In the event that approved applications for the relevant fiscal year exceed \$7.3 million in tax credits, the Department shall apportion the \$7.3 million in tax credits (i) first, on the basis of tax credits that have been earned by each electricity generator during its current taxable year, including any such credits that may be allocated pursuant to subsection B; however, if such tax credits earned during current taxable years exceed \$7.3 million, the tax credits shall be apportioned pro rata; and (ii) next, for the remaining balance of tax credits, if any, pro rata on the basis of tax credits earned in prior taxable years, including any such credits that may be allocated pursuant to subsection B, that are being carried forward by electricity generators.
