

20102537D

**HOUSE BILL NO. 527**

Offered January 8, 2020

Prefiled January 5, 2020

*A BILL to amend and reenact § 22.1-253.13:3 of the Code of Virginia, relating to student assessments; language translation.*

Patrons—Kory and Tran

Referred to Committee on Education

**Be it enacted by the General Assembly of Virginia:****1. That § 22.1-253.13:3 of the Code of Virginia is amended and reenacted as follows:****§ 22.1-253.13:3. Standard 3. Accreditation, other standards, assessments, and releases from state regulations.**

A. The Board of Education shall promulgate regulations establishing standards for accreditation pursuant to the Administrative Process Act (§ 2.2-4000 et seq.), which shall include student outcome measures, requirements and guidelines for instructional programs and for the integration of educational technology into such instructional programs, administrative and instructional staffing levels and positions, including staff positions for supporting educational technology, student services, auxiliary education programs such as library and media services, requirements for graduation from high school, community relations, and the philosophy, goals, and objectives of public education in Virginia.

The Board of Education shall promulgate regulations establishing standards for accreditation of public virtual schools under the authority of the local school board that enroll students full time.

The Board's regulations establishing standards for accreditation shall ensure that the accreditation process is transparent and based on objective measurements and that any appeal of the accreditation status of a school is heard and decided by the Board.

The Board shall review annually the accreditation status of all schools in the Commonwealth. The Board shall review the accreditation status of a school once every three years if the school has been fully accredited for three consecutive years. Upon such triennial review, the Board shall review the accreditation status of the school for each individual year within that triennial review period. If the Board finds that the school would have been accredited every year of that triennial review period the Board shall accredit the school for another three years. The Board may review the accreditation status of any other school once every two years or once every three years, provided that any school that receives a multiyear accreditation status other than full accreditation shall be covered by a Board-approved multiyear corrective action plan for the duration of the period of accreditation. Such multiyear corrective action plan shall include annual written progress updates to the Board. A multiyear accreditation status shall not relieve any school or division of annual reporting requirements.

Each local school board shall maintain schools that are fully accredited pursuant to the standards for accreditation as prescribed by the Board of Education. Each local school board shall report the accreditation status of all schools in the local school division annually in public session.

The Board shall establish a review process to assist any school that does not meet the standards established by the Board. The relevant school board shall report the results of such review and any annual progress reports in public session and shall implement any actions identified through such review and utilize them for improvement planning.

The Board shall establish a corrective action plan process for any school that does not meet the standards established by the Board. Such process shall require (i) each school board to submit a corrective action plan for any school in the local school division that does not meet the standards established by the Board and (ii) any school board that fails to demonstrate progress in developing or implementing any such corrective action plan to enter into a memorandum of understanding with the Board.

When the Board determines through its review process that the failure of schools within a division to meet the standards established by the Board is related to division-level failure to implement the Standards of Quality or other division-level action or inaction, the Board may require a division-level academic review. After the conduct of such review and within the time specified by the Board of Education, each school board shall enter into a memorandum of understanding with the Board and shall subsequently submit to the Board for approval a corrective action plan, consistent with criteria established by the Board setting forth specific actions and a schedule designed to ensure that schools within its school division meet the standards established by the Board. If the Board determines that the proposed corrective action plan is not sufficient to enable all schools within the division to meet the

INTRODUCED

HB527

standards established by the Board, the Board may return the plan to the local school board with directions to submit an amended plan pursuant to Board guidance. Such corrective action plans shall be part of the relevant school division's comprehensive plan pursuant to § 22.1-253.13:6.

B. The Superintendent of Public Instruction shall develop and the Board of Education shall approve criteria for determining and recognizing educational performance in the Commonwealth's public school divisions and schools. Such criteria, when approved, shall become an integral part of the accreditation process and shall include student outcome measurements. The Superintendent of Public Instruction shall annually report to the Board on the accreditation status of all school divisions and schools. Such report shall include an analysis of the strengths and weaknesses of public education programs in the various school divisions in Virginia and recommendations to the General Assembly for further enhancing student learning uniformly across the Commonwealth. In recognizing educational performance in the school divisions, the Board shall include consideration of special school division accomplishments, such as numbers of dual enrollments and students in Advanced Placement and International Baccalaureate courses, and participation in academic year Governor's Schools.

The Superintendent of Public Instruction shall assist local school boards in the implementation of action plans for increasing educational performance in those school divisions and schools that are identified as not meeting the approved criteria. The Superintendent of Public Instruction shall monitor the implementation of and report to the Board of Education on the effectiveness of the corrective actions taken to improve the educational performance in such school divisions and schools.

C. With such funds as are available for this purpose, the Board of Education shall prescribe assessment methods to determine the level of achievement of the Standards of Learning objectives by all students. Such assessments shall evaluate knowledge, application of knowledge, critical thinking, and skills related to the Standards of Learning being assessed. The Board shall, with the assistance of independent testing experts, conduct a regular analysis and validation process for these assessments. The Department of Education shall make available to school divisions Standards of Learning assessments typically administered by the middle and high schools by December 1 of the school year in which such assessments are to be administered or when newly developed assessments are available, whichever is later.

The Board shall also provide the option of industry certification and state licensure examinations as a student-selected credit.

The Board of Education shall make publicly available such assessments in a timely manner and as soon as practicable following the administration of such tests, so long as the release of such assessments does not compromise test security or deplete the bank of assessment questions necessary to construct subsequent tests, or limit the ability to test students on demand and provide immediate results in the web-based assessment system.

The Board shall include in the student outcome measures that are required by the Standards for Accreditation end-of-course or end-of-grade assessments for various grade levels and classes, including the completion of the alternative assessments implemented by each local school board, in accordance with the Standards of Learning. These assessments shall include end-of-course or end-of-grade tests for English, mathematics, science, and history and social science and may be integrated to include multiple subject areas.

The Board shall prescribe alternative methods of Standards of Learning assessment administration for children with disabilities, as that term is defined in § 22.1-213, who meet criteria established by the Board to demonstrate achievement of the Standards of Learning. An eligible student's Individual Education Program team shall make the final determination as to whether an alternative method of administration is appropriate for the student.

The Standards of Learning assessments administered to students in grades three through eight shall not exceed (a) reading and mathematics in grades three and four; (b) reading, mathematics, and science in grade five; (c) reading and mathematics in grades six and seven; (d) reading, writing, and mathematics in grade eight; (e) science after the student receives instruction in the grade six science, life science, and physical science Standards of Learning and before the student completes grade eight; and (f) Virginia Studies and Civics and Economics once each at the grade levels deemed appropriate by each local school board.

Each school board shall annually certify that it has provided instruction and administered an alternative assessment, consistent with Board guidelines, to students in grades three through eight in each Standards of Learning subject area in which a Standards of Learning assessment was not administered during the school year. Such guidelines shall (1) incorporate options for age-appropriate, authentic performance assessments and portfolios with rubrics and other methodologies designed to ensure that students are making adequate academic progress in the subject area and that the Standards of Learning content is being taught; (2) permit and encourage integrated assessments that include multiple subject areas; and (3) emphasize collaboration between teachers to administer and substantiate the assessments and the professional development of teachers to enable them to make the best use of

alternative assessments.

Local school divisions shall provide targeted mathematics remediation and intervention to students in grades six through eight who show computational deficiencies as demonstrated by their individual performance on any diagnostic test or grade-level Standards of Learning mathematics test that measures non-calculator computational skills.

The Department of Education shall award recovery credit to any student in grades three through eight who fails a Standards of Learning assessment in English reading or mathematics, receives remediation, and subsequently retakes and passes such an assessment, including any such student who subsequently retakes such an assessment on an expedited basis.

In addition, to assess the educational progress of students, the Board of Education shall (A) develop appropriate assessments, which may include criterion-referenced tests and other assessment instruments that may be used by classroom teachers; (B) select appropriate industry certification and state licensure examinations; and (C) prescribe and provide measures, which may include nationally normed tests to be used to identify students who score in the bottom quartile at selected grade levels. An annual justification that includes evidence that the student meets the participation criteria defined by the Virginia Department of Education shall be provided for each student considered for the Virginia Grade Level Alternative. Each Individual Education Program team shall review such justification and make the final determination as to whether or not the Virginia Grade Level Alternative is appropriate for the student. The superintendent and the school board chairman shall certify to the Board of Education, as a part of certifying compliance with the Standards of Quality, that there is a justification in the Individual Education Program for every student who takes the Virginia Grade Level Alternative. Compliance with this requirement shall be monitored as a part of the special education monitoring process conducted by the Department of Education. The Board shall report to the Governor and General Assembly in its annual reports pursuant to § 22.1-18 any school division that is not in compliance with this requirement.

The Standards of Learning requirements, including all related assessments, shall be waived for any student awarded a scholarship under the Brown v. Board of Education Scholarship Program, pursuant to § 30-231.2, who is enrolled in a preparation program for a high school equivalency examination approved by the Board of Education or in an adult basic education program or an adult secondary education program to obtain the high school diploma or a high school equivalency certificate.

The Department of Education shall develop processes for informing school divisions of changes in the Standards of Learning.

The Board of Education may adopt special provisions related to the administration and use of any Standards of Learning test or tests in a content area as applied to accreditation ratings for any period during which the Standards of Learning content or assessments in that area are being revised and phased in. Prior to statewide administration of such tests, the Board of Education shall provide notice to local school boards regarding such special provisions.

The Board of Education shall not include in its calculation of the passage rate of a Standards of Learning assessment for the purposes of state accountability any student whose parent has decided to not have his child take such Standards of Learning assessment, unless such exclusions would result in the school's not meeting any required state or federal participation rate.

*Each school board shall establish a process for the translation of each assessment required pursuant to this subsection and any accompanying assessment instructions into the native language of each student who will participate in such assessment.*

D. The Board of Education may pursue all available civil remedies pursuant to § 22.1-19.1 or administrative action pursuant to § 22.1-292.1 for breaches in test security and unauthorized alteration of test materials or test results.

The Board may initiate or cause to be initiated a review or investigation of any alleged breach in security, unauthorized alteration, or improper administration of tests, including the exclusion of students from testing who are required to be assessed, by local school board employees responsible for the distribution or administration of the tests.

Records and other information furnished to or prepared by the Board during the conduct of a review or investigation may be withheld pursuant to subdivision 10 of § 2.2-3705.3. However, this section shall not prohibit the disclosure of records to (i) a local school board or division superintendent for the purpose of permitting such board or superintendent to consider or to take personnel action with regard to an employee or (ii) any requester, after the conclusion of a review or investigation, in a form that (a) does not reveal the identity of any person making a complaint or supplying information to the Board on a confidential basis and (b) does not compromise the security of any test mandated by the Board. Any local school board or division superintendent receiving such records or other information shall, upon taking personnel action against a relevant employee, place copies of such records or information relating to the specific employee in such person's personnel file.

182 Notwithstanding any other provision of state law, no test or examination authorized by this section,  
183 including the Standards of Learning assessments, shall be released or required to be released as  
184 minimum competency tests, if, in the judgment of the Board, such release would breach the security of  
185 such test or examination or deplete the bank of questions necessary to construct future secure tests.

186 E. With such funds as may be appropriated, the Board of Education may provide, through an  
187 agreement with vendors having the technical capacity and expertise to provide computerized tests and  
188 assessments, and test construction, analysis, and security, for (i) web-based computerized tests and  
189 assessments, including computer-adaptive Standards of Learning assessments, for the evaluation of  
190 student progress during and after remediation and (ii) the development of a remediation item bank  
191 directly related to the Standards of Learning.

192 F. To assess the educational progress of students as individuals and as groups, each local school  
193 board shall require the use of Standards of Learning assessments, alternative assessments, and other  
194 relevant data, such as industry certification and state licensure examinations, to evaluate student progress  
195 and to determine educational performance. Each local school shall require the administration of  
196 appropriate assessments to students, which may include criterion-referenced tests and teacher-made tests  
197 and shall include the Standards of Learning assessments, the local school board's alternative assessments,  
198 and the National Assessment of Educational Progress state-by-state assessment. Each school board shall  
199 analyze and report annually, in compliance with any criteria that may be established by the Board of  
200 Education, the results from the Stanford Achievement Test Series, Ninth Edition (Stanford Nine)  
201 assessment, if administered, industry certification examinations, and the Standards of Learning  
202 Assessments to the public.

203 The Board of Education shall not require administration of the Stanford Achievement Test Series,  
204 Ninth Edition (Stanford Nine) assessment, except as may be selected to facilitate compliance with the  
205 requirements for home instruction pursuant to § 22.1-254.1.

206 The Board shall include requirements for the reporting of the Standards of Learning assessment  
207 scores and averages for each year, regardless of accreditation frequency, as part of the Board's  
208 requirements relating to the School Performance Report Card. Such scores shall be disaggregated for  
209 each school by student subgroups on the Virginia assessment program as appropriate and shall be  
210 reported to the public within three months of their receipt. These reports (i) shall be posted on the  
211 portion of the Department of Education's website relating to the School Performance Report Card, in a  
212 format and in a manner that allows year-to-year comparisons, and (ii) may include the National  
213 Assessment of Educational Progress state-by-state assessment.

214 G. Each local school division superintendent shall regularly review the division's submission of data  
215 and reports required by state and federal law and regulations to ensure that all information is accurate  
216 and submitted in a timely fashion. The Superintendent of Public Instruction shall provide a list of the  
217 required reports and data to division superintendents annually. The status of compliance with this  
218 requirement shall be included in the Board of Education's annual report to the Governor and the General  
219 Assembly as required by § 22.1-18.

220 H. Any school board may request the Board of Education for release from state regulations or, on  
221 behalf of one or more of its schools, for approval of an Individual School Accreditation Plan for the  
222 evaluation of the performance of one or more of its schools as authorized for certain other schools by  
223 the Standards for Accreditation pursuant to 8VAC20-131-280 C of the Virginia Administrative Code.  
224 Waivers of regulatory requirements may be granted by the Board of Education based on submission of a  
225 request from the division superintendent and chairman of the local school board. The Board of  
226 Education may grant, for a period up to five years, a waiver of regulatory requirements that are not (i)  
227 mandated by state or federal law or (ii) designed to promote health or safety. The school board shall  
228 provide in its waiver request a description of how the releases from state regulations are designed to  
229 increase the quality of instruction and improve the achievement of students in the affected school or  
230 schools. The Department of Education shall provide (a) guidance to any local school division that  
231 requests releases from state regulations and (b) information about opportunities to form partnerships with  
232 other agencies or entities to any local school division in which the school or schools granted releases  
233 from state regulations have demonstrated improvement in the quality of instruction and the achievement  
234 of students.

235 The Board of Education may also grant local school boards waivers of specific requirements in  
236 § 22.1-253.13:2, based on submission of a request from the division superintendent and chairman of the  
237 local school board, permitting the local school board to assign instructional personnel to the schools with  
238 the greatest needs, so long as the school division employs a sufficient number of personnel divisionwide  
239 to meet the total number required by § 22.1-253.13:2 and all pupil/teacher ratios and class size  
240 maximums set forth in subsection C of § 22.1-253.13:2 are met. The school board shall provide in its  
241 request a description of how the waivers from specific Standards of Quality staffing standards are  
242 designed to increase the quality of instruction and improve the achievement of students in the affected  
243 school or schools. The waivers may be renewed in up to five-year increments, or revoked, based on

**244** student achievement results in the affected school or schools.
