Land Use Taxation

Land use valuation is intended to encourage conservation by providing tax relief to the owner of real estate devoted solely to agricultural, horticultural, forest or open-space use. In valuing land at its use value, the assessing officer considers only the value of the real estate in its current use. The assessing officer does not consider the fair market value of the land at its most profitable use.

"Real estate devoted to open-space use" is real estate used as, or preserved for, (1) park or recreational purposes, (2) conservation of land or other natural resources, (3) floodways, (4) wetlands, (5) riparian buffers, (6) historic or scenic purposes, or (7) assisting in the shaping of the character, direction, and timing of community development or for the public interest and consistent with the local land-use plan.

Proposal

This bill would declare that public and private golf courses are real estate devoted to open-space use for purposes of land use taxation.
