010554820 1 HOUSE BILL NO. 2073 2 Offered January 10, 2001 3 Prefiled January 10, 2001 4 A BILL to amend and reenact § 62.1-44.17:1 of the Code of Virginia, relating to general permits for 5 confined animal feeding operations; certification of notice. 6 Patrons—Landes, Harris, Louderback and Weatherholtz; Senators: Hanger and Miller, K.G. 7 8 Referred to Committee on Conservation and Natural Resources 9 10 Be it enacted by the General Assembly of Virginia: 1. That § 62.1-44.17:1 of the Code of Virginia is amended and reenacted as follows: 11 § 62.1-44.17:1. General Permits for confined animal feeding operations. 12 13 A. For the purposes of this chapter, "confined animal feeding operation" means a lot or facility, 14 together with any associated treatment works, where both of the following conditions are met: 15 1. Animals have been, are, or will be stabled or confined and fed or maintained for a total of 16 forty-five days or more in any twelve-month period; and 2. Crops, vegetation, forage growth or post-harvest residues are not sustained over any portion of the 17 18 operation of the lot or facility. 19 Two or more confined animal feeding operations under common ownership are considered to be a 20 single confined animal feeding operation if they adjoin each other or if they use a common area or 21 system for the disposal of liquid waste. 22 B. A confined animal feeding operation with 300 or more animal units utilizing a liquid manure 23 collection and storage system, upon fulfillment of the requirements of this section, shall be permitted by 24 a General Virginia Pollution Abatement permit (hereafter referred to as the "General Permit"), adopted 25 by the Board. In adopting the General Permit the Board shall: 26 1. Authorize the General Permit to pertain to confined animal feeding operations having 300 or more 27 animal units; 28 2. Establish procedures for submitting a registration statement meeting the requirements of subsection 29 C. Submitting a registration statement shall be evidence of intention to be covered by the General 30 Permit; and 31 3. Establish criteria for the design and operation of confined animal feeding operations only as 32 described in subsection E. 33 C. For coverage under the General Permit, the owner of the confined animal feeding operation shall file a registration statement with the Department of Environmental Quality providing the name and address of the operation (if different 34 35 36 than the owner), the mailing address and location of the operation, and a list of the types, maximum 37 number and average weight of the animals which will be maintained at the facility. The owner shall 38 attach to the registration statement: 39 1. A copy of a letter of approval of the nutrient management plan for the operation from the 40 Department of Conservation and Recreation; 2. A copy of the approved nutrient management plan; 41 3. A notification from the governing body of the locality where the operation is located that the 42 43 operation is consistent with all ordinances adopted pursuant to Chapter 22 (§ 15.2-2200 et seq.) of Title 44 15.2; 45 4. A certification that the owner or operator meets all the requirements of the Board for the General 46 Permit: and 47 5. For new or expanded operations, A a certification that the owner has given notice of the 48 registration statement to all owners or residents of property that adjoins the property on which the 49 proposed operation will be located. Such notice shall include (i) the types and maximum number of animals which will be maintained at the facility and (ii) the address and phone number of the 50 51 appropriate Department of Environmental Quality regional office to which comments relevant to the 52 permit may be submitted. 53 D. Any person may submit written comments on the proposed operation to the Department within thirty days of the date of the filing of the registration statement. If, on the basis of such written 54 55 comments or his review, the Director determines that the proposed operation will not be capable of complying with the provisions of this section, the Director shall require the owner to obtain an 56 57 individual permit for the operation. Any such determination by the Director shall be made in writing and

received by the owner not more than forty-five days after the filing of the registration statement or, if in

12/26/22 7:54

58

59 the Director's sole discretion additional time is necessary to evaluate comments received from the public, 60 not more than sixty days after the filing of the registration statement.

E. The criteria for the design and operation of a confined animal feeding operation shall be as 61 62 follows:

63 1. The operation shall have a liquid manure collection and storage facility designed and operated to: 64 (i) prevent any discharge to state waters, except a discharge resulting from a storm event exceeding a 65 twenty-five-year, twenty-four-hour storm and (ii) provide adequate waste storage capacity to accommodate periods when the ground is frozen or saturated, periods when land application of nutrients 66 should not occur due to limited or nonexistent crop nutrient uptake, and periods when physical 67 68 limitations prohibit the land application of waste;

69 2. The operation shall implement and maintain on site a nutrient management plan approved pursuant to subdivision 1 of subsection C. The nutrient management plan shall contain at a minimum the 70 71 following information: (i) a site map indicating the location of the waste storage facilities and the fields where waste will be applied; (ii) site evaluation and assessment of soil types and potential productivities; 72 (iii) nutrient management sampling including soil and waste monitoring; (iv) storage and land area 73 74 requirements; (v) calculation of waste application rates; (vi) waste application schedules; and (vii) a plan 75 for waste utilization in the event the operation is discontinued;

3. Adequate buffer zones, where waste shall not be applied, shall be maintained between areas where 76 77 waste may be applied and (i) water supply wells or springs, (ii) surface water courses, (iii) rock 78 outcroppings, (iv) sinkholes, and (v) occupied dwellings unless a waiver is signed by the occupants of 79 the dwellings;

80 4. The operation shall be monitored as follows: (i) waste shall be monitored at least once per year; 81 (ii) soil shall be monitored at least once every three years; (iii) ground water shall be monitored at new earthen waste storage facilities constructed to an elevation below the seasonal high water table or within 82 83 one foot thereof; and (iv) all facilities previously covered by a Virginia Pollution Abatement permit that required ground water monitoring shall continue such monitoring. In such facilities constructed below 84 85 the water table, the top surface of the waste must be maintained at a level of at least two feet above the 86 water table. The Department of Environmental Quality and the Department of Conservation and Recreation may include in the permit or nutrient management plan more frequent or additional 87 88 monitoring of waste, soils or groundwater as required to protect state waters. Records shall be 89 maintained to demonstrate where and at what rate waste has been applied, that the application schedule 90 has been followed, and what crops have been planted. Such records shall be available for inspection by 91 the Department of Environmental Quality and shall be maintained for a period of five years after 92 recorded application is made;

5. New earthen waste storage facilities shall include a properly designed and installed liner. Such 93 liner shall be either a synthetic liner of at least twenty mils thickness or a compacted soil liner of at 94 95 least one foot thickness with a maximum permeability rating of 0.0014 inches per hour. A licensed professional engineer, an employee of the Natural Resources Conservation Service of the United States 96 97 Department of Agriculture with appropriate engineering approval authority, or an employee of a soil and 98 water conservation district with appropriate engineering approval authority shall certify that the siting, 99 design and construction of the waste storage facility comply with the requirements of this section;

6. New waste storage facilities shall not be located on a 100-year flood plain; 100

101 7. All facilities must maintain one foot of freeboard at all times, up to and including a 102 twenty-five-year, twenty-four-hour storm;

103 8. All equipment needed for the proper operation of the permitted facilities shall be maintained in 104 good working order. Manufacturer's operating and maintenance manuals shall be retained for references to allow for timely maintenance and prompt repair of equipment when appropriate; 105

9. The owner or operator of the operation shall notify the Department of Environmental Quality at 106 107 least fourteen days prior to animals being placed in the confined facility; and

108 10. Each operator of a facility covered by the General Permit on July 1, 1999, shall, by January 1, 109 2000, complete the training program offered or approved by the Department of Conservation and Recreation under subsection F. Each operator of a facility permitted after July 1, 1999, shall complete 110 111 such training within one year after the registration statement required by subsection C has been submitted. Thereafter, all operators shall complete the training program at least once every three years. 112

113 F. The Department of Conservation and Recreation, in consultation with the Department of Environmental Quality and the Virginia Cooperative Extension Service, shall develop or approve a 114 115 training program for persons operating confined animal feeding operations covered by the General Permit. The program shall include training in the requirements of the General Permit; the use of best 116 117 management practices; inspection and management of liquid manure collection, storage and application systems; water quality monitoring and spill prevention; and emergency procedures. G. Operations having an individual Virginia Pollution Abatement permit or a No Discharge 118

119 120 Certificate may submit a registration statement for operation under the General Permit pursuant to this 121 section.

H. The Director of the Department of Environmental Quality may require the owner of a confined
animal feeding operation to obtain an individual permit for an operation subject to this section upon
determining that the operation is in violation of the provisions of this section. New or reissued
individual permits shall contain criteria for the design and operation of confined animal feeding
operations including, but not limited to, those described in subsection E.

127 I. No person shall operate a confined animal feeding operation with 300 or more animal units
128 utilizing a liquid manure collection and storage system after July 1, 2000, without having submitted a
129 registration statement as provided in subsection C or being covered by an individual permit.

130 J. Any person violating this section shall be subject only to the provisions of §§ 62.1-44.23 and 62.1-44.32 (a), except that any civil penalty imposed shall not exceed \$2,500.
