VIRGINIA ACTS OF ASSEMBLY — CHAPTER

An Act to amend and reenact § 32.1-229 of the Code of Virginia, relating to mammogram reports.

[S 544]

Approved

Be it enacted by the General Assembly of Virginia:

1. That § 32.1-229 of the Code of Virginia is amended and reenacted as follows:

§ 32.1-229. Powers and duties of the Board.

The Board shall:

1. Establish a program of effective regulation of sources of radiation for the protection of the public health and safety, including a program of education and technical assistance relating to radon that is targeted to those areas of the Commonwealth known to have high radon levels.

2. Establish a program to promote the orderly regulation of radiation within the Commonwealth, among the states and between the federal government and the Commonwealth and to facilitate intergovernmental cooperation with respect to use and regulation of sources of radiation to the end that duplication of regulation may be minimized.

3. Establish a program to permit maximum utilization of sources of radiation consistent with the public health and safety.

4. Promulgate regulations providing for (i) general or specific licenses to use, manufacture, produce, transfer, receive, acquire, own or possess quantities of, or devices or equipment utilizing, by-product, source, special nuclear materials, or other radioactive material occurring naturally or produced artificially, (ii) registration of the possession of a source of radiation and of information with respect thereto, and (iii) regulation of by-product, source and special nuclear material.

5. Encourage, participate in and conduct studies, investigations, training, research and demonstrations relating to control of sources of radiation.

6. Establish fee schedules for the licensure of radioactive materials.

7. Establish guidelines to require the licensed facilities or physicians' offices where mammography services are performed to offer to the patient, prior to departure, development of such films to ensure integrity and quality of the film. When film developing is not available or the patient chooses not to wait, the patient shall be notified within two business days if another mammogram is necessary. This requirement does not imply or require that a diagnostic opinion be made at the time of the mammogram. The interpreting physician may require that the mammogram be retaken if, in the opinion of the physician, the study is of inadequate quality. *Such guidelines shall also require the licensed facility or physician's office where mammography services are performed to (i) include information on breast density in mammogram letters sent to patients pursuant to regulations implementing the Mammography Quality Standards Act promulgated by the U.S. Food and Drug Administration, and (ii) include in letters sent to patients who have dense breast tissue, as determined by the interpreting physician based on standards promulgated by the American College of Radiology, the following notice:*

"YOUR MAMMOGRAM DEMONSTRATES THAT YOU MAY HAVE DENSE BREAST TISSUE, WHICH CAN HIDE CANCER OR OTHER ABNORMALITIES. A REPORT OF YOUR MAMMOGRAPHY RESULTS, WHICH CONTAINS INFORMATION ABOUT YOUR BREAST DENSITY, HAS BEEN SENT TO YOUR REFERRING PHYSICIAN'S OFFICE, AND YOU SHOULD CONTACT YOUR PHYSICIAN IF YOU HAVE ANY QUESTIONS OR CONCERNS ABOUT THIS REPORT."

8. Issue such orders or modifications thereof as may be necessary in connection with proceedings under this title.
