

VIRGINIA ACTS OF ASSEMBLY -- 2019 SESSION

CHAPTER 744

An Act to amend the Code of Virginia by adding a section numbered 15.2-2241.2, relating to rezoning and site plan approval; decommissioning solar energy equipment, facilities, or devices.

[S 1091]

Approved March 21, 2019

Be it enacted by the General Assembly of Virginia:

1. That the Code of Virginia is amended by adding a section numbered 15.2-2241.2 as follows:

§ 15.2-2241.2. *Bonding provisions for decommissioning of solar energy equipment, facilities, or devices.*

A. As used in this section, unless the context requires a different meaning:

"Decommission" means the removal and proper disposal of solar energy equipment, facilities, or devices on real property that has been determined by the locality to be subject to § 15.2-2232 and therefore subject to this section. "Decommission" includes the reasonable restoration of the real property upon which such solar equipment, facilities, or devices are located, including (i) soil stabilization and (ii) revegetation of the ground cover of the real property disturbed by the installation of such equipment, facilities, or devices.

"Solar energy equipment, facilities, or devices" means any personal property designed and used primarily for the purpose of collecting, generating, or transferring electric energy from sunlight.

B. As part of the local legislative approval process or as a condition of approval of a site plan, a locality shall require an owner, lessee, or developer of real property subject to this section to enter into a written agreement to decommission solar energy equipment, facilities, or devices upon the following terms and conditions: (i) if the party that enters into such written agreement with the locality defaults in the obligation to decommission such equipment, facilities, or devices in the timeframe set out in such agreement, the locality has the right to enter the real property of the record title owner of such property without further consent of such owner and to engage in decommissioning, and (ii) such owner, lessee, or developer provides financial assurance of such performance to the locality in the form of certified funds, cash escrow, bond, letter of credit, or parent guarantee, based upon an estimate of a professional engineer licensed in the Commonwealth, who is engaged by the applicant, with experience in preparing decommissioning estimates and approved by the locality; such estimate shall not exceed the total of the projected cost of decommissioning, which may include the net salvage value of such equipment, facilities, or devices, plus a reasonable allowance for estimated administrative costs related to a default of the owner, lessee, or developer, and an annual inflation factor.
