HOUSE BILL NO. 1896

Offered January 10, 2001

Prefiled January 8, 2001

A BILL to amend and reenact § 51.1-142 of the Code of Virginia, relating to purchase of prior service credit in the Virginia Retirement System.

Patron—Griffith

Referred to Committee on Appropriations

Be it enacted by the General Assembly of Virginia:

1. That § 51.1-142 of the Code of Virginia is amended and reenacted as follows:

§ 51.1-142. Prior service or membership credit for certain members.

A. Any member in service may purchase credit for service lost as a result of the following:

1. Rejection of membership in the retirement system.

2. Cessation of membership under this chapter because of the withdrawal of his accumulated contributions.

3. Exclusion from membership because of being a member of the General Assembly or other state officer elected by the people.

4. Termination of service as an officer or employee of a political subdivision in a position which subsequently became covered by the retirement system and for which prior service credit was granted.

In order to receive credit for the service, the member must pay an amount equal to the contributions that he would have made during the entire period to be credited, assuming that the member contribution rate specified in this chapter as of the date of payment had been in effect during the entire period and that the higher of the member's creditable compensation or average final compensation as of the date of payment had been received during the entire period.

When a member requests credit for a portion of the period, the most recent portion shall be credited. Payment may be made in a lump sum or by an additional payroll deduction. Only one additional deduction shall be permitted at any time. Should the additional deduction be terminated prior to purchasing the entire period which might otherwise be credited, the member shall be credited with the number of additional months of service for which payments are made. If the additional deduction is continued beyond the point at which the entire period has been purchased, the member shall be credited with no more than the entire period which might otherwise have been credited and the excess amount deducted shall be refunded to the member.

B. Any vested member in service with at least twenty-five years of creditable service in the Retirement System may purchase prior service credit for (i) active duty military service in the armed forces of the United States, provided that the discharge from the armed forces was not dishonorable, (ii) certified creditable service in the retirement system of another state or of a political subdivision or public school system of this or another state, (iii) civilian service of the United States, ~~or~~ (iv) service while training in any of the reserve components of the armed forces of the United States or of the National Guard, or (iv) any combination thereof. For purposes of this subsection, "active duty military service" means full-time service of at least 180 consecutive days in the United States Army, Navy, Air Force, Marines, Coast Guard, or reserve components thereof.

Such prior service credit shall be calculated at the ratio of one year of prior service credit to one year of active duty military service or certified creditable service in the retirement system of another state, political subdivision or public school system of this or another state, or civilian service of the United States up to a maximum of four years of prior service credit. *Such service credit shall be calculated at the ratio of one year of prior service credit to one year of service while training in any of the reserve components of the armed forces of the United States or of the National Guard, on a day-for-day basis, including, but not limited to, intermittent training on weekends and during the summer, up to a maximum of one year of prior service credit.* The member must pay an amount equal to five percent of his present annual compensation for each year to be credited or five percent of his average annual creditable compensation during his thirty-six highest consecutive months of creditable service, whichever is greater. Such prior service credit shall not be otherwise creditable as prior service in the calculation of any retirement benefit by this or another retirement system, but shall be creditable as prior service under this chapter and, if applicable, shall be considered in determining the actuarial equivalent for early retirement. Prior service credit for service pursuant to clauses (i), (ii), and (iii) of subsection B in excess of four years may be purchased by the member pursuant to § 51.1-143.

C. Any member granted a leave of absence for any of the following reasons may purchase limited
