified. Schools shall be identified;
225 however, the data shall be compiled in a manner to ensure the confidentiality of all teacher and pupil
226 identities.

227 H. Students enrolled in a public school on a less than full-time basis shall be counted in average
228 daily membership (ADM) in the relevant school division. Students who are either (i) enrolled in a
229 nonpublic school or (ii) receiving home instruction pursuant to § 22.1-254.1, and who are enrolled in
230 public school on a less than full-time basis in any mathematics, science, English, history, social science,
231 vocational education, fine arts, foreign language, or health education or physical education course shall
232 be counted in the average daily membership (ADM) in the relevant school division on a pro rata basis
233 as provided in the appropriation act. However, no such nonpublic or home school student shall be
234 counted as more than one-half a student for purposes of such pro rata calculation. Such calculation shall
235 not include enrollments of such students in any other public school courses.

236 § 22.1-253.13:1. (Effective July 1, 2003) Standard 1. Basic skills, selected programs, and instructional
237 personnel.

238 A. The General Assembly and the Board of Education believe that the fundamental goal of the
239 public schools of this Commonwealth must be to enable each student to develop the skills that are
240 necessary for success in school and preparation for life, and find that the quality of education is
241 dependent upon the provision of the appropriate working environment, benefits, and salaries necessary to
242 ensure the availability of high quality instructional personnel and adequate commitment of other
243 resources.

244 B. The Board of Education shall establish educational objectives to implement the development of

the skills that are necessary for success in school and for preparation for life in the years beyond. The current educational objectives, known as the Standards of Learning, shall not be construed to be regulations as defined in § 9-6.14:4; however, the Board of Education may, from time to time, revise these educational objectives to maintain academic rigor. In order to provide appropriate opportunity for input from the general public, teachers, and local school boards, the Board of Education shall conduct public hearings prior to establishing new educational objectives. Thirty days prior to conducting such hearings, the Board shall give written notice by mail of the date, time, and place of the hearings to all local school boards and any other persons requesting to be notified of the hearings and publish notice of its intention to revise these educational objectives in the Virginia Register of Regulations. Interested parties shall be given reasonable opportunity to be heard and present information prior to final adoption of any revisions of these educational objectives.

The Board shall seek to ensure that any revised educational objectives are consistent with the world's highest educational standards. These objectives shall include, but not be limited to, basic skills of communication, computation and critical reasoning including problem solving and decision making and the skills to manage personal finances and to make sound financial decisions, and the development of personal qualities such as self-esteem, sociability, self-management, integrity, and honesty.

With such funds as are made available for this purpose, the Board shall regularly review and revise the competencies for vocational education programs to require the full integration of English, mathematics, science and social studies Standards of Learning. Occupational vocational programs shall be aligned with industry and professional standard certifications, where they exist.

The Standards of Learning in all subject areas shall be subject to regular review and revision to maintain rigor and to reflect a balance between content knowledge and the application of knowledge in preparation for eventual employment and lifelong learning.

School boards shall implement these objectives or objectives specifically designed for their school divisions that are equivalent to or exceed the Board's requirements. Students shall be expected to achieve the educational objectives utilized by the school division at appropriate age or grade levels.

With such funds as are available for this purpose, the Board of Education may prescribe assessment methods to determine the level of achievement of these objectives by all students. Such assessments shall evaluate knowledge, application of knowledge, critical thinking, and skills related to the Standards of Learning being assessed. The Board, with the assistance of independent testing experts, shall conduct a regular analysis and validation process for these assessments.

By July 1, 1999, the Board shall develop and approve objectives for mathematics, at the middle and high school levels, for personal living and finances, which shall focus on money management skills for individuals and families. The personal living and finances objectives shall require instruction in those skills necessary to handle personal business and finances and shall include, but need not be limited to, the following: opening a bank account and how to judge the quality of a bank's services; balancing a checkbook; completing a loan application; the implications of an inheritance; the basics of personal insurance policies; consumer rights and responsibilities; dealing with salesmen and merchants; debt management, including retail and credit card debt; state and federal tax computation; local tax assessments; computation of interest rates by various mechanisms; understanding simple contracts; and how to contest an incorrect bill. These personal living and finances objectives shall not be required to be included in the Board's Standards of Learning, and shall be developed in a manner to ensure that instruction in the Standards of Learning shall not be de-emphasized. The Board shall not be required to evaluate student achievement concerning such objectives in the Standards of Learning Assessment Tests required by § 22.1-253.13:3.

C. Local school boards shall develop and implement a program of instruction for grades K through 12 which emphasizes reading, writing, speaking, mathematical concepts and computations, technological proficiency, and scientific concepts and processes; essential skills and concepts of citizenship, including knowledge of history, economics, government, foreign languages, international cultures, health and physical education, environmental issues and geography necessary for responsible participation in American society and in the international community; fine arts, which may include, but need not be limited to, music and art, and practical arts; knowledge and skills needed to qualify for further education and employment or, in the case of some handicapped children, to qualify for appropriate training; and development of the ability to apply such skills and knowledge in preparation for eventual employment and lifelong learning. School boards shall strive to employ licensed instructional personnel qualified in the relevant subject areas, including qualified teachers, licensed through the Board of Education's provisional licensure procedures, who have professional expertise in the relevant subject areas.

Local school boards shall also develop and implement programs of prevention, intervention, or remediation for students who are educationally at risk including, but not limited to, those whose scores are in the bottom national quartile on Virginia State Assessment Program Tests, or who fail to achieve a passing score on any Standards of Learning assessment in grades three, five, and eight, and those

306 *students who are otherwise determined by their teachers to need such programs based on multiple*
307 *measures of student achievement, consisting primarily of a variety of locally-developed classroom*
308 *assessments of student work, and other relevant data, and supplemented by scores on standardized*
309 *assessments, including the Standards of Learning assessments.* Such programs may include summer
310 school for all elementary and middle school grades and for all high school academic courses, as defined
311 by regulations promulgated by the Board of Education, or other forms of remediation. Division
312 superintendents shall require such students to take special programs of prevention, intervention, or
313 remediation which may include attendance in public summer school programs, in accordance with clause
314 (ii) of subsection A of § 22.1-254 and § 22.1-254.01. The requirement for remediation may, however, be
315 satisfied by the student's attendance in a program of prevention, intervention or remediation which has
316 been selected by his parent and is either (i) conducted by an accredited private school or (ii) a special
317 program which has been determined to be comparable to the required public school remediation program
318 by the division superintendent. The costs of such private school remediation program or other special
319 remediation program shall be borne by the student's parent. Students required to attend such summer
320 school programs or to participate in another form of remediation shall not be charged tuition by the
321 local school division. Based on the number of students attending and the Commonwealth's share of the
322 per pupil costs, additional state funds shall be provided for summer and other remediation programs as
323 set forth in the appropriation act.

324 Any student who does not pass all Standards of Learning assessments in grades three, five, and eight
325 shall be required to attend a summer school program or participate in another form of remediation. Such
326 summer school program or other form of remediation shall be chosen by the school division to be
327 appropriate to the academic needs of the student. State funds shall be provided, as set forth in the
328 appropriation act, for the attendance in remediation programs conducted by local school divisions for
329 students who do not pass all Standards of Learning assessments in grades three, five, and eight
330 beginning with the 1998-1999 fiscal year.

331 To ensure consistency in program quality, each school board may establish a remediation program
332 standards committee which may include, but need not be limited to, the superintendent or his designee,
333 a teacher, a parent, and one representative of the community at large. The remediation program
334 standards committee shall recommend the program components for the remediation programs and shall
335 evaluate the success of the programs. Such program components may include transition mechanisms for
336 children to ensure the smooth movement between remediation programs and regular programs,
337 pupil-teacher ratios, objectives, and time, site, and duration of the various programs.

338 Such remediation programs shall include, when applicable, a procedure for early identification of
339 students who are at risk of academic failure of the Standards of Learning assessments in grades three,
340 five, and eight. The identified students shall be provided appropriate remediation activities.

341 The Board of Education shall establish standards for full funding of summer remedial programs
342 which shall include, but not be limited to, the minimum number of instructional hours or the equivalent
343 thereof required for full funding and an assessment system designed to evaluate program effectiveness.
344 Based on the number of students attending and the Commonwealth's share of the per pupil instructional
345 costs, state funds shall be provided for the full cost of summer and other remediation programs as set
346 forth in the appropriation act, provided such programs comply with such standards as shall be
347 established by the Board, pursuant to § 22.1-199.2.

348 D. Local school boards shall also implement the following:

349 1. Programs in grades K through 3 which emphasize developmentally appropriate learning to enhance
350 success.

351 2. Programs based on prevention, intervention, or retrieval designed to increase the number of
352 students who earn a high school diploma or general education development (GED) certificate. As
353 provided in the appropriation act, state funding, in addition to basic aid, shall be allocated to support
354 programs grounded in sound educational policy to reduce the number of students who drop out of
355 school. From such funds as may be appropriated for this purpose, sufficient funds shall be provided to
356 hold all local school divisions harmless by providing no-loss funding which maintains the level of each
357 school division's funding as allocated for drop-out prevention programs on July 1, 1996, if the level of
358 funding for such school division's drop-out prevention programs would be less than its level of funding
359 for such programs in fiscal year 1995. Effective on and after July 1, 1996, the Board of Education shall
360 develop and implement a funding mechanism to ensure that no school board is penalized in its state
361 funding for drop-out prevention programs for reducing the drop-out rate in its school division.

362 3. Career education programs infused into the K through 12 curricula that promote knowledge of
363 careers and all types of employment opportunities including, but not limited to, apprenticeships, the
364 military, career education schools, and the teaching profession, and emphasize the advantages of
365 completing school with marketable skills. School boards may include career exploration opportunities in
366 the middle school grades.

367 4. Competency-based vocational education programs, which integrate academic outcomes, career

guidance and job-seeking skills for all secondary students including those identified as handicapped that reflect employment opportunities, labor market needs, applied basic skills, job-seeking skills, and career guidance. Career guidance shall include employment counseling designed to furnish information on available employment opportunities to all students, including those identified as handicapped, and placement services for students exiting school. Each school board shall develop and implement a plan to ensure compliance with the provisions of this subsection.

5. Academic and vocational preparation for students who plan to continue their education beyond secondary school or who plan to enter employment.

6. Early identification of handicapped students and enrollment of such students in appropriate instructional programs consistent with state and federal law.

7. Early identification of gifted students and enrollment of such students in appropriately differentiated instructional programs.

8. Educational alternatives for students whose needs are not met in programs prescribed elsewhere in these standards. Such students shall be counted in average daily membership (ADM) in accordance with the regulations of the Board of Education.

9. Adult education programs for individuals functioning below the high school completion level. Such programs may be conducted by the school board as the primary agency or through a collaborative arrangement between the school board and other agencies.

10. A plan to make achievements for students who are educationally at risk a divisionwide priority which shall include procedures for measuring the progress of such students.

11. A plan to notify students and their parents of the availability of advanced placement classes, the International Baccalaureate program, and Academic Year Governor's School Programs, the qualifications for enrolling in such classes and programs, and the availability of financial assistance to low-income and needy students to take the advanced placement and International Baccalaureate examinations.

E. Each local school board shall employ with state and local basic, special education, gifted, and vocational education funds a minimum number of licensed, full-time equivalent instructional personnel for each 1,000 students in average daily membership (ADM) as set forth in the appropriation act. Calculations of kindergarten positions shall be based on full-day kindergarten programs. Beginning with the March 31 report of average daily membership, those school divisions offering half-day kindergarten shall adjust their average daily membership for kindergarten to reflect eighty-five percent of the total kindergarten average daily memberships, as provided in the appropriation act.

F. In addition to the positions supported by basic aid and in support of regular school year remedial programs, state funding, pursuant to the appropriation act, shall be provided to fund certain full-time equivalent instructional positions for each 1,000 students in grades K through 12 estimated to score in the bottom national quartile on Virginia State Assessment Program Tests and those who fail the literacy tests or Standards of Learning assessments for grades three, five, and eight prescribed by the Board. State funding for remedial programs provided pursuant to this subsection and the appropriation act may be used to support programs for educationally at-risk students as identified by the local school boards. The Board of Education shall establish criteria for identification of educationally at-risk students, which shall not be construed to be regulations as defined in § 9-6.14:4; however, the Board of Education may, from time to time, revise these identification criteria. In order to provide appropriate opportunity for input from the general public, teachers, and local school boards, the Board of Education shall conduct public hearings prior to establishing or revising such identification criteria. Thirty days prior to conducting such hearings, the Board shall give written notice by mail of the date, time, and place of the hearings to all local school boards and any other persons requesting to be notified of the hearings and publish notice of its intention to establish or revise such identification criteria in the Virginia Register of Regulations. Interested parties shall be given reasonable opportunity to be heard and present information prior to final adoption of any such identification criteria or revisions thereto.

G. Licensed instructional personnel shall be assigned by each school board in a manner that produces divisionwide ratios of students in average daily membership to full-time equivalent teaching positions, excluding special education teachers, principals, assistant principals, counselors, and librarians, that are not greater than the following ratios: (i) twenty-four to one in kindergarten with no class being larger than twenty-nine students; if the average daily membership in any kindergarten class exceeds twenty-four pupils, a full-time teacher's aide shall be assigned to the class; (ii) twenty-four to one in grade one with no class being larger than thirty students; (iii) twenty-four to one in grades two and three with no class being larger than thirty students; (iv) twenty-five to one in grades four through six with no class being larger than thirty-five students; and (v) twenty-four to one in English classes in grades six through twelve.

Further, pursuant to the appropriation act, school boards may implement in kindergarten through third grade, within certain schools, lower ratios of students in average daily membership to full-time equivalent teaching positions by assigning instructional personnel in a manner that produces ratios of

429 students in average daily membership to full-time equivalent teaching positions, excluding special
430 education teachers, principals, assistant principals, counselors, and librarians, as follows: (i) in schools
431 having high concentrations of at-risk students, eighteen to one; and (ii) in schools having moderate
432 concentrations of at-risk students, twenty to one. For the purposes of this subsection, "schools having
433 high concentrations of at-risk students" and "schools having moderate concentrations of at-risk students"
434 shall be as defined in the appropriation act.

435 In addition, instructional personnel shall be assigned by each school board in a manner that produces
436 schoolwide ratios of students in average daily memberships to full-time equivalent teaching positions of
437 twenty-five to one in middle schools and high schools.

438 School boards shall, however, annually, on or before January 1, report to the public the actual
439 pupil-teacher ratios in elementary school classrooms by school for the current school year. Such actual
440 ratios shall include only the teachers who teach the grade and class on a full-time basis and shall
441 exclude resource personnel. School boards shall report pupil-teacher ratios which include resource
442 teachers in the same annual report. Any classes funded through the voluntary kindergarten through third
443 grade at-risk student/lower ratio program shall be identified as such classes. Any classes having waivers
444 to exceed the requirements of this subsection shall also be identified. Schools shall be identified;
445 however, the data shall be compiled in a manner to ensure the confidentiality of all teacher and pupil
446 identities.

447 H. Students enrolled in a public school on a less than full-time basis shall be counted in average
448 daily membership (ADM) in the relevant school division. Students who are either (i) enrolled in a
449 nonpublic school or (ii) receiving home instruction pursuant to § 22.1-254.1, and who are enrolled in
450 public school on a less than full-time basis in any mathematics, science, English, history, social science,
451 vocational education, fine arts, foreign language, or health education or physical education course shall
452 be counted in the average daily membership (ADM) in the relevant school division on a pro rata basis
453 as provided in the appropriation act. However, no such nonpublic or home school student shall be
454 counted as more than one-half a student for purposes of such pro rata calculation. Such calculation shall
455 not include enrollments of such students in any other public school courses.
