2014 SESSION

ENROLLED

[S 643]

1

VIRGINIA ACTS OF ASSEMBLY - CHAPTER

2 An Act to amend and reenact § 56-585.1 of the Code of Virginia, relating to electric utility regulation;
 3 recovery of costs of offshore wind facilities.

4 5

Approved

- 6 Be it enacted by the General Assembly of Virginia:
- 7 1. That § 56-585.1 of the Code of Virginia is amended and reenacted as follows:

8 § 56-585.1. Generation, distribution, and transmission rates after capped rates terminate or 9 expire.

10 A. During the first six months of 2009, the Commission shall, after notice and opportunity for hearing, initiate proceedings to review the rates, terms and conditions for the provision of generation, 11 distribution and transmission services of each investor-owned incumbent electric utility. Such proceedings shall be governed by the provisions of Chapter 10 (§ 56-232 et seq.), except as modified 12 13 herein. In such proceedings the Commission shall determine fair rates of return on common equity 14 15 applicable to the generation and distribution services of the utility. In so doing, the Commission may use any methodology to determine such return it finds consistent with the public interest, but such return 16 17 shall not be set lower than the average of the returns on common equity reported to the Securities and 18 Exchange Commission for the three most recent annual periods for which such data are available by not 19 less than a majority, selected by the Commission as specified in subdivision 2 b, of other 20 investor-owned electric utilities in the peer group of the utility, nor shall the Commission set such return 21 more than 300 basis points higher than such average. The peer group of the utility shall be determined in the manner prescribed in subdivision 2 b. The Commission may increase or decrease such combined 22 23 rate of return by up to 100 basis points based on the generating plant performance, customer service, 24 and operating efficiency of a utility, as compared to nationally recognized standards determined by the 25 Commission to be appropriate for such purposes. In such a proceeding, the Commission shall determine 26 the rates that the utility may charge until such rates are adjusted. If the Commission finds that the 27 utility's combined rate of return on common equity is more than 50 basis points below the combined 28 rate of return as so determined, it shall be authorized to order increases to the utility's rates necessary to 29 provide the opportunity to fully recover the costs of providing the utility's services and to earn not less 30 than such combined rate of return. If the Commission finds that the utility's combined rate of return on 31 common equity is more than 50 basis points above the combined rate of return as so determined, it shall 32 be authorized either (i) to order reductions to the utility's rates it finds appropriate, provided that the 33 Commission may not order such rate reduction unless it finds that the resulting rates will provide the 34 utility with the opportunity to fully recover its costs of providing its services and to earn not less than 35 the fair rates of return on common equity applicable to the generation and distribution services; or (ii) to direct that 60 percent of the amount of the utility's earnings that were more than 50 basis points above 36 37 the fair combined rate of return for calendar year 2008 be credited to customers' bills, in which event 38 such credits shall be amortized over a period of six to 12 months, as determined at the discretion of the 39 Commission, following the effective date of the Commission's order and be allocated among customer 40 classes such that the relationship between the specific customer class rates of return to the overall target 41 rate of return will have the same relationship as the last approved allocation of revenues used to design 42 base rates. Commencing in 2011, the Commission, after notice and opportunity for hearing, shall 43 conduct biennial reviews of the rates, terms and conditions for the provision of generation, distribution 44 and transmission services by each investor-owned incumbent electric utility, subject to the following 45 provisions:

46 1. Rates, terms and conditions for each service shall be reviewed separately on an unbundled basis, and such reviews shall be conducted in a single, combined proceeding. The first such review shall 47 utilize the two successive 12-month test periods ending December 31, 2010. However, the Commission 48 49 may, in its discretion, elect to stagger its biennial reviews of utilities by utilizing the two successive 50 12-month test periods ending December 31, 2010, for a Phase I Utility, and utilizing the two successive 12-month test periods ending December 31, 2011, for a Phase II Utility, with subsequent proceedings 51 utilizing the two successive 12-month test periods ending December 31 immediately preceding the year 52 53 in which such proceeding is conducted. For purposes of this section, a Phase I Utility is an 54 investor-owned incumbent electric utility that was, as of July 1, 1999, not bound by a rate case 55 settlement adopted by the Commission that extended in its application beyond January 1, 2002, and a 56 Phase II Utility is an investor-owned incumbent electric utility that was bound by such a settlement.

SB643ER

57 2. Subject to the provisions of subdivision 6, fair rates of return on common equity applicable
58 separately to the generation and distribution services of such utility, and for the two such services
59 combined, shall be determined by the Commission during each such biennial review, as follows:

a. The Commission may use any methodology to determine such return it finds consistent with the
public interest, but such return shall not be set lower than the average of the returns on common equity
reported to the Securities and Exchange Commission for the three most recent annual periods for which
such data are available by not less than a majority, selected by the Commission as specified in
subdivision 2 b, of other investor-owned electric utilities in the peer group of the utility subject to such
biennial review, nor shall the Commission set such return more than 300 basis points higher than such
average.

67 b. In selecting such majority of peer group investor-owned electric utilities, the Commission shall 68 first remove from such group the two utilities within such group that have the lowest reported returns of 69 the group, as well as the two utilities within such group that have the highest reported returns of the group, and the Commission shall then select a majority of the utilities remaining in such peer group. In 70 its final order regarding such biennial review, the Commission shall identify the utilities in such peer 71 group it selected for the calculation of such limitation. For purposes of this subdivision, an 72 73 investor-owned electric utility shall be deemed part of such peer group if (i) its principal operations are 74 conducted in the southeastern United States east of the Mississippi River in either the states of West 75 Virginia or Kentucky or in those states south of Virginia, excluding the state of Tennessee, (ii) it is a 76 vertically-integrated electric utility providing generation, transmission and distribution services whose 77 facilities and operations are subject to state public utility regulation in the state where its principal 78 operations are conducted, (iii) it had a long-term bond rating assigned by Moody's Investors Service of 79 at least Baa at the end of the most recent test period subject to such biennial review, and (iv) it is not an affiliate of the utility subject to such biennial review. 80

c. The Commission may, consistent with its precedent for incumbent electric utilities prior to the
enactment of Chapters 888 and 933 of the Acts of Assembly of 2007, increase or decrease the utility's
combined rate of return based on the Commission's consideration of the utility's performance.

d. In any Current Proceeding, the Commission shall determine whether the Current Return has 84 85 increased, on a percentage basis, above the Initial Return by more than the increase, expressed as a percentage, in the United States Average Consumer Price Index for all items, all urban consumers 86 (CPI-U), as published by the Bureau of Labor Statistics of the United States Department of Labor, since 87 88 the date on which the Commission determined the Initial Return. If so, the Commission may conduct an 89 additional analysis of whether it is in the public interest to utilize such Current Return for the Current 90 Proceeding then pending. A finding of whether the Current Return justifies such additional analysis shall 91 be made without regard to any enhanced rate of return on common equity awarded pursuant to the 92 provisions of subdivision 6. Such additional analysis shall include, but not be limited to, a consideration 93 of overall economic conditions, the level of interest rates and cost of capital with respect to business and 94 industry, in general, as well as electric utilities, the current level of inflation and the utility's cost of 95 goods and services, the effect on the utility's ability to provide adequate service and to attract capital if less than the Current Return were utilized for the Current Proceeding then pending, and such other 96 97 factors as the Commission may deem relevant. If, as a result of such analysis, the Commission finds that 98 use of the Current Return for the Current Proceeding then pending would not be in the public interest, 99 then the lower limit imposed by subdivision 2 a on the return to be determined by the Commission for 100 such utility shall be calculated, for that Current Proceeding only, by increasing the Initial Return by a 101 percentage at least equal to the increase, expressed as a percentage, in the United States Average 102 Consumer Price Index for all items, all urban consumers (CPI-U), as published by the Bureau of Labor 103 Statistics of the United States Department of Labor, since the date on which the Commission determined 104 the Initial Return. For purposes of this subdivision:

"Current Proceeding" means any proceeding conducted under any provisions of this subsection that
require or authorize the Commission to determine a fair combined rate of return on common equity for
a utility and that will be concluded after the date on which the Commission determined the Initial
Return for such utility.

"Current Return" means the minimum fair combined rate of return on common equity required forany Current Proceeding by the limitation regarding a utility's peer group specified in subdivision 2 a.

"Initial Return" means the fair combined rate of return on common equity determined for such utility
by the Commission on the first occasion after July 1, 2009, under any provision of this subsection
pursuant to the provisions of subdivision 2 a.

e. In addition to other considerations, in setting the return on equity within the range allowed by this
section, the Commission shall strive to maintain costs of retail electric energy that are cost competitive
with costs of retail electric energy provided by the other peer group investor-owned electric utilities.

117 f. The determination of such returns shall be made by the Commission on a stand-alone basis, and

118 specifically without regard to any return on common equity or other matters determined with regard to 119 facilities described in subdivision 6.

g. If the combined rate of return on common equity earned by the generation and distribution 120 121 services is no more than 50 basis points above or below the return as so determined or, for any test 122 period commencing after December 31, 2012, for a Phase II Utility and after December 31, 2013, for a 123 Phase I Utility, such return is no more than 70 basis points above or below the return as so determined, 124 such combined return shall not be considered either excessive or insufficient, respectively. However, for 125 any test period commencing after December 31, 2012, for a Phase II Utility, and after December 31, 126 2013, for a Phase I Utility, if the utility has, during the test period or periods under review, earned below the return as so determined, whether or not such combined return is within 70 basis points of the 127 128 return as so determined, the utility may petition the Commission for approval of an increase in rates in 129 accordance with the provisions of clause (i) of subdivision A 8 as if it had earned more than 70 basis 130 points below a fair combined rate of return, and such proceeding shall otherwise be conducted in 131 accordance with the provisions of this section.

h. Any amount of a utility's earnings directed by the Commission to be credited to customers' bills
 pursuant to this section shall not be considered for the purpose of determining the utility's earnings in
 any subsequent biennial review.

135 3. Each such utility shall make a biennial filing by March 31 of every other year, beginning in 2011, 136 consisting of the schedules contained in the Commission's rules governing utility rate increase 137 applications; however, if the Commission elects to stagger the dates of the biennial reviews of utilities 138 as provided in subdivision 1, then Phase I utilities shall commence biennial filings in 2011 and Phase II 139 utilities shall commence biennial filings in 2012. Such filing shall encompass the two successive 140 12-month test periods ending December 31 immediately preceding the year in which such proceeding is conducted, and in every such case the filing for each year shall be identified separately and shall be 141 segregated from any other year encompassed by the filing. If the Commission determines that rates 142 143 should be revised or credits be applied to customers' bills pursuant to subdivision 8 or 9, any rate 144 adjustment clauses previously implemented pursuant to subdivision 5 or those related to facilities 145 utilizing simple-cycle combustion turbines described in subdivision 6, shall be combined with the 146 utility's costs, revenues and investments until the amounts that are the subject of such rate adjustment 147 clauses are fully recovered. The Commission shall combine such clauses with the utility's costs, revenues 148 and investments only after it makes its initial determination with regard to necessary rate revisions or 149 credits to customers' bills, and the amounts thereof, but after such clauses are combined as herein 150 specified, they shall thereafter be considered part of the utility's costs, revenues, and investments for the 151 purposes of future biennial review proceedings. A Phase I utility shall delay for one year the filing of its 152 biennial review from March 31, 2013, to March 31, 2014, and shall not defer on its books for future 153 recovery any costs incurred during calendar year 2011, other than as provided in subdivision A 7 of this 154 section or § 56-249.6, and its subsequent biennial filing shall be made by March 31, 2016, and every 155 two years thereafter.

156 4. The following costs incurred by the utility shall be deemed reasonable and prudent: (i) costs for 157 transmission services provided to the utility by the regional transmission entity of which the utility is a 158 member, as determined under applicable rates, terms and conditions approved by the Federal Energy 159 Regulatory Commission, and (ii) costs charged to the utility that are associated with demand response 160 programs approved by the Federal Energy Regulatory Commission and administered by the regional 161 transmission entity of which the utility is a member. Upon petition of a utility at any time after the 162 expiration or termination of capped rates, but not more than once in any 12-month period, the Commission shall approve a rate adjustment clause under which such costs, including, without 163 164 limitation, costs for transmission service, charges for new and existing transmission facilities, 165 administrative charges, and ancillary service charges designed to recover transmission costs, shall be recovered on a timely and current basis from customers. Retail rates to recover these costs shall be 166 167 designed using the appropriate billing determinants in the retail rate schedules.

168 5. A utility may at any time, after the expiration or termination of capped rates, but not more than
169 once in any 12-month period, petition the Commission for approval of one or more rate adjustment
170 clauses for the timely and current recovery from customers of the following costs:

a. Incremental costs described in clause (vi) of subsection B of § 56-582 incurred between July 1,
2004, and the expiration or termination of capped rates, if such utility is, as of July 1, 2007, deferring
such costs consistent with an order of the Commission entered under clause (vi) of subsection B of
§ 56-582. The Commission shall approve such a petition allowing the recovery of such costs that
comply with the requirements of clause (vi) of subsection B of § 56-582;

b. Projected and actual costs for the utility to design and operate fair and effective peak-shaving
programs. The Commission shall approve such a petition if it finds that the program is in the public
interest; provided that the Commission shall allow the recovery of such costs as it finds are reasonable;

179 c. Projected and actual costs for the utility to design, implement, and operate energy efficiency 180 programs, including a margin to be recovered on operating expenses, which margin for the purposes of 181 this section shall be equal to the general rate of return on common equity determined as described in 182 subdivision A 2 of this section. The Commission shall only approve such a petition if it finds that the 183 program is in the public interest. As part of such cost recovery, the Commission, if requested by the 184 utility, shall allow for the recovery of revenue reductions related to energy efficiency programs. The 185 Commission shall only allow such recovery to the extent that the Commission determines such revenue has not been recovered through margins from incremental off-system sales as defined in § 56-249.6 that 186 187 are directly attributable to energy efficiency programs.

188 None of the costs of new energy efficiency programs of an electric utility, including recovery of 189 revenue reductions, shall be assigned to any customer that has a verifiable history of having used more 190 than 10 megawatts of demand from a single meter of delivery. Nor shall any of the costs of new energy 191 efficiency programs of an electric utility, including recovery of revenue reductions, be incurred by any 192 large general service customer as defined herein that has notified the utility of non-participation in such 193 energy efficiency program or programs. A large general service customer is a customer that has a verifiable history of having used more than 500 kilowatts of demand from a single meter of delivery. 194 195 Non-participation in energy efficiency programs shall be allowed by the Commission if the large general 196 service customer has, at the customer's own expense, implemented energy efficiency programs that have 197 produced or will produce measured and verified results consistent with industry standards and other 198 regulatory criteria stated in this section. The Commission shall, no later than November 15, 2009, 199 promulgate rules and regulations to accommodate the process under which such large general service 200 customers shall file notice for such an exemption and (i) establish the administrative procedures by 201 which eligible customers will notify the utility and (ii) define the standard criteria that must be satisfied 202 by an applicant in order to notify the utility. In promulgating such rules and regulations, the 203 Commission may also specify the timing as to when a utility shall accept and act on such notice, taking 204 into consideration the utility's integrated resource planning process as well as its administration of energy efficiency programs that are approved for cost recovery by the Commission. The notice of 205 206 non-participation by a large general service customer, to be given by March 1 of a given year, shall be 207 for the duration of the service life of the customer's energy efficiency program. The Commission on its 208 own motion may initiate steps necessary to verify such non-participants' achievement of energy 209 efficiency if the Commission has a body of evidence that the non-participant has knowingly misrepresented its energy efficiency achievement. A utility shall not charge such large general service 210 211 customer, as defined by the Commission, for the costs of installing energy efficiency equipment beyond 212 what is required to provide electric service and meter such service on the customer's premises if the 213 customer provides, at the customer's expense, equivalent energy efficiency equipment. In all relevant 214 proceedings pursuant to this section, the Commission shall take into consideration the goals of economic 215 development, energy efficiency and environmental protection in the Commonwealth;

d. Projected and actual costs of participation in a renewable energy portfolio standard program
pursuant to § 56-585.2 that are not recoverable under subdivision 6. The Commission shall approve such
a petition allowing the recovery of such costs as are provided for in a program approved pursuant to
§ 56-585.2; and

e. Projected and actual costs of projects that the Commission finds to be necessary to comply with
state or federal environmental laws or regulations applicable to generation facilities used to serve the
utility's native load obligations. The Commission shall approve such a petition if it finds that such costs
are necessary to comply with such environmental laws or regulations.

The Commission shall have the authority to determine the duration or amortization period for any adjustment clause approved under this subdivision.

226 6. To ensure a reliable and adequate supply of electricity, to meet the utility's projected native load 227 obligations and to promote economic development, a utility may at any time, after the expiration or 228 termination of capped rates, petition the Commission for approval of a rate adjustment clause for 229 recovery on a timely and current basis from customers of the costs of (i) a coal-fueled generation 230 facility that utilizes Virginia coal and is located in the coalfield region of the Commonwealth, as 231 described in § 15.2-6002, regardless of whether such facility is located within or without the utility's 232 service territory, (ii) one or more other generation facilities, or (iii) one or more major unit 233 modifications of generation facilities; however, such a petition concerning facilities described in clause 234 (ii) that utilize nuclear power, facilities described in clause (ii) that are coal-fueled and will be built by a 235 Phase I utility, or facilities described in clause (i) may also be filed before the expiration or termination 236 of capped rates. A utility that constructs any such facility shall have the right to recover the costs of the 237 facility, as accrued against income, through its rates, including projected construction work in progress, 238 and any associated allowance for funds used during construction, planning, development and 239 construction costs, life-cycle costs, and costs of infrastructure associated therewith, plus, as an incentive

ENROLLED

SB643ER

240 to undertake such projects, an enhanced rate of return on common equity calculated as specified below. 241 A utility seeking approval to construct a generating facility shall demonstrate that it has considered and 242 weighed alternative options, including third-party market alternatives, in its selection process. The costs 243 of the facility, other than return on projected construction work in progress and allowance for funds 244 used during construction, shall not be recovered prior to the date the facility begins commercial 245 operation. Such enhanced rate of return on common equity shall be applied to allowance for funds used 246 during construction and to construction work in progress during the construction phase of the facility 247 and shall thereafter be applied to the entire facility during the first portion of the service life of the 248 facility. The first portion of the service life shall be as specified in the table below; however, the 249 Commission shall determine the duration of the first portion of the service life of any facility, within the 250 range specified in the table below, which determination shall be consistent with the public interest and 251 shall reflect the Commission's determinations regarding how critical the facility may be in meeting the 252 energy needs of the citizens of the Commonwealth and the risks involved in the development of the 253 facility. After the first portion of the service life of the facility is concluded, the utility's general rate of 254 return shall be applied to such facility for the remainder of its service life. As used herein, the service 255 life of the facility shall be deemed to begin on the date the facility begins commercial operation, and 256 such service life shall be deemed equal in years to the life of that facility as used to calculate the 257 utility's depreciation expense. Such enhanced rate of return on common equity shall be calculated by 258 adding the basis points specified in the table below to the utility's general rate of return, and such 259 enhanced rate of return shall apply only to the facility that is the subject of such rate adjustment clause. 260 Allowance for funds used during construction shall be calculated for any such facility utilizing the 261 utility's actual capital structure and overall cost of capital, including an enhanced rate of return on 262 common equity as determined pursuant to this subdivision, until such construction work in progress is included in rates. The construction of any facility described in clause (i) is in the public interest, and in 263 264 determining whether to approve such facility, the Commission shall liberally construe the provisions of this title. The basis points to be added to the utility's general rate of return to calculate the enhanced rate 265 of return on common equity, and the first portion of that facility's service life to which such enhanced 266 rate of return shall be applied, shall vary by type of facility, as specified in the following table: 267 268 Type of Generation Facility Basis Points First Portion of Service Life

269			
270	Nuclear-powered	200	Between 12 and 25 years
271			
272	Carbon capture compatible,	200	Between 10 and 20 years
273	clean-coal powered		
274			
275	Renewable powered, other than	200	Between 5 and 15 years
276	landfill gas powered		
277			
278	Coalbed methane gas powered	150	Between 5 and 15 years
279			
280	Landfill gas powered	200	Between 5 and 15 years
281			_
282	Conventional coal or	100	Between 10 and 20 years
283	combined-cycle combustion		
284	turbine		

284 turbine

260

For generating facilities other than those utilizing nuclear power or those utilizing energy derived from offshore wind, as of July 1, 2013, only those facilities as to which a rate adjustment clause under this subdivision has been previously approved by the Commission, or as to which a petition for approval of such rate adjustment clause was filed with the Commission, on or before January 1, 2013, shall be entitled to the enhanced rate of return on common equity as specified in the above table during the construction phase of the facility and the approved first portion of its service life.

291 For generating facilities within the Commonwealth utilizing nuclear power or those utilizing energy 292 derived from offshore wind projects located in waters off the Commonwealth's Atlantic shoreline, such 293 facilities shall continue to be eligible for an enhanced rate of return on common equity during the 294 construction phase of the facility and the approved first portion of its service life of between 12 and 25 295 years in the case of a facility utilizing nuclear power and for a service life of between 5 and 15 years in 296 the case of a facility utilizing energy derived from offshore wind, provided, however, that, as of July 1, 297 2013, the enhanced return for such facilities shall be 100 basis points, which shall be added to the utility's general rate of return as determined under subdivision 2. Thirty percent of all costs of such a 298 299 facility utilizing energy derived from offshore wind that the utility incurred between July 1, 2007, and

300 December 31, 2013, and all of such costs incurred after December 31, 2013, may be deferred by the 301 utility and recovered through a rate adjustment clause under this subdivision at such time as the 302 Commission provides in an order approving such a rate adjustment clause. The remaining 70 percent of 303 all costs of such a facility that the utility incurred between July 1, 2007, and December 31, 2013, shall 304 not be deferred for recovery through a rate adjustment clause under this subdivision; however, such 305 remaining 70 percent of all costs shall be recovered ratably through existing base rates as determined 306 by the Commission in the test periods under review in the utility's next biennial review filed after July 1, 307 2014.

308 In connection with planning to meet forecasted demand for electric generation supply and assure the
309 adequate and sufficient reliability of service, consistent with § 56-598, planning and development
310 activities for a new generating facility or facilities utilizing energy derived from offshore wind are in the
311 public interest.

312 Generation facilities described in clause (ii) that utilize simple-cycle combustion turbines shall not 313 receive an enhanced rate of return on common equity as described herein, but instead shall receive the 314 utility's general rate of return during the construction phase of the facility and, thereafter, for the entire 315 service life of the facility.

316 As used in this subdivision, a generation facility is (a) "coalbed methane gas powered" if the facility 317 is fired at least 50 percent by coalbed methane gas, as such term is defined in § 45.1-361.1, produced 318 from wells located in the Commonwealth, and (b) "landfill gas powered" if the facility is fired by 319 methane or other combustible gas produced by the anaerobic digestion or decomposition of 320 biodegradable materials in a solid waste management facility licensed by the Waste Management Board. 321 A landfill gas powered facility includes, in addition to the generation facility itself, the equipment used 322 in collecting, drying, treating, and compressing the landfill gas and in transmitting the landfill gas from 323 the solid waste management facility where it is collected to the generation facility where it is 324 combusted.

For purposes of this subdivision, "general rate of return" means the fair combined rate of return on
common equity as it is determined by the Commission from time to time for such utility pursuant to
subdivision 2. In any proceeding under this subdivision conducted prior to the conclusion of the first
biennial review for such utility, the Commission shall determine a general rate of return for such utility
in the same manner as it would in a biennial review proceeding.

330 Notwithstanding any other provision of this subdivision, if the Commission finds during the biennial 331 review conducted for a Phase II utility in 2018 that such utility has not filed applications for all 332 necessary federal and state regulatory approvals to construct one or more nuclear-powered or coal-fueled 333 generation facilities that would add a total capacity of at least 1500 megawatts to the amount of the 334 utility's generating resources as such resources existed on July 1, 2007, or that, if all such approvals 335 have been received, that the utility has not made reasonable and good faith efforts to construct one or 336 more such facilities that will provide such additional total capacity within a reasonable time after 337 obtaining such approvals, then the Commission, if it finds it in the public interest, may reduce on a 338 prospective basis any enhanced rate of return on common equity previously applied to any such facility 339 to no less than the general rate of return for such utility and may apply no less than the utility's general 340 rate of return to any such facility for which the utility seeks approval in the future under this 341 subdivision.

342 7. Any petition filed pursuant to subdivision 4, 5, or 6 shall be considered by the Commission on a 343 stand-alone basis without regard to the other costs, revenues, investments, or earnings of the utility. Any 344 costs incurred by a utility prior to the filing of such petition, or during the consideration thereof by the 345 Commission, that are proposed for recovery in such petition and that are related to clause (a) of 346 subdivision 5, or that are related to facilities and projects described in clause (i) of subdivision 6, shall 347 be deferred on the books and records of the utility until the Commission's final order in the matter, or 348 until the implementation of any applicable approved rate adjustment clauses, whichever is later. Any 349 *Except as otherwise provided in subdivision 6, any* costs prudently incurred on or after July 1, 2007, by 350 a utility prior to the filing of such petition, or during the consideration thereof by the Commission, that 351 are proposed for recovery in such petition and that are related to facilities and projects described in 352 clause (ii) of subdivision 6 that utilize nuclear power, or coal-fueled facilities and projects described in 353 clause (ii) of subdivision 6 if such coal-fueled facilities will be built by a Phase I Utility, shall be 354 deferred on the books and records of the utility until the Commission's final order in the matter, or until 355 the implementation of any applicable approved rate adjustment clauses, whichever is later. Any costs 356 prudently incurred after the expiration or termination of capped rates related to other matters described 357 in subdivisions 4, 5, or 6 shall be deferred beginning only upon the expiration or termination of capped 358 rates, provided, however, that no provision of this act shall affect the rights of any parties with respect 359 to the rulings of the Federal Energy Regulatory Commission in PJM Interconnection LLC and Virginia Electric and Power Company, 109 F.E.R.C. P 61,012 (2004). The Commission's final order regarding 360

SB643ER

any petition filed pursuant to subdivision 4, 5, or 6 shall be entered not more than three months, eight months, and nine months, respectively, after the date of filing of such petition. If such petition is approved, the order shall direct that the applicable rate adjustment clause be applied to customers' bills not more than 60 days after the date of the order, or upon the expiration or termination of capped rates, whichever is later.

366 8. In any biennial review proceeding, the following utility generation and distribution costs not 367 proposed for recovery under any other subdivision of this subsection, as recorded per books by the 368 utility for financial reporting purposes and accrued against income, shall be attributed to the test periods 369 under review: costs associated with asset impairments related to early retirement determinations made by the utility prior to December 31, 2012, for utility generation plant; costs associated with severe weather 370 371 events; and costs associated with natural disasters. Such costs shall be deemed to have been recovered 372 from customers through rates for generation and distribution services in effect during the test periods 373 under review unless such costs, individually or in the aggregate, together with the utility's other costs, 374 revenues, and investments to be recovered through rates for generation and distribution services, result in 375 the utility's earned return on its generation and distribution services for the combined test periods under 376 review to fall more than 50 basis points below the fair combined rate of return authorized under 377 subdivision 2 for such periods or, for any test period commencing after December 31, 2012, for a Phase 378 II Utility and after December 31, 2013, for a Phase I Utility, to fall more than 70 basis points below the 379 fair combined rate of return authorized under subdivision 2 for such periods. In such cases, the 380 Commission shall, in such biennial review proceeding, authorize deferred recovery of such costs and 381 allow the utility to amortize and recover such deferred costs over future periods as determined by the Commission. The aggregate amount of such deferred costs shall not exceed an amount that would, 382 383 together with the utility's other costs, revenues, and investments to be recovered through rates for 384 generation and distribution services, cause the utility's earned return on its generation and distribution 385 services to exceed the fair rate of return authorized under subdivision 2, less 50 basis points, for the 386 combined test periods under review or, for any test period commencing after December 31, 2012, for a Phase II Utility and after December 31, 2013, for a Phase I Utility, to exceed the fair rate of return 387 388 authorized under subdivision 2 less 70 basis points. Nothing in this section shall limit the Commission's 389 authority, pursuant to the provisions of Chapter 10 (§ 56-232 et seq.), including specifically § 56-235.2, 390 following the review of combined test period earnings of the utility in a biennial review, for 391 normalization of nonrecurring test period costs and annualized adjustments for future costs, in 392 determining any appropriate increase or decrease in the utility's rates for generation and distribution 393 services pursuant to clause (i) or (iii).

If the Commission determines as a result of such biennial review that:

394

395 (i) The utility has, during the test period or periods under review, considered as a whole, earned 396 more than 50 basis points below a fair combined rate of return on its generation and distribution 397 services or, for any test period commencing after December 31, 2012, for a Phase II Utility and after 398 December 31, 2013, for a Phase I Utility, more than 70 basis points below a fair combined rate of 399 return on its generation and distribution services, as determined in subdivision 2, without regard to any 400 return on common equity or other matters determined with respect to facilities described in subdivision 401 6, the Commission shall order increases to the utility's rates necessary to provide the opportunity to fully 402 recover the costs of providing the utility's services and to earn not less than such fair combined rate of 403 return, using the most recently ended 12-month test period as the basis for determining the amount of 404 the rate increase necessary. However, the Commission may not order such rate increase unless it finds 405 that the resulting rates are necessary to provide the utility with the opportunity to fully recover its costs 406 of providing its services and to earn not less than a fair combined rate of return on both its generation 407 and distribution services, as determined in subdivision 2, without regard to any return on common equity 408 or other matters determined with respect to facilities described in subdivision 6, using the most recently 409 ended 12-month test period as the basis for determining the permissibility of any rate increase under the 410 standards of this sentence, and the amount thereof;

411 (ii) The utility has, during the test period or test periods under review, considered as a whole, earned 412 more than 50 basis points above a fair combined rate of return on its generation and distribution 413 services or, for any test period commencing after December 31, 2012, for a Phase II Utility and after 414 December 31, 2013, for a Phase I Utility, more than 70 basis points above a fair combined rate of 415 return on its generation and distribution services, as determined in subdivision 2, without regard to any 416 return on common equity or other matters determined with respect to facilities described in subdivision 417 6, the Commission shall, subject to the provisions of subdivision 9, direct that 60 percent of the amount 418 of such earnings that were more than 50 basis points, or, for any test period commencing after 419 December 31, 2012, for a Phase II Utility and after December 31, 2013, for a Phase I Utility, that 70 420 percent of the amount of such earnings that were more than 70 basis points, above such fair combined 421 rate of return for the test period or periods under review, considered as a whole, shall be credited to

422 customers' bills. Any such credits shall be amortized over a period of six to 12 months, as determined at
423 the discretion of the Commission, following the effective date of the Commission's order, and shall be
424 allocated among customer classes such that the relationship between the specific customer class rates of
425 return to the overall target rate of return will have the same relationship as the last approved allocation
426 of revenues used to design base rates; or

427 (iii) Such biennial review is the second consecutive biennial review in which the utility has, during 428 the test period or test periods under review, considered as a whole, earned more than 50 basis points 429 above a fair combined rate of return on its generation and distribution services or, for any test period 430 commencing after December 31, 2012, for a Phase II Utility and after December 31, 2013, for a Phase I 431 Utility, more than 70 basis points above a fair combined rate of return on its generation and distribution 432 services, as determined in subdivision 2, without regard to any return on common equity or other matter 433 determined with respect to facilities described in subdivision 6, the Commission shall, subject to the 434 provisions of subdivision 9 and in addition to the actions authorized in clause (ii) of this subdivision, 435 also order reductions to the utility's rates it finds appropriate. However, the Commission may not order 436 such rate reduction unless it finds that the resulting rates will provide the utility with the opportunity to 437 fully recover its costs of providing its services and to earn not less than a fair combined rate of return 438 on its generation and distribution services, as determined in subdivision 2, without regard to any return 439 on common equity or other matters determined with respect to facilities described in subdivision 6, 440 using the most recently ended 12-month test period as the basis for determining the permissibility of any 441 rate reduction under the standards of this sentence, and the amount thereof.

442 The Commission's final order regarding such biennial review shall be entered not more than eight 443 months after the date of filing, and any revisions in rates or credits so ordered shall take effect not more 444 than 60 days after the date of the order. The fair combined rate of return on common equity determined 445 pursuant to subdivision 2 in such biennial review shall apply, for purposes of reviewing the utility's 446 earnings on its rates for generation and distribution services, to the entire two successive 12-month test 447 periods ending December 31 immediately preceding the year of the utility's subsequent biennial review 448 filing under subdivision 3.

449 9. If, as a result of a biennial review required under this subsection and conducted with respect to 450 any test period or periods under review ending later than December 31, 2010 (or, if the Commission has elected to stagger its biennial reviews of utilities as provided in subdivision 1, under review ending later 451 452 than December 31, 2010, for a Phase I Utility, or December 31, 2011, for a Phase II Utility), the Commission finds, with respect to such test period or periods considered as a whole, that (i) any utility 453 454 has, during the test period or periods under review, considered as a whole, earned more than 50 basis 455 points above a fair combined rate of return on its generation and distribution services or, for any test period commencing after December 31, 2012, for a Phase II Utility and after December 31, 2013, for a 456 457 Phase I Utility, more than 70 basis points above a fair combined rate of return on its generation and distribution services, as determined in subdivision 2, without regard to any return on common equity or 458 459 other matters determined with respect to facilities described in subdivision 6, and (ii) the total aggregate 460 regulated rates of such utility at the end of the most recently-ended 12-month test period exceeded the 461 annual increases in the United States Average Consumer Price Index for all items, all urban consumers (CPI-U), as published by the Bureau of Labor Statistics of the United States Department of Labor, 462 463 compounded annually, when compared to the total aggregate regulated rates of such utility as determined pursuant to the biennial review conducted for the base period, the Commission shall, unless 464 465 it finds that such action is not in the public interest or that the provisions of clauses (ii) and (iii) of 466 subdivision 8 are more consistent with the public interest, direct that any or all earnings for such test 467 period or periods under review, considered as a whole that were more than 50 basis points, or, for any 468 test period commencing after December 31, 2012, for a Phase II Utility and after December 31, 2013, 469 for a Phase I Utility, more than 70 basis points, above such fair combined rate of return shall be 470 credited to customers' bills, in lieu of the provisions of clauses (ii) and (iii) of subdivision 8. Any such 471 credits shall be amortized and allocated among customer classes in the manner provided by clause (ii) of 472 subdivision 8. For purposes of this subdivision:

"Base period" means (i) the test period ending December 31, 2010 (or, if the Commission has elected
to stagger its biennial reviews of utilities as provided in subdivision 1, the test period ending December
31, 2010, for a Phase I Utility, or December 31, 2011, for a Phase II Utility), or (ii) the most recent test
period with respect to which credits have been applied to customers' bills under the provisions of this
subdivision, whichever is later.

478 "Total aggregate regulated rates" shall include: (i) fuel tariffs approved pursuant to § 56-249.6, except
479 for any increases in fuel tariffs deferred by the Commission for recovery in periods after December 31,
480 2010, pursuant to the provisions of clause (ii) of subsection C of § 56-249.6; (ii) rate adjustment clauses
481 implemented pursuant to subdivision 4 or 5; (iii) revisions to the utility's rates pursuant to clause (i) of
482 subdivision 8; (iv) revisions to the utility's rates pursuant to the Commission's rules governing utility rate

SB643ER

483 increase applications, as permitted by subsection B, occurring after July 1, 2009; and (v) base rates in effect as of July 1, 2009.

485 10. For purposes of this section, the Commission shall regulate the rates, terms and conditions of any 486 utility subject to this section on a stand-alone basis utilizing the actual end-of-test period capital 487 structure and cost of capital of such utility, unless the Commission finds that the debt to equity ratio of 488 such capital structure is unreasonable for such utility, in which case the Commission may utilize a debt 489 to equity ratio that it finds to be reasonable for such utility in determining any rate adjustment pursuant 490 to clauses (i) and (iii) of subdivision 8, and without regard to the cost of capital, capital structure, 491 revenues, expenses or investments of any other entity with which such utility may be affiliated. In 492 particular, and without limitation, the Commission shall determine the federal and state income tax costs 493 for any such utility that is part of a publicly traded, consolidated group as follows: (i) such utility's **494** apportioned state income tax costs shall be calculated according to the applicable statutory rate, as if the 495 utility had not filed a consolidated return with its affiliates, and (ii) such utility's federal income tax 496 costs shall be calculated according to the applicable federal income tax rate and shall exclude any 497 consolidated tax liability or benefit adjustments originating from any taxable income or loss of its 498 affiliates.

B. Nothing in this section shall preclude an investor-owned incumbent electric utility from applying
for an increase in rates pursuant to § 56-245 or the Commission's rules governing utility rate increase
applications; however, in any such filing, a fair rate of return on common equity shall be determined
pursuant to subdivision A 2. Nothing in this section shall preclude such utility's recovery of fuel and
purchased power costs as provided in § 56-249.6.

504 C. Except as otherwise provided in this section, the Commission shall exercise authority over the rates, terms and conditions of investor-owned incumbent electric utilities for the provision of generation, transmission and distribution services to retail customers in the Commonwealth pursuant to the provisions of Chapter 10 (§ 56-232 et seq.), including specifically § 56-235.2.

508 D. Nothing in this section shall preclude the Commission from determining, during any proceeding 509 authorized or required by this section, the reasonableness or prudence of any cost incurred or projected 510 to be incurred, by a utility in connection with the subject of the proceeding. A determination of the 511 Commission regarding the reasonableness or prudence of any such cost shall be consistent with the Commission's authority to determine the reasonableness or prudence of costs in proceedings pursuant to 512 513 the provisions of Chapter 10 (§ 56-232 et seq.). In determining the reasonableness or prudence of a 514 utility providing energy and capacity to its customers from renewable energy resources, the Commission 515 shall consider the extent to which such renewable energy resources, whether utility-owned or by 516 contract, further the objectives of the Commonwealth Energy Policy set forth in §§ 67-101 and 67-102, 517 and shall also consider whether the costs of such resources is likely to result in unreasonable increases 518 in rates paid by consumers.

519 E. The Commission shall promulgate such rules and regulations as may be necessary to implement520 the provisions of this section.
