**HOUSE BILL NO. 1970**

AMENDMENT IN THE NATURE OF A SUBSTITUTE  
(Proposed by the House Committee on Commerce and Labor  
on February 3, 2009)

(Patrons Prior to Substitute—Delegates Ware, R.L. and Saxman [HB 2081])

*A BILL to amend and reenact § 56-265.1 of the Code of Virginia and amend the Code of Virginia by adding sections numbered 56-265.4:6 and 56-265.4:10, relating to the delivery of propane service by an underground distribution system.*

**Be it enacted by the General Assembly of Virginia:**

**1. That § 56-265.1 of the Code of Virginia is amended and reenacted and that the Code of Virginia is amended by adding sections numbered 56-265.4:6 and 56-265.4:10, as follows:**

§ 56-265.1. Definitions.

In this chapter the following terms shall have the following meanings:

(a) "Company" means a corporation, a limited liability company, an individual, a partnership, an association, a joint-stock company, a business trust, a cooperative, or an organized group of persons, whether incorporated or not; or any receiver, trustee or other liquidating agent of any of the foregoing in his capacity as such; but not a municipal corporation or a county, unless such municipal corporation or county has obtained a certificate pursuant to § 56-265.4:4.

(b) "Public utility" means any company which owns or operates facilities within the Commonwealth of Virginia for the generation, transmission or distribution of electric energy for sale, for the production, storage, transmission, or distribution, otherwise than in enclosed portable containers, of natural or manufactured gas or geothermal resources for sale for heat, light or power, or for the furnishing of telephone service, sewerage facilities or water; however, the term "public utility" shall not include any of the following:

(1) Except as otherwise provided in § 56-265.3:1, any company furnishing sewerage facilities, geothermal resources or water to less than 50 customers. Any company furnishing water or sewer services to 10 or more customers and excluded by this subdivision from the definition of "public utility" for purposes of this chapter nevertheless shall not abandon the water or sewer services unless and until approval is granted by the Commission or all the customers receiving such services agree to accept ownership of the company.

(2) Any company generating and distributing electric energy exclusively for its own consumption.

(3) Any company (A) which furnishes electric service together with heating and cooling services, generated at a central plant installed on the premises to be served, to the tenants of a building or buildings located on a single tract of land undivided by any publicly maintained highway, street or road at the time of installation of the central plant, and (B) which does not charge separately or by meter for electric energy used by any tenant except as part of a rental charge. Any company excluded by this subdivision from the definition of "public utility" for the purposes of this chapter nevertheless shall, within 30 days following the issuance of a building permit, notify the State Corporation Commission in writing of the ownership, capacity and location of such central plant, and it shall be subject, with regard to the quality of electric service furnished, to the provisions of Chapters 10 (§ 56-232 et seq.) and 17 (§ 56-509 et seq.) of this title and regulations thereunder and be deemed a public utility for such purposes, if such company furnishes such service to 100 or more lessees.

(4) Any company, or affiliate thereof, making a first or direct sale, or ancillary transmission or delivery service, of natural or manufactured gas to fewer than 35 commercial or industrial customers, which are not themselves "public utilities" as defined in this chapter, or to certain public schools as indicated in this subdivision, for use solely by such purchasing customers at facilities which are not located in a territory for which a certificate to provide gas service has been issued by the Commission under this chapter and which, at the time of the Commission's receipt of the notice provided under § 56-265.4:5, are not located within any area, territory, or jurisdiction served by a municipal corporation that provided gas distribution service as of January 1, 1992, provided that such company shall comply with the provisions of § 56-265.4:5. Direct sales or ancillary transmission or delivery services of natural gas to public schools in the following localities may be made without regard to the number of schools involved and shall not count against the "fewer than 35" requirement in this subdivision: the Counties of Dickenson, Wise, Russell, and Buchanan, and the City of Norton.

(5) Any company which is not a public service corporation and which provides compressed natural gas service at retail for the public.

(6) Any company selling landfill gas from a solid waste management facility permitted by the Department of Environmental Quality to a public utility certificated by the Commission to provide gas distribution service to the public in the area in which the solid waste management facility is located. If

60 such company submits to the public utility a written offer for sale of such gas and the public utility  
61 does not agree within 60 days to purchase such gas on mutually satisfactory terms, then the company  
62 may sell such gas to (i) any facility owned and operated by the Commonwealth which is located within  
63 three miles of the solid waste management facility or (ii) any purchaser after such landfill gas has been  
64 liquefied. The provisions of this subdivision shall not apply to the City of Lynchburg or Fairfax County.

65 (7) Any authority created pursuant to the Virginia Water and Waste Authorities Act (§ 15.2-5100 et  
66 seq.) making a sale or ancillary transmission or delivery service of landfill gas to a commercial or  
67 industrial customer from a solid waste management facility permitted by the Department of  
68 Environmental Quality and operated by that same authority, if such an authority limits off-premises sale,  
69 transmission or delivery service of landfill gas to no more than one purchaser. The authority may  
70 contract with other persons for the construction and operation of facilities necessary or convenient to the  
71 sale, transmission or delivery of landfill gas, and no such person shall be deemed a public utility solely  
72 by reason of its construction or operation of such facilities. If the purchaser of the landfill gas is located  
73 within the certificated service territory of a natural gas public utility, the public utility may file for  
74 Commission approval a proposed tariff to reflect any anticipated or known changes in service to the  
75 purchaser as a result of the use of landfill gas. No such tariff shall impose on the purchaser of the  
76 landfill gas terms less favorable than similarly situated customers with alternative fuel capabilities;  
77 provided, however, that such tariff may impose such requirements as are reasonably calculated to  
78 recover the cost of such service and to protect and ensure the safety and integrity of the public utility's  
79 facilities.

80 (8) A company selling or delivering only landfill gas, electricity generated from only landfill gas, or  
81 both, that is derived from a solid waste management facility permitted by the Department of  
82 Environmental Quality and sold or delivered from any such facility to not more than three commercial  
83 or industrial purchasers or to a natural gas or electric public utility, municipal corporation or county as  
84 authorized by this section. If a purchaser of the landfill gas is located within the certificated service  
85 territory of a natural gas public utility or within an area in which a municipal corporation provides gas  
86 distribution service and the landfill gas is to be used in facilities constructed after January 1, 2000, such  
87 company shall submit to such public utility or municipal corporation a written offer for sale of that gas  
88 prior to offering the gas for sale or delivery to a commercial or industrial purchaser. If the public utility  
89 or municipal corporation does not agree within 60 days following the date of the offer to purchase such  
90 landfill gas on mutually satisfactory terms, then the company shall be authorized to sell such landfill  
91 gas, electricity, or both, to the commercial or industrial purchaser, utility, municipal corporation, or  
92 county. Such public utility may file for Commission approval a proposed tariff to reflect any anticipated  
93 or known changes in service to the purchaser as a result of the purchaser's use of the landfill gas. No  
94 such tariff shall impose on such purchaser of the landfill gas terms less favorable than those imposed on  
95 similarly situated customers with alternative fuel capabilities; provided, however, that such tariff may  
96 impose such requirements as are reasonably calculated to recover any cost of such service and to protect  
97 and ensure the safety and integrity of the public utility's facilities.

98 (9) A company that is not organized as a public service company pursuant to subsection D of  
99 § 13.1-620 and that sells and delivers propane air only to one or more public utilities. Any company  
100 excluded by this subdivision from the definition of "public utility" for the purposes of this chapter  
101 nevertheless shall be subject to the Commission's jurisdiction relating to gas pipeline safety and  
102 enforcement.

103 (10) *A company, other than an entity organized as a public service company, that provides*  
104 *non-utility gas service as defined in § 56-265.4:6.*

105 (c) "Commission" means the State Corporation Commission.

106 (d) "Geothermal resources" means those resources as defined in § 45.1-179.2.  
107 § 56-265.4:6. *Furnishing non-utility gas service.*

108 A. *In this section the following terms shall have the following meanings:*

109 "Affiliated interest" shall have the same meaning as set forth in § 56-76.

110 "Commercial customer" means any person that purchases non-utility gas service for its own  
111 consumption at one or more metering points or nonmetered points of delivery located in the  
112 Commonwealth and who if served by a natural gas utility would be classified as a non-residential  
113 customer under the applicable natural gas utility's tariff.

114 "Natural gas line" means a distribution or transmission pipeline owned and operated by the natural  
115 gas utility and subject to the jurisdiction of the Commission but excluding such lines that serve only a  
116 single residence or retail establishment.

117 "Natural gas utility" or "utility" means an investor-owned public service company engaged in the  
118 business of furnishing natural gas service to the public and which is regulated as to rates and service  
119 pursuant to this title.

120 "Non-utility gas service" means the sale and distribution of propane, propane-air mixtures, or other  
121 natural or manufactured gas to two or more customers by way of underground or aboveground

distribution lines by a person other than a natural gas utility.

"Non-utility gas service provider" means a person, other than a natural gas utility, providing non-utility gas service.

"Person" means any individual, corporation, partnership, association, company, business trust, joint venture or other private legal entity and the Commonwealth or any municipality.

"Pipeline safety standards" means all gas pipeline safety requirements established pursuant to § 56-257.2 .

"Residential customer" means any person that purchases non-utility gas service for its own consumption at one or more metering points or nonmetered points of delivery located in the Commonwealth and who if served by a natural gas utility would be classified as a residential customer under the applicable natural gas utility's tariff.

B. If a person, individually or together with its affiliated interests, other than the natural gas utility that holds the certificate to provide natural gas service in a particular territory desires to provide non-utility gas service to:

1. Two or more residential or commercial customers located one-half mile or less from any existing underground natural gas line operated by a utility under the jurisdiction of the Commission;

2. More than 10 residential or two commercial customers located more than one-half mile but within one mile or less from any existing underground natural gas line operated by a utility under the jurisdiction of the Commission;

3. More than 20 residential or five commercial customers located more than one mile but within three miles or less from any existing underground natural gas line operated by a utility under the jurisdiction of the Commission; or

4. More than 50 residential or 10 commercial customers located more than three miles but no more than five miles from an existing underground natural gas line operated by a utility under the jurisdiction of the Commission, such person shall apply to the Commission for approval to provide non-utility gas service. Approval of an application to provide non-utility gas service pursuant to this section shall be granted by the Commission only after opportunity for a hearing and after due notice to the natural gas utility that holds the certificate to provide service in the defined geographic area proposed to be served. The Commission shall approve an application to provide non-utility gas service upon finding: (i) that the natural gas utility that holds the certificate to provide natural gas service in the defined geographic area proposed to be served is not currently offering service to the area desired for non-utility gas service and is unable to extend natural gas utility service to the requested area within a reasonable period of time; and (ii) that the provision of non-utility gas service in the defined geographic area proposed to be served, and to the estimated number of customers defined in the application, is in the public interest.

Any order approving an application to provide non-utility gas service pursuant to this section shall define the geographic area to be covered and the maximum number of customers to whom the non-utility gas service provider can provide service before having to apply to the Commission for a revised order. The order approving an application to provide non-utility gas service shall also provide for compliance with all pipeline safety standards; however, nothing in the order shall authorize the Commission to exercise jurisdiction over the rates, charges, or services being offered in conjunction with non-utility gas service by a person other than an entity organized as a public service company. Further, except as provided in this section, approval of an application to provide non-utility gas service shall not infringe upon or diminish the rights of the natural gas utility that holds the certificate to provide natural gas service in the specified area.

C. A non-utility gas service provider shall comply with the provisions of subsection B if any proposed new customers (i) are located in or are adjacent to a residential subdivision, commercial or mixed-use development, currently being provided non-utility gas service by that non-utility gas service provider and (ii) the number of such new customers, when added to the number of then existing customers of such non-utility gas service provider, individually or together with its affiliated interests, located in the adjacent residential subdivision, commercial or mixed-use development, would exceed the threshold number of customers for any of the geographical areas described in subsection B.

D. In any instance in which customers proposed to be served by a non-utility gas service provider, individually or together with its affiliated interests, are (i) in the same residential subdivision, commercial or mixed-use development, or any phase thereof and (ii) such residential subdivision, commercial or mixed use development, including all parts and phases thereof, straddles any of the distance thresholds set forth in subsection B, all of the customers in all parts and phases of such residential subdivision, commercial or mixed-use development shall be deemed to be within the distance from the underground natural gas line operated by a utility under the jurisdiction of the Commission applicable to the customer located in such residential subdivision, commercial or mixed-use development which is located closest to such underground natural gas line operated by a utility under the jurisdiction

183 of the Commission.

184 E. The distance threshold set forth in subsection B shall be measured in a linear manner and shall  
185 be based upon the underground natural gas lines operated by a utility under the jurisdiction of the  
186 Commission that are in existence at the time the non-utility gas service provider applies for Commission  
187 approval pursuant to subsection B, if applicable, or at the time the non-utility gas service provider  
188 applies for the initial local government approval necessary to construct their distribution lines required  
189 to serve the proposed new customers, whichever is earlier.

190 F. All non-utility gas service providers shall provide notice to the Commission of any and all  
191 non-utility gas service which is subject to pipeline safety standards and is being provided to two or  
192 more customers in the Commonwealth and shall provide notice of the construction of new non-utility  
193 gas service to the Commission, no later than 30 days prior to commencing construction of such system.  
194 Any non-utility gas service provider that is required to provide such notice shall be subject to the  
195 jurisdiction of the Commission for the purpose of ensuring compliance with the pipeline safety  
196 standards. Upon request of the Commission, the non-utility gas service provider shall provide, within 30  
197 days of such request, documentation to show compliance with the requirements of the pipeline safety  
198 standards.

199 G. The Commission is authorized to promulgate any rules consistent with and necessary to  
200 implement this section.

201 § 56-265.10. Penalty for failure to comply with § 56-265.4:6 of the Code of Virginia.

202 Provision of non-utility gas service without gaining approval from the Commission pursuant to  
203 subsection B of § 56-265.4:6 shall be punishable by a penalty of up to \$500 per day to be imposed and  
204 collected by the Commission, in addition to any other non-monetary penalties provided by law.

205 2. That notwithstanding the provisions of subsection F of § 56-265.4:6 of the Code of Virginia, any  
206 person that owns or operates an existing system which is subject to pipeline safety standards and  
207 providing non-utility gas service as of the effective date of this act, wherever located in the  
208 Commonwealth, shall notify the State Corporation Commission, by July 1, 2010, as to the location  
209 of all facilities within the Commonwealth for the aboveground or underground storage,  
210 transmission, or distribution, otherwise than in enclosed portable containers, of propane,  
211 propane-air mixtures, or other natural or manufactured gas by way of underground distribution  
212 lines forming a part of such system including a description of the capacity, size, construction  
213 materials and any modifications necessary to bring the facilities into compliance with pipeline  
214 safety standards for all components of such systems.

215 3. That, notwithstanding the provisions of subsection F of § 56-265.4:6 of the Code of Virginia, any  
216 person that owns or operates an existing system providing non-utility gas service as of the effective  
217 date of this legislation, wherever located in the Commonwealth, shall fully comply with pipeline  
218 safety standards by January 1, 2011.

219 4. That any fully constructed and operational non-utility gas service system as of the effective date  
220 of this act shall be exempt from the requirements of subsection B of § 56-265.4:6 of the Code of  
221 Virginia.

222 5. That for purposes of subsection C of § 56-265.4:6 of the Code of Virginia, all customers of the  
223 non-utility gas service provider existing at the effective date of this act shall be included in  
224 determining the total number of customers served.

225 6. That an emergency exists and this act is in force from its passage.
