**Be it enacted by the General Assembly of Virginia:**

§ 3.1-796.66. Definitions.

The following words as used in this chapter shall have the following meanings:

"Abandon" means to desert, forsake, or absolutely give up an animal without having secured another owner or custodian for the animal or by failing to provide the elements of basic care as set forth in § 3.1-796.68 for a period of five consecutive days.

"Adequate care" or "care" means the responsible practice of good animal husbandry, handling, production, management, confinement, feeding, watering, protection, shelter, transportation, treatment, and, when necessary, euthanasia, appropriate for the age, species, condition, size and type of the animal and the provision of veterinary care when needed to prevent suffering or impairment of health.

"Adequate exercise" or "exercise" means the opportunity for the animal to move sufficiently to maintain normal muscle tone and mass for the age, species, size, and condition of the animal.

"Adequate feed" means access to and the provision of food which is of sufficient quantity and nutritive value to maintain each animal in good health; is accessible to each animal; is prepared so as to permit ease of consumption for the age, species, condition, size and type of each animal; is provided in a clean and sanitary manner; is placed so as to minimize contamination by excrement and pests; and is provided at suitable intervals for the species, age, and condition of the animal, but at least once daily, except as prescribed by a veterinarian or as dictated by naturally occurring states of hibernation or fasting normal for the species.

"Adequate shelter" means provision of and access to shelter that is suitable for the species, age, condition, size, and type of each animal; provides adequate space for each animal; is safe and protects each animal from injury, rain, sleet, snow, hail, direct sunlight, the adverse effects of heat or cold, physical suffering, and impairment of health; is properly lighted; is properly cleaned; enables each animal to be clean and dry, except when detrimental to the species; and, for dogs and cats, provides a solid surface, resting platform, pad, floormat, or similar device that is large enough for the animal to lie on in a normal manner and can be maintained in a sanitary manner. Under this chapter, shelters whose wire, grid, or slat floors (i) permit the animals' feet to pass through the openings, (ii) sag under the animals' weight, or (iii) otherwise do not protect the animals' feet or toes from injury are not adequate shelter.

"Adequate space" means sufficient space to allow each animal to (i) easily stand, sit, lie, turn about, and make all other normal body movements in a comfortable, normal position for the animal and (ii) interact safely with other animals in the enclosure. When an animal is tethered, "adequate space" means a tether that permits the above actions and is appropriate to the age and size of the animal; is attached to the animal by a properly applied collar, halter, or harness configured so as to protect the animal from injury and prevent the animal or tether from becoming entangled with other objects or animals, or from extending over an object or edge that could result in the strangulation or injury of the animal; and is at least three times the length of the animal, as measured from the tip of its nose to the base of its tail, except when the animal is being walked on a leash or is attached by a tether to a lead line. When freedom of movement would endanger the animal, temporarily and appropriately restricting movement of the animal according to professionally accepted standards for the species is considered provision of adequate space.

"Adequate water" means provision of and access to clean, fresh, potable water of a drinkable temperature which is provided in a suitable manner, in sufficient volume, and at suitable intervals, but at least once every twelve hours, to maintain normal hydration for the age, species, condition, size and type of each animal, except as prescribed by a veterinarian or as dictated by naturally occurring states of hibernation or fasting normal for the species; and is provided in clean, durable receptacles which are accessible to each animal and are placed so as to minimize contamination of the water by excrement and pests or an alternative source of hydration consistent with generally accepted husbandry practices.

"Adoption" means the transfer of ownership of a dog or cat from a releasing agency to an individual.
