2. Patron: Saslaw

3. Committee: Passed Senate

4. Title: Electric utility regulation; recovery of costs of new underground distribution facilities.

5. Summary: Electric utility regulation; recovery of costs of new underground distribution facilities. Authorizes investor-owned electric utilities to recover the costs of new underground distribution facilities through a rate adjustment clause. Eligible facilities will replace existing overhead distribution facilities of 69 kilovolts or less. A utility shall not seek any annual incremental increase in the level of investments in such facilities that exceeds five percent of the utility's distribution rate base. In determining whether to approve a rate adjustment clause for such facilities, the State Corporation Commission is directed to liberally construe the provisions of Title 56 and to give due consideration to the public policy goals of increased electric service reliability and reduced outage times associated with the replacement of existing overhead distribution facilities with new underground facilities. None of the costs of such new facilities shall be allocated to customers in the large general service rate class. The measure also modifies the provisions regarding the Commission's determination of the reasonableness and prudence of costs under § 56-585.1 of the Code.

6. Budget Amendment Necessary: No

7. Fiscal Impact Estimates: No fiscal impact on the State Corporation Commission

8. Fiscal Implications: None on the State Corporation Commission

9. Specific Agency or Political Subdivisions Affected: State Corporation Commission

10. Technical Amendment Necessary: No
