There is hereby created on the books of the Comptroller in the Department of the Treasury a special nonreverting fund that shall be known as the Localities' Share of Individual Income Tax Revenue Fund. These funds shall be used exclusively for the distributions to localities described in § 58.1-328.

§ 58.1-328. Determination of amount for distribution to each locality.

After determining the total amount to be distributed to localities in accordance with § 58.1-327, the amount of individual income tax revenue to be distributed to each locality shall be calculated as follows:

1. Distribution to cities and counties.

a. Fifty percent of the total amount shall be distributed based on the relative share of the total individual income tax paid by taxpayers filing returns in each locality. The amount of individual income tax payments by locality listed in the most recent Department of Taxation's Annual Report shall be used to calculate this part of the formula.

b. Forty percent of the total amount shall be distributed based on where wages are earned. The amount of each locality's relative share of the total statewide wages earned according to the most recent Bureau of Labor Statistics ES202 data obtained from the Virginia Employment Commission annually shall be used to calculate this part of the formula.

c. Ten percent of the total amount shall be distributed equally among all the counties and cities.

59 tax revenues, as calculated in subdivision 1, with such town or towns as follows:

60 a. Fifty percent of the county's distribution shall be divided between the county and the town or
61 towns located within such county based on each town's share of the total county population.

68 locality's distribution for the next fiscal year shall be adjusted to account for the difference and an
69 explanation shall be provided to the locality at that time.
