**4. Title:** Electric utilities; costs of pumped hydroelectricity generation and storage facilities.

**5. Summary:** Electric utilities; costs of pumped hydroelectricity generation and storage facilities. Authorizes an investor-owned electric utility to petition the State Corporation Commission for approval of a rate adjustment clause for recovery of the costs of one or more pumped hydroelectricity generation and storage facilities that utilize associated on-site or off-site renewable energy resources as all or a portion of their power source and such facilities and associated resources are located in the coalfield region of the Commonwealth. The measure provides that the requirement that a utility demonstrate that it has considered and weighed alternative options, including third-party market alternatives, in its selection process does not apply to these generation and storage facilities. The construction of these generation and storage facilities is declared to be in the public interest, and in determining whether to approve such facility, the Commission is directed to liberally construe the provisions of Title 56.
