2009 SESSION

ENROLLED

1

VIRGINIA ACTS OF ASSEMBLY - CHAPTER

2 An Act to amend and reenact §§ 56-576, 56-585.1, and 56-585.3 of the Code of Virginia, relating to base rates of return for certain types of electrical generation.

4 5

6

9

10

Approved

Be it enacted by the General Assembly of Virginia:

7 1. That §§ 56-576, 56-585.1, and 56-585.3 of the Code of Virginia are amended and reenacted as follows:

§ 56-576. Definitions.

As used in this chapter:

11 "Affiliate" means any person that controls, is controlled by, or is under common control with an 12 electric utility.

13 "Aggregator" means a person that, as an agent or intermediary, (i) offers to purchase, or purchases, electric energy or (ii) offers to arrange for, or arranges for, the purchase of electric energy, for sale to, 14 15 or on behalf of, two or more retail customers not controlled by or under common control with such 16 person. The following activities shall not, in and of themselves, make a person an aggregator under this 17 chapter: (i) furnishing legal services to two or more retail customers, suppliers or aggregators; (ii) furnishing educational, informational, or analytical services to two or more retail customers, unless direct 18 19 or indirect compensation for such services is paid by an aggregator or supplier of electric energy; (iii) 20 furnishing educational, informational, or analytical services to two or more suppliers or aggregators; (iv) 21 providing default service under § 56-585; (v) engaging in activities of a retail electric energy supplier, 22 licensed pursuant to § 56-587, which are authorized by such supplier's license; and (vi) engaging in 23 actions of a retail customer, in common with one or more other such retail customers, to issue a request 24 for proposal or to negotiate a purchase of electric energy for consumption by such retail customers.

25 "Combined heat and power" means a method of using waste heat from electrical generation to offset
 26 traditional processes, space heating, air conditioning, or refrigeration.

27 "Commission" means the State Corporation Commission.

28 "Cooperative" means a utility formed under or subject to Chapter 9.1 (§ 56-231.15 et seq.) of this
29 title.

30 "Covered entity" means a provider in the Commonwealth of an electric service not subject to31 competition but shall not include default service providers.

"Covered transaction" means an acquisition, merger, or consolidation of, or other transaction
 involving stock, securities, voting interests or assets by which one or more persons obtains control of a
 covered entity.

35 "Curtailment" means inducing retail customers to reduce load during times of peak demand so as to 36 ease the burden on the electrical grid.

37 "Customer choice" means the opportunity for a retail customer in the Commonwealth to purchase38 electric energy from any supplier licensed and seeking to sell electric energy to that customer.

39 "Demand response" means measures aimed at shifting time of use of electricity from peak-use
 40 periods to times of lower demand by inducing retail customers to curtail electricity usage during periods
 41 of congestion and higher prices in the electrical grid.

"Distribute," "distributing," or "distribution of" electric energy means the transfer of electric energy through a retail distribution system to a retail customer.

"Distributor" means a person owning, controlling, or operating a retail distribution system to provideelectric energy directly to retail customers.

"Electric utility" means any person that generates, transmits, or distributes electric energy for use by
retail customers in the Commonwealth, including any investor-owned electric utility, cooperative electric
utility, or electric utility owned or operated by a municipality.

49 "Energy efficiency program" means a program that reduces the total amount of electricity that is 50 required for the same process or activity implemented after the expiration of capped rates. Energy efficiency programs include equipment, physical, or program change designed to produce measured and 51 verified reductions in the amount of electricity required to perform the same function and produce the 52 53 same or a similar outcome. Energy efficiency programs may include, but are not limited to, (i) 54 programs that result in improvements in lighting design, heating, ventilation, and air conditioning 55 systems, appliances, building envelopes, and industrial and commercial processes; and (ii) measures, 56 such as but not limited to the installation of advanced meters, implemented or installed by utilities, that

HB2506ER

[H 2506]

57 reduce fuel use or losses of electricity and otherwise improve internal operating efficiency in generation, 58 transmission, and distribution systems. Energy efficiency programs include demand response, combined 59 heat and power and waste heat recovery, curtailment, or other programs that are designed to reduce 60 electricity consumption so long as they reduce the total amount of electricity that is required for the 61 same process or activity. Utilities shall be authorized to install and operate such advanced metering 62 technology and equipment on a customer's premises; however, nothing in this chapter establishes a requirement that an energy efficiency program be implemented on a customer's premises and be 63 connected to a customer's wiring on the customer's side of the inter-connection without the customer's 64 65 expressed consent. "Generate," "generating," or "generation of" electric energy means the production of electric energy. "Generator" means a person owning, controlling, or operating a facility that produces electric energy 66 67 68 for sale. 69 "Incumbent electric utility" means each electric utility in the Commonwealth that, prior to July 1, 70 1999, supplied electric energy to retail customers located in an exclusive service territory established by 71 the Commission. 72 "Independent system operator" means a person that may receive or has received, by transfer pursuant 73 to this chapter, any ownership or control of, or any responsibility to operate, all or part of the 74 transmission systems in the Commonwealth. 75 "Measured and verified" means a process determined pursuant to methods accepted for use by utilities and industries to measure, verify, and validate energy savings and peak demand savings. This 76 77 may include the protocol established by the United States Department of Energy, Office of Federal Energy Management Programs, Measurement and Verification Guidance for Federal Energy Projects, 78 79 measurement and verification standards developed by the American Society of Heating, Refrigeration 80 and Air Conditioning Engineers (ASHRAE), or engineering-based estimates of energy and demand savings associated with specific energy efficiency measures, as determined by the Commission. 81 "Municipality" means a city, county, town, authority, or other political subdivision of the 82 83 Commonwealth. "Peak-shaving" means measures aimed solely at shifting time of use of electricity from peak-use 84 85 periods to times of lower demand by inducing retail customers to curtail electricity usage during periods 86 of congestion and higher prices in the electrical grid. "Person" means any individual, corporation, partnership, association, company, business, trust, joint 87 88 venture, or other private legal entity, and the Commonwealth or any municipality. "Renewable energy" means energy derived from sunlight, wind, falling water, sustainable biomass, 89 90 energy from waste, municipal solid waste, wave motion, tides, and geothermal power, and does not 91 include energy derived from coal, oil, natural gas or nuclear power. 92 "Retail customer" means any person that purchases retail electric energy for its own consumption at one or more metering points or nonmetered points of delivery located in the Commonwealth. 93 "Retail electric energy" means electric energy sold for ultimate consumption to a retail customer. 94 "Revenue reductions related to energy efficiency programs" means reductions in the collection of total non-fuel revenues, previously authorized by the Commission to be recovered from customers by a 95 96 97 utility, that occur due to measured and verified decreased consumption of electricity caused by energy 98 efficiency programs approved by the Commission and implemented by the utility, less the amount by 99 which such non-fuel reductions in total revenues have been mitigated through other program-related 100 factors, including reductions in variable operating expenses. "Supplier" means any generator, distributor, aggregator, broker, marketer, or other person who offers 101 102 to sell or sells electric energy to retail customers and is licensed by the Commission to do so, but it 103 does not mean a generator that produces electric energy exclusively for its own consumption or the 104 consumption of an affiliate. "Supply" or "supplying" electric energy means the sale of or the offer to sell electric energy to a 105 106 retail customer. 107 "Transmission of," "transmit," or "transmitting" electric energy means the transfer of electric energy 108 through the Commonwealth's interconnected transmission grid from a generator to either a distributor or 109 a retail customer. 110 "Transmission system" means those facilities and equipment that are required to provide for the transmission of electric energy. 111 § 56-585.1. Generation, distribution, and transmission rates after capped rates terminate or expire. 112 A. During the first six months of 2009, the Commission shall, after notice and opportunity for 113 114 hearing, initiate proceedings to review the rates, terms and conditions for the provision of generation, 115 distribution and transmission services of each investor-owned incumbent electric utility. Such proceedings shall be governed by the provisions of Chapter 10 (§ 56-232 et seq.) of this title, except as 116

117 modified herein. In such proceedings the Commission shall determine fair rates of return on common

118 equity applicable to the generation and distribution services of the utility. In so doing, the Commission 119 may use any methodology to determine such return it finds consistent with the public interest, but such 120 return shall not be set lower than the average of the returns on common equity reported to the Securities and Exchange Commission for the three most recent annual periods for which such data are available by 121 122 not less than a majority, selected by the Commission as specified in subdivision 2 b, of other 123 investor-owned electric utilities in the peer group of the utility, nor shall the Commission set such return 124 more than 300 basis points higher than such average. The peer group of the utility shall be determined 125 in the manner prescribed in subdivision 2 b. The Commission may increase or decrease such combined 126 rate of return by up to 100 basis points based on the generating plant performance, customer service, and operating efficiency of a utility, as compared to nationally recognized standards determined by the 127 128 Commission to be appropriate for such purposes. In such a proceeding, the Commission shall determine 129 the rates that the utility may charge until such rates are adjusted. If the Commission finds that the 130 utility's combined rate of return on common equity is more than 50 basis points below the combined 131 rate of return as so determined, it shall be authorized to order increases to the utility's rates necessary to 132 provide the opportunity to fully recover the costs of providing the utility's services and to earn not less 133 than such combined rate of return. If the Commission finds that the utility's combined rate of return on 134 common equity is more than 50 basis points above the combined rate of return as so determined, it shall 135 be authorized either (i) to order reductions to the utility's rates it finds appropriate, provided that the 136 Commission may not order such rate reduction unless it finds that the resulting rates will provide the 137 utility with the opportunity to fully recover its costs of providing its services and to earn not less than 138 the fair rates of return on common equity applicable to the generation and distribution services; or (ii) 139 direct that 60 percent of the amount of the utility's earnings that were more than 50 basis points above 140 the fair combined rate of return for calendar year 2008 be credited to customers' bills, in which event such credits shall be amortized over a period of six to 12 months, as determined at the discretion of the 141 142 Commission, following the effective date of the Commission's order and be allocated among customer 143 classes such that the relationship between the specific customer class rates of return to the overall target 144 rate of return will have the same relationship as the last approved allocation of revenues used to design 145 base rates. Commencing in 2011, the Commission, after notice and opportunity for hearing, shall 146 conduct biennial reviews of the rates, terms and conditions for the provision of generation, distribution 147 and transmission services by each investor-owned incumbent electric utility, subject to the following 148 provisions:

149 1. Rates, terms and conditions for each service shall be reviewed separately on an unbundled basis, 150 and such reviews shall be conducted in a single, combined proceeding. The first such review shall 151 utilize the two successive 12-month test periods ending December 31, 2010. However, the Commission 152 may, in its discretion, elect to stagger its biennial reviews of utilities by utilizing the two successive 153 12-month test periods ending December 31, 2010, for a Phase I Utility, and utilizing the two successive 12-month test periods ending December 31, 2011, for a Phase II Utility, with subsequent proceedings 154 155 utilizing the two successive 12-month test periods ending December 31 immediately preceding the year in which such proceeding is conducted. For purposes of this section, a Phase I Utility is an 156 157 investor-owned incumbent electric utility that was, as of July 1, 1999, not bound by a rate case 158 settlement adopted by the Commission that extended in its application beyond January 1, 2002, and a 159 Phase II Utility is an investor-owned incumbent electric utility that was bound by such a settlement.

160 2. Subject to the provisions of subdivision 6, fair rates of return on common equity applicable
161 separately to the generation and distribution services of such utility, and for the two such services
162 combined, shall be determined by the Commission during each such biennial review, as follows:

a. The Commission may use any methodology to determine such return it finds consistent with the
public interest, but such return shall not be set lower than the average of the returns on common equity
reported to the Securities and Exchange Commission for the three most recent annual periods for which
such data are available by not less than a majority, selected by the Commission as specified in
subdivision 2 b, of other investor-owned electric utilities in the peer group of the utility subject to such
biennial review, nor shall the Commission set such return more than 300 basis points higher than such
a. The Commission average.

170 b. In selecting such majority of peer group investor-owned electric utilities, the Commission shall 171 first remove from such group the two utilities within such group that have the lowest reported returns of 172 the group, as well as the two utilities within such group that have the highest reported returns of the 173 group, and the Commission shall then select a majority of the utilities remaining in such peer group. In 174 its final order regarding such biennial review, the Commission shall identify the utilities in such peer 175 group it selected for the calculation of such limitation. For purposes of this subdivision, an 176 investor-owned electric utility shall be deemed part of such peer group if (i) its principal operations are 177 conducted in the southeastern United States east of the Mississippi River in either the states of West Virginia or Kentucky or in those states south of Virginia, excluding the state of Tennessee, (ii) it is a 178

vertically-integrated electric utility providing generation, transmission and distribution services whose
facilities and operations are subject to state public utility regulation in the state where its principal
operations are conducted, (iii) it had a long-term bond rating assigned by Moody's Investors Service of
at least Baa at the end of the most recent test period subject to such biennial review, and (iv) it is not
an affiliate of the utility subject to such biennial review.

c. The Commission may increase or decrease such combined rate of return by up to 100 basis points
based on the generating plant performance, customer service, and operating efficiency of a utility, as
compared to nationally recognized standards determined by the Commission to be appropriate for such
purposes, such action being referred to in this section as a Performance Incentive. If the Commission
adopts such Performance Incentive, it shall remain in effect without change until the next biennial
review for such utility is concluded and shall not be modified pursuant to any provision of the
remainder of this subsection.

191 d. In any Current Proceeding, the Commission shall determine whether the Current Return has 192 increased, on a percentage basis, above the Initial Return by more than the increase, expressed as a 193 percentage, in the United States Average Consumer Price Index for all items, all urban consumers 194 (CPI-U), as published by the Bureau of Labor Statistics of the United States Department of Labor, since 195 the date on which the Commission determined the Initial Return. If so, the Commission may conduct an 196 additional analysis of whether it is in the public interest to utilize such Current Return for the Current 197 Proceeding then pending. A finding of whether the Current Return justifies such additional analysis shall 198 be made without regard to any Performance Incentive adopted by the Commission, or any enhanced rate of return on common equity awarded pursuant to the provisions of subdivision 6. Such additional 199 200 analysis shall include, but not be limited to, a consideration of overall economic conditions, the level of 201 interest rates and cost of capital with respect to business and industry, in general, as well as electric 202 utilities, the current level of inflation and the utility's cost of goods and services, the effect on the utility's ability to provide adequate service and to attract capital if less than the Current Return were 203 204 utilized for the Current Proceeding then pending, and such other factors as the Commission may deem 205 relevant. If, as a result of such analysis, the Commission finds that use of the Current Return for the 206 Current Proceeding then pending would not be in the public interest, then the lower limit imposed by 207 subdivision 2 a on the return to be determined by the Commission for such utility shall be calculated, 208 for that Current Proceeding only, by increasing the Initial Return by a percentage at least equal to the increase, expressed as a percentage, in the United States Average Consumer Price Index for all items, all 209 210 urban consumers (CPI-U), as published by the Bureau of Labor Statistics of the United States 211 Department of Labor, since the date on which the Commission determined the Initial Return. For 212 purposes of this subdivision:

213 "Current Proceeding" means any proceeding conducted under any provisions of this subsection that
214 require or authorize the Commission to determine a fair combined rate of return on common equity for
215 a utility and that will be concluded after the date on which the Commission determined the Initial
216 Return for such utility.

217 "Current Return" means the minimum fair combined rate of return on common equity required for218 any Current Proceeding by the limitation regarding a utility's peer group specified in subdivision 2 a.

219 "Initial Return" means the fair combined rate of return on common equity determined for such utility
220 by the Commission on the first occasion after July 1, 2009, under any provision of this subsection
221 pursuant to the provisions of subdivision 2 a.

e. In addition to other considerations, in setting the return on equity within the range allowed by this
section, the Commission shall strive to maintain costs of retail electric energy that are cost competitive
with costs of retail electric energy provided by the other peer group investor-owned electric utilities.

f. The determination of such returns, including the determination of whether to adopt a Performance
Incentive and the amount thereof, shall be made by the Commission on a stand-alone basis, and
specifically without regard to any return on common equity or other matters determined with regard to
facilities described in subdivision 6.

g. If the combined rate of return on common equity earned by both the generation and distribution
services is no more than 50 basis points above or below the return as so determined, such combined
return shall not be considered either excessive or insufficient, respectively.

h. Any amount of a utility's earnings directed by the Commission to be credited to customers' bills
 pursuant to this section shall not be considered for the purpose of determining the utility's earnings in
 any subsequent biennial review.

235 3. Each such utility shall make a biennial filing by March 31 of every other year, beginning in 2011,
236 consisting of the schedules contained in the Commission's rules governing utility rate increase
237 applications (20 VAC 5-200-30); however, if the Commission elects to stagger the dates of the biennial
238 reviews of utilities as provided in subdivision 1, then Phase I utilities shall commence biennial filings in
239 2011 and Phase II utilities shall commence biennial filings in 2012. Such filing shall encompass the two

HB2506ER

240 successive 12-month test periods ending December 31 immediately preceding the year in which such 241 proceeding is conducted, and in every such case the filing for each year shall be identified separately 242 and shall be segregated from any other year encompassed by the filing. If the Commission determines 243 that rates should be revised or credits be applied to customers' bills pursuant to subdivision 8 or 9, any 244 rate adjustment clauses previously implemented pursuant to subdivision 4 or 5 or those related to 245 facilities utilizing simple-cycle combustion turbines described in subdivision 6, shall be combined with 246 the utility's costs, revenues and investments until the amounts that are the subject of such rate 247 adjustment clauses are fully recovered. The Commission shall combine such clauses with the utility's 248 costs, revenues and investments only after it makes its initial determination with regard to necessary rate 249 revisions or credits to customers' bills, and the amounts thereof, but after such clauses are combined as 250 herein specified, they shall thereafter be considered part of the utility's costs, revenues, and investments 251 for the purposes of future biennial review proceedings.

252 4. The following costs incurred by the utility shall be deemed reasonable and prudent: (i) costs for 253 transmission services provided to the utility by the regional transmission entity of which the utility is a 254 member, as determined under applicable rates, terms and conditions approved by the Federal Energy 255 Regulatory Commission and (ii) costs charged to the utility that are associated with demand response 256 programs approved by the Federal Energy Regulatory Commission and administered by the regional 257 transmission entity of which the utility is a member. Upon petition of a utility at any time after the 258 expiration or termination of capped rates, but not more than once in any 12-month period, the 259 Commission shall approve a rate adjustment clause under which such costs, including, without 260 limitation, costs for transmission service, charges for new and existing transmission facilities, 261 administrative charges, and ancillary service charges designed to recover transmission costs, shall be 262 recovered on a timely and current basis from customers. Retail rates to recover these costs shall be 263 designed using the appropriate billing determinants in the retail rate schedules.

264 5. A utility may at any time, after the expiration or termination of capped rates, but not more than
265 once in any 12-month period, petition the Commission for approval of one or more rate adjustment
266 clauses for the timely and current recovery from customers of the following costs:

a. Incremental costs described in clause (vi) of subsection B of § 56-582 incurred between July 1, 2004, and the expiration or termination of capped rates, if such utility is, as of July 1, 2007, deferring such costs consistent with an order of the Commission entered under clause (vi) of subsection B of § 56-582. The Commission shall approve such a petition allowing the recovery of such costs that comply with the requirements of clause (vi) of subsection B of § 56-582;

b. Projected and actual costs of providing incentives for the utility to design and operate fair and
effective demand-management, conservation, energy efficiency, and load management peak-shaving
programs. The Commission shall approve such a petition if it finds that the program is in the public
interest and that the need for the incentives is demonstrated with reasonable certainty; provided that the
Commission shall allow the recovery of such costs as it finds are reasonable;

277 c. Projected and actual costs for the utility to design, implement, and operate energy efficiency 278 programs, including a margin to be recovered on operating expenses, which margin for the purposes of 279 this section shall be equal to the general rate of return on common equity determined as described in 280 subdivision A 2 of this section. The Commission shall only approve such a petition if it finds that the 281 program is in the public interest. As part of such cost recovery, the Commission, if requested by the 282 utility, shall allow for the recovery of revenue reductions related to energy efficiency programs. The 283 Commission shall only allow such recovery to the extent that the Commission determines such revenue 284 has not been recovered through margins from incremental off-system sales as defined in § 56-249.6 that 285 are directly attributable to energy efficiency programs.

None of the costs of new energy efficiency programs of an electric utility, including recovery of revenue reductions, shall be assigned to any customer that has a verifiable history of having used more than 10 megawatts of demand from a single meter of delivery. Nor shall any of the costs of new energy efficiency programs of an electric utility, including recovery of revenue reductions, be incurred by any large general service customer as defined herein that has notified the utility of non-participation in such energy efficiency program or programs. A large general service customer is a customer that has a verifiable history of having used more than 500 kilowatts of demand from a single meter of delivery.

293 Non-participation in energy efficiency programs shall be allowed by the Commission if the large general 294 service customer has, at the customer's own expense, implemented energy efficiency programs that have 295 produced or will produce measured and verified results consistent with industry standards and other 296 regulatory criteria stated in this section. The Commission shall, no later than November 15, 2009, 297 promulgate rules and regulations to accommodate the process under which such large general service 298 customers shall file notice for such an exemption and (i) establish the administrative procedures by which eligible customers will notify the utility and (ii) define the standard criteria that must be satisfied 299 300 by an applicant in order to notify the utility. In promulgating such rules and regulations, the

301 Commission may also specify the timing as to when a utility shall accept and act on such notice, taking 302 into consideration the utility's integrated resource planning process as well as its administration of 303 energy efficiency programs that are approved for cost recovery by the Commission. The notice of 304 non-participation by a large general service customer, to be given by March 1 of a given year, shall be 305 for the duration of the service life of the customer's energy efficiency program. The Commission on its 306 own motion may initiate steps necessary to verify such non-participants' achievement of energy efficiency 307 if the Commission has a body of evidence that the non-participant has knowingly misrepresented its 308 energy efficiency achievement. A utility shall not charge such large general service customer, as defined 309 by the Commission, for the costs of installing energy efficiency equipment beyond what is required to 310 provide electric service and meter such service on the customer's premises if the customer provides, at 311 the customer's expense, equivalent energy efficiency equipment. In all relevant proceedings pursuant to 312 this section, the Commission shall take into consideration the goal of economic development in the 313 *Commonwealth.*

d. Projected and actual costs of participation in a renewable energy portfolio standard program
pursuant to § 56-585.2 that are not recoverable under subdivision 6. The Commission shall approve such
a petition allowing the recovery of such costs as are provided for in a program approved pursuant to
§ 56-585.2; and

318 \mathbf{d} e. Projected and actual costs of projects that the Commission finds to be necessary to comply with 319 state or federal environmental laws or regulations applicable to generation facilities used to serve the 320 utility's native load obligations. The Commission shall approve such a petition if it finds that such costs 321 are necessary to comply with such environmental laws or regulations. If the Commission determines it 322 would be just, reasonable, and in the public interest, the Commission may include the enhanced rate of 323 return on common equity prescribed in subdivision 6 in a rate adjustment clause approved hereunder for 324 a project whose purpose is to reduce the need for construction of new generation facilities by enabling 325 the continued operation of existing generation facilities. In the event the Commission includes such 326 enhanced return in such rate adjustment clause, the project that is the subject of such clause shall be 327 treated as a facility described in subdivision 6 for the purposes of this section.

328 The Commission shall have the authority to determine the duration or amortization period for any 329 adjustment clause approved under this subdivision.

330 6. To ensure a reliable and adequate supply of electricity, to meet the utility's projected native load 331 obligations and to promote economic development, a utility may at any time, after the expiration or termination of capped rates, petition the Commission for approval of a rate adjustment clause for 332 333 recovery on a timely and current basis from customers of the costs of (i) a coal-fueled generation 334 facility that utilizes Virginia coal and is located in the coalfield region of the Commonwealth, as 335 described in § 15.2-6002, regardless of whether such facility is located within or without the utility's 336 service territory, (ii) one or more other generation facilities, or (iii) one or more major unit modifications of generation facilities; however, such a petition concerning facilities described in clause 337 338 (ii) that utilize nuclear power, facilities described in clause (ii) that are coal-fueled and will be built by a 339 Phase I utility, or facilities described in clause (i) may also be filed before the expiration or termination 340 of capped rates. A utility that constructs any such facility shall have the right to recover the costs of the 341 facility, as accrued against income, through its rates, including projected construction work in progress, 342 and any associated allowance for funds used during construction, planning, development and 343 construction costs, life-cycle costs, and costs of infrastructure associated therewith, plus, as an incentive 344 to undertake such projects, an enhanced rate of return on common equity calculated as specified below. 345 The costs of the facility, other than return on projected construction work in progress and allowance for 346 funds used during construction, shall not be recovered prior to the date the facility begins commercial 347 operation. Such enhanced rate of return on common equity shall be applied to allowance for funds used 348 during construction and to construction work in progress during the construction phase of the facility and shall thereafter be applied to the entire facility during the first portion of the service life of the 349 350 facility. The first portion of the service life shall be as specified in the table below; however, the 351 Commission shall determine the duration of the first portion of the service life of any facility, within the 352 range specified in the table below, which determination shall be consistent with the public interest and 353 shall reflect the Commission's determinations regarding how critical the facility may be in meeting the 354 energy needs of the citizens of the Commonwealth and the risks involved in the development of the 355 facility. After the first portion of the service life of the facility is concluded, the utility's general rate of 356 return shall be applied to such facility for the remainder of its service life. As used herein, the service 357 life of the facility shall be deemed to begin on the date the facility begins commercial operation, and 358 such service life shall be deemed equal in years to the life of that facility as used to calculate the 359 utility's depreciation expense. Such enhanced rate of return on common equity shall be calculated by adding the basis points specified in the table below to the utility's general rate of return, and such 360 enhanced rate of return shall apply only to the facility that is the subject of such rate adjustment clause. 361

362 No change shall be made to any Performance Incentive previously adopted by the Commission in 363 implementing any rate of return under this subdivision. Allowance for funds used during construction 364 shall be calculated for any such facility utilizing the utility's actual capital structure and overall cost of capital, including an enhanced rate of return on common equity as determined pursuant to this 365 366 subdivision, until such construction work in progress is included in rates. The construction of any 367 facility described in clause (i) is in the public interest, and in determining whether to approve such 368 facility, the Commission shall liberally construe the provisions of this title. The basis points to be added 369 to the utility's general rate of return to calculate the enhanced rate of return on common equity, and the 370 first portion of that facility's service life to which such enhanced rate of return shall be applied, shall vary by type of facility, as specified in the following table: 371

372	Type of Generation Facility	Basis Points	First Portion of Service Life
373	Nuclear-powered	200	Between 12 and 25 years
374	Carbon capture compatible,		
375	clean-coal powered	200	Between 10 and 20 years
376	Renewable powered	200	Between 5 and 15 years
377	Conventional coal or combined	-	
378	cycle combustion turbine	100	Between 10 and 20 years

Generation facilities described in clause (ii) that utilize simple-cycle combustion turbines shall not
receive an enhanced rate of return on common equity as described herein, but instead shall receive the
utility's general rate of return during the construction phase of the facility and, thereafter, for the entire
service life of the facility.

For purposes of this subdivision, "general rate of return" means the fair combined rate of return on common equity as it is determined by the Commission from time to time for such utility pursuant to subdivision 2. In any proceeding under this subdivision conducted prior to the conclusion of the first biennial review for such utility, the Commission shall determine a general rate of return for such utility in the same manner as it would in a biennial review proceeding.

388 Notwithstanding any other provision of this subdivision, if the Commission finds during the biennial 389 review conducted for a Phase II utility in 2018 that such utility has not filed applications for all 390 necessary federal and state regulatory approvals to construct one or more nuclear-powered or coal-fueled 391 generation facilities that would add a total capacity of at least 1500 megawatts to the amount of the 392 utility's generating resources as such resources existed on July 1, 2007, or that, if all such approvals 393 have been received, that the utility has not made reasonable and good faith efforts to construct one or 394 more such facilities that will provide such additional total capacity within a reasonable time after 395 obtaining such approvals, then the Commission, if it finds it in the public interest, may reduce on a 396 prospective basis any enhanced rate of return on common equity previously applied to any such facility 397 to no less than the general rate of return for such utility and may apply no less than the utility's general 398 rate of return to any such facility for which the utility seeks approval in the future under this 399 subdivision.

400 7. Any petition filed pursuant to subdivision 4, 5, or 6 shall be considered by the Commission on a 401 stand-alone basis without regard to the other costs, revenues, investments, or earnings of the utility. Any 402 costs incurred by a utility prior to the filing of such petition, or during the consideration thereof by the 403 Commission, that are proposed for recovery in such petition and that are related to clause (a) of 404 subdivision 5, or that are related to facilities and projects described in clause (i) of subdivision 6, shall 405 be deferred on the books and records of the utility until the Commission's final order in the matter, or 406 until the implementation of any applicable approved rate adjustment clauses, whichever is later. Any costs prudently incurred on or after July 1, 2007, by a utility prior to the filing of such petition, or 407 during the consideration thereof by the Commission, that are proposed for recovery in such petition and 408 409 that are related to facilities and projects described in clause (ii) of subdivision 6 that utilize nuclear 410 power, or coal-fueled facilities and projects described in clause (ii) of subdivision 6 if such coal-fueled 411 facilities will be built by a Phase I Utility, shall be deferred on the books and records of the utility until 412 the Commission's final order in the matter, or until the implementation of any applicable approved rate 413 adjustment clauses, whichever is later. Any costs prudently incurred after the expiration or termination 414 of capped rates related to other matters described in subdivisions 4, 5 or 6 shall be deferred beginning 415 only upon the expiration or termination of capped rates, provided, however, that no provision of this act 416 shall affect the rights of any parties with respect to the rulings of the Federal Energy Regulatory Commission in PJM Interconnection LLC and Virginia Electric and Power Company, 109 F.E.R.C. P 417 418 61,012 (2004). The Commission's final order regarding any petition filed pursuant to subdivision 4, 5 or 6 shall be entered not more than three months, eight months, and nine months, respectively, after the 419 420 date of filing of such petition. If such petition is approved, the order shall direct that the applicable rate adjustment clause be applied to customers' bills not more than 60 days after the date of the order, or 421 422 upon the expiration or termination of capped rates, whichever is later.

423 8. If the Commission determines as a result of such biennial review that:

424 (i) The utility has, during the test period or periods under review, considered as a whole, earned 425 more than 50 basis points below a fair combined rate of return on both its generation and distribution services, as determined in subdivision 2, without regard to any return on common equity or other 426 427 matters determined with respect to facilities described in subdivision 6, the Commission shall order 428 increases to the utility's rates necessary to provide the opportunity to fully recover the costs of providing 429 the utility's services and to earn not less than such fair combined rate of return, using the most recently 430 ended 12-month test period as the basis for determining the amount of the rate increase necessary. 431 However, the Commission may not order such rate increase unless it finds that the resulting rates will 432 provide the utility with the opportunity to fully recover its costs of providing its services and to earn not 433 less than a fair combined rate of return on both its generation and distribution services, as determined in 434 subdivision 2, without regard to any return on common equity or other matters determined with respect to facilities described in subdivision 6, using the most recently ended 12-month test period as the basis 435 436 for determining the permissibility of any rate increase under the standards of this sentence, and the 437 amount thereof:

438 (ii) The utility has, during the test period or test periods under review, considered as a whole, earned 439 more than 50 basis points above a fair combined rate of return on both its generation and distribution 440 services, as determined in subdivision 2, without regard to any return on common equity or other 441 matters determined with respect to facilities described in subdivision 6, the Commission shall, subject to 442 the provisions of subdivision 9, direct that 60 percent of the amount of such earnings that were more 443 than 50 basis points above such fair combined rate of return for the test period or periods under review, 444 considered as a whole, shall be credited to customers' bills. Any such credits shall be amortized over a 445 period of six to 12 months, as determined at the discretion of the Commission, following the effective 446 date of the Commission's order, and shall be allocated among customer classes such that the relationship 447 between the specific customer class rates of return to the overall target rate of return will have the same 448 relationship as the last approved allocation of revenues used to design base rates; or

449 (iii) Such biennial review is the second consecutive biennial review in which the utility has, during 450 the test period or test periods under review, considered as a whole, earned more than 50 basis points 451 above a fair combined rate of return on both its generation and distribution services, as determined in 452 subdivision 2, without regard to any return on common equity or other matter determined with respect 453 to facilities described in subdivision 6, the Commission shall, subject to the provisions of subdivision 9 454 and in addition to the actions authorized in clause (ii) of this subdivision, also order reductions to the 455 utility's rates it finds appropriate. However, the Commission may not order such rate reduction unless it 456 finds that the resulting rates will provide the utility with the opportunity to fully recover its costs of 457 providing its services and to earn not less than a fair combined rate of return on both its generation and 458 distribution services, as determined in subdivision 2, without regard to any return on common equity or 459 other matters determined with respect to facilities described in subdivision 6, using the most recently 460 ended 12-month test period as the basis for determining the permissibility of any rate reduction under 461 the standards of this sentence, and the amount thereof.

462 The Commission's final order regarding such biennial review shall be entered not more than nine
463 months after the end of the test period, and any revisions in rates or credits so ordered shall take effect
464 not more than 60 days after the date of the order.

465 9. If, as a result of a biennial review required under this subsection and conducted with respect to 466 any test period or periods under review ending later than December 31, 2010 (or, if the Commission has 467 elected to stagger its biennial reviews of utilities as provided in subdivision 1, under review ending later 468 than December 31, 2010, for a Phase I Utility, or December 31, 2011, for a Phase II Utility), the 469 Commission finds, with respect to such test period or periods considered as a whole, that (i) any utility 470 has, during the test period or periods under review, considered as a whole, earned more than 50 basis 471 points above a fair combined rate of return on both its generation and distribution services, as 472 determined in subdivision 2, without regard to any return on common equity or other matters determined 473 with respect to facilities described in subdivision 6, and (ii) the total aggregate regulated rates of such 474 utility at the end of the most recently-ended 12-month test period exceeded the annual increases in the 475 United States Average Consumer Price Index for all items, all urban consumers (CPI-U), as published 476 by the Bureau of Labor Statistics of the United States Department of Labor, compounded annually, 477 when compared to the total aggregate regulated rates of such utility as determined pursuant to the 478 biennial review conducted for the base period, the Commission shall, unless it finds that such action is 479 not in the public interest or that the provisions of clauses (ii) and (iii) of subdivision 8 are more 480 consistent with the public interest, direct that any or all earnings for such test period or periods under 481 review, considered as a whole that were more than 50 basis points above such fair combined rate of return shall be credited to customers' bills, in lieu of the provisions of clauses (ii) and (iii) of 482 subdivision 8. Any such credits shall be amortized and allocated among customer classes in the manner 483

HB2506ER

9 of 10

484 provided by clause (ii) of subdivision 8. For purposes of this subdivision:

485 "Base period" means (i) the test period ending December 31, 2010 (or, if the Commission has elected 486 to stagger its biennial reviews of utilities as provided in subdivision 1, the test period ending December 487 31, 2010, for a Phase I Utility, or December 31, 2011, for a Phase II Utility), or (ii) the most recent test 488 period with respect to which credits have been applied to customers' bills under the provisions of this 489 subdivision, whichever is later.

490 "Total aggregate regulated rates" shall include: (i) fuel tariffs approved pursuant to § 56-249.6, except 491 for any increases in fuel tariffs deferred by the Commission for recovery in periods after December 31, 492 2010, pursuant to the provisions of clause (ii) of subsection C of § 56-249.6; (ii) rate adjustment clauses 493 implemented pursuant to subdivision 4 or 5; (iii) revisions to the utility's rates pursuant to clause (i) of 494 subdivision 8; (iv) revisions to the utility's rates pursuant to the Commission's rules governing utility rate 495 increase applications (20 VAC 5-200-30), as permitted by subsection B, occurring after July 1, 2009; 496 and (v) base rates in effect as of July 1, 2009.

497 10. For purposes of this section, the Commission shall regulate the rates, terms and conditions of any 498 utility subject to this section on a stand-alone basis utilizing the actual end-of-test period capital structure and cost of capital of such utility, unless the Commission finds that the debt to equity ratio of 499 500 such capital structure is unreasonable for such utility, in which case the Commission may utilize a debt 501 to equity ratio that it finds to be reasonable for such utility in determining any rate adjustment pursuant 502 to clauses (i) and (iii) of subdivision 8, and without regard to the cost of capital, capital structure, 503 revenues, expenses or investments of any other entity with which such utility may be affiliated. In 504 particular, and without limitation, the Commission shall determine the federal and state income tax costs 505 for any such utility that is part of a publicly traded, consolidated group as follows: (i) such utility's 506 apportioned state income tax costs shall be calculated according to the applicable statutory rate, as if the 507 utility had not filed a consolidated return with its affiliates, and (ii) such utility's federal income tax 508 costs shall be calculated according to the applicable federal income tax rate and shall exclude any 509 consolidated tax liability or benefit adjustments originating from any taxable income or loss of its 510 affiliates.

511 B. Nothing in this section shall preclude an investor-owned incumbent electric utility from applying 512 for an increase in rates pursuant to § 56-245 or the Commission's rules governing utility rate increase 513 applications (20 VAC 5-200-30); however, in any such filing, a fair rate of return on common equity 514 shall be determined pursuant to subdivision 2. Nothing in this section shall preclude such utility's 515 recovery of fuel and purchased power costs as provided in § 56-249.6.

516 C. Except as otherwise provided in this section, the Commission shall exercise authority over the 517 rates, terms and conditions of investor-owned incumbent electric utilities for the provision of generation, 518 transmission and distribution services to retail customers in the Commonwealth pursuant to the 519 provisions of Chapter 10 (§ 56-232 et seq.) of this title, including specifically § 56-235.2.

520 D. Nothing in this section shall preclude the Commission from determining, during any proceeding 521 authorized or required by this section, the reasonableness or prudence of any cost incurred or projected 522 to be incurred, by a utility in connection with the subject of the proceeding. A determination of the 523 Commission regarding the reasonableness or prudence of any such cost shall be consistent with the 524 Commission's authority to determine the reasonableness or prudence of costs in proceedings pursuant to 525 the provisions of Chapter 10 (§ 56-232 et seq.) of this title.

526 E. The Commission shall promulgate such rules and regulations as may be necessary to implement 527 the provisions of this section. 528

§ 56-585.3. Regulation of cooperative rates after rate caps.

529 After the expiration or termination of capped rates, the rates, terms and conditions of distribution 530 electric cooperatives subject to Article 1 (§ 56-231.15 et seq.) of Chapter 9.1 of this title shall be 531 regulated in accordance with the provisions of Chapters 9.1 (§ 56-231.15 et seq.) and 10 (§ 56-232 et 532 seq.) of this title, as modified by the following provisions:

533 1. Except for energy related cost (fuel cost), the Commission shall not require any cooperative to 534 adjust, modify, or revise its rates, by means of riders or otherwise, to reflect changes in wholesale power cost which occurred during the capped rate period, other than in a general rate proceeding. 535

536 2. Each cooperative may, without Commission approval or the requirement of any filing other than 537 as provided in this subdivision, upon an affirmative resolution of its board of directors, increase or 538 decrease all classes of its rates for distribution services at any time, provided, however, that such 539 adjustments will not effect a cumulative net increase or decrease in excess of 5 percent in such rates in 540 any three year period. Such adjustments will not affect or be limited by any existing fuel or wholesale 541 power cost adjustment provisions. The cooperative will promptly file any such revised rates with the 542 Commission for informational purposes.

543 3. Each cooperative may, without Commission approval, upon an affirmative resolution of its board 544 of directors, make any adjustment to its terms and conditions that does not affect the cooperative's

revenues from the distribution or supply of electric energy. In addition, a cooperative may make such adjustments to any pass-through of third-party service charges and fees, and to any fees, charges and deposits set out in Schedule F of such cooperative's Terms and Conditions filed as of January 1, 2007.
The cooperative will promptly file any such amended terms and conditions with the Commission for informational purposes.

550 4. A cooperative may, at any time after the expiration or termination of capped rates, petition the 551 Commission for approval of one or more rate adjustment clauses for the timely and current recovery 552 from customers of the costs described in subdivisions A 5 b and 4 e of § 56-585.1.

553 5. None of the adjustments described in subdivisions 2 through 4 will apply to the rates paid by any
customer that takes service by means of dedicated distribution facilities and had noncoincident peak
555 demand in excess of 90 megawatts in calendar year 2006.

556 Nothing in this section shall be deemed to grant to a cooperative any authority to amend or adjust
557 any terms and conditions of service or agreements regarding pole attachments or the use of the
558 cooperative's poles or conduits.

559 2. That each utility consumer services cooperative (cooperative) organized or operated pursuant to 560 Article 1 (§ 56-231.15 et seq.) of Chapter 9.1 of Title 56 of the Code of Virginia shall, on or before October 31, 2009, file with the State Corporation Commission (Commission) an assessment of the 561 562 statutory, regulatory, organizational, physical, contractual, financial, and market impediments to 563 cooperative implementation of initiatives relating to dynamic rates, standby rates, interruptible 564 rates, and rates for purchases of electricity generated from renewable sources. Each cooperative 565 shall conduct its assessment and submit such assessment individually, collectively with one or more 566 other cooperatives, or collectively through an association of cooperatives. The Commission shall review each assessment to evaluate its accuracy and completeness. On or before December 1, 567 568 2009, the Commission shall forward each assessment to the Governor and the General Assembly along with the Commission's evaluation of the accuracy and completeness of each report. 569

570 3. That the Office of the Attorney General, in consultation with the State Corporation Commission, shall prepare annual reports that quantify the separate and cumulative effects, upon 571 the rates for electric service charged to each class of customers of each investor-owned electric 572 utility, of the implementation of the provisions of the first enactment of this act, including but not 573 574 limited to the effects of the provisions adding or amending (i) subdivision A 5 b of § 56-585.1 of the Code of Virginia, (ii) the first two sentences of the first paragraph of subdivision A 5 c of 575 § 56-585.1, (iii) the third and fourth sentences of the first paragraph of subdivision A 5 c of 576 § 56-585.1, and (iv) the second paragraph of subdivision A 5 c of § 56-585.1. Such reports shall 577 578 also identify, and recommend appropriate corrective legislation to address, any issues pertaining to 579 the implementation of the provisions of the first enactment of this act that have produced results 580 that are not consistent with the public interest, as determined by the State Corporation Commission. The Office of the Attorney General shall submit such reports to the Governor and 581 General Assembly on or before November 1 of each year commencing in 2009. 582
