2021 SPECIAL SESSION I

	21200201D
1	SENATE BILL NO. 1354
2	AMENDMENT IN THE NATURE OF A SUBSTITUTE
3	(Proposed by the House Committee on Appropriations
4	On February 15, 2021) (Patron Prior to Substitute – Sonator Hanger)
5 6	A RILL to amend and reenact §§ 101-118601 621-4419.13 and 621-4419.14 of the Code of
7	Virginia, relating to Chesapeake Bay Phase III Watershed Improvement Plan; nutrient removal;
8	regulations.
9	Be it enacted by the General Assembly of Virginia:
10	1. That §§ 10.1-1186.01, 62.1-44.19:13, and 62.1-44.19:14 of the Code of Virginia are amended and
11 12	reenacted as follows:
12	A As used in this section "Enhanced Nutrient Removal Certainty Program" or "ENRC Program"
14	means the same as that term is defined in § 62.1-44.19:13.
15	B. The General Assembly shall fund grants to finance the reasonable costs of design and installation
16	of nutrient removal technology at the publicly owned treatment works designated as significant
17	dischargers contained in subsection E , F or as eligible nonsignificant dischargers as defined in
18	§ 10.1-2117. Notwithstanding § 10.1-2128, at such time as When grant disbursements pursuant to this section reach 200 percent of the appropriations provided for in Chapter 051 of the Asta of Assambly of
20	2005 and Chapter 10 of the Acts of Assembly of 2006. Special Session I a sum sufficient to fund the
2 1	completion of the ENRC Program at all publicly owned treatment works, the House Committee on
22	Agriculture, Chesapeake and Natural Resources, the House Committee on Appropriations, the Senate
23	Committee on Agriculture, Conservation and Natural Resources, and the Senate Committee on Finance
24	and Appropriations shall review (i) the future funding needs to meet the purposes of the Water Quality
25 26	appropriate funding mechanism for such needs
27	$\frac{B}{B}$ C. The disbursement of grants for the design and installation of nutrient removal technology at
28	those publicly owned treatment works included in subsection $\mathbf{E} F$ and eligible nonsignificant dischargers
29	shall be made monthly based on a requisition submitted by the grant recipient in the form requested by
30	the Department. Each requisition shall include written certification that the applicable local share of the
31	cost of nutrient removal technology for that portion of the project covered by such requisition has been incurred or expended. Except as may otherwise be approved by the Department, disbursements shall not
33	exceed 95 percent of the total grant amount until satisfactory completion of the project. The distribution
34	of the grants shall be effected by one of the following methods:
35	1. In payments to be paid by the State Treasurer out of funds appropriated to the Water Quality
36	Improvement Fund pursuant to § 10.1-2131;
5/	2. Over a specified time through a contractual agreement entered into by the Treasury Board and
30 39	undertaking the design and installation of nutrient removal technology such payments to be paid by the
4 0	State Treasurer out of funds appropriated to the Treasury Board; or
41	3. In payments to be paid by the State Treasurer upon request of the Director of Environmental
42	Quality out of proceeds from bonds issued by the Virginia Public Building Authority, in consultation
43	with the Department of Environmental Quality, pursuant to §§ 2.2-2261, 2.2-2263, and 2.2-2264,
44 45	for financing such project during the period from 50% 50 percent completion of construction to final
46	completion of construction.
47	C. D. The General Assembly shall have has the sole authority to determine whether disbursement
48	will shall be made pursuant to subdivision $\mathbb{B} \subset \mathbb{C}$, $\mathbb{B} \subset \mathbb{C}$, or $\mathbb{B} \subset \mathbb{C}$, or a combination thereof; provided that
49 50	a disbursement shall only be made pursuant to subdivision $\mathbf{B} \ C \ 3 \ only$ upon a certification by the
50 51	Department of Environmental Quality that project grant reimbursements for the fiscal year will exceed the available funds in the Water Quality Improvement Fund
51 52	$\frac{D}{E}$ Exclusive of any deposits made pursuant to 8 10 1-2128 the grants awarded pursuant to this
53	section shall include such appropriations as provided for in Chapter 951 of the Acts of Assembly of
54	2005; and Chapter 10 of the Acts of Assembly of 2006, Special Session I from time to time in the
55	appropriation act or any amendments thereto.
56 57	E. F. The disbursement of grants to finance the costs of design and installation of nutrient removal
57 58	the following 89 listed publicly owned treatment works and other eligible nonsignificant dischargers
59	shall be provided pursuant to the distribution methodology included in § 10.1-2131. However, in The

2/23/21 9:10

SB1354H1

notation "WIP3-N" or "WIP3-P" indicates that a facility is subject to additional requirements for total 60 nitrogen or total phosphorus, respectively, under the ENRC Program. In no case shall any publicly 61 owned treatment works receive a grant of less than 35% 35 percent of the costs of the design and 62 63 installation of nutrient removal technology. 64 FACILITY NAME OWNER 65 Shenandoah - Potomac River Basin 66 ACSA-Fishersville STP Augusta County Service Authority 67 Luray STP Town of Luray 68 ACSA-Middle River Regional STP Augusta County Service Authority 69 HRRSA-North River WWTF WIP3-P Harrisonburg-Rockingham Regional Sewer 70 Authority 71 72 73 74 75 76 77 78 79 80 81 82 83 Augusta County Service Authority ACSA-Stuarts Draft STP City of Waynesboro Waynesboro STP ACSA-Weyers Cave STP Augusta County Service Authority Berryville STP Town of Berryville Front Royal STP Town of Front Royal Mount Jackson STP Town of Mount Jackson New Market STP Town of New Market Shenandoah Co.-North Fork Regional WWTP Shenandoah County Stoney Creek Sanitary District STP Stoney Creek Sanitary District Strasburg STP Town of Strasburg Woodstock STP Town of Woodstock FWSA-Opequon Water Reclamation Facility Frederick-Winchester Service Authority FWSA-Parkins Mill WWTF Frederick-Winchester Service Authority 84 85 Purcellville-Basham Simms WWTF Town of Purcellville LCSA-Broad Run WRF Loudoun County Service Authority 86 87 Leesburg WPCF Town of Leesburg Round Hill WWTP Town of Round Hill 88 PWCSA-H.L. Tangier Island WWTP 165 F. G. To the extent that any publicly owned treatment works receives less than the grant specified 166 pursuant to § 10.1-2131, any year-end revenue surplus or unappropriated balances deposited in the Water Quality Improvement Fund, as required by § 10.1-2128, shall be prioritized in order to augment the 167 168 funding of those projects for which grants have been prorated. Any additional reimbursements to these prorated projects shall not exceed the total reimbursement amount due pursuant to the formula 169 170 established in subsection E of § 10.1-2131.

171 G. H. Notwithstanding the provisions of subsection B of § 10.1-2131, the Director of the Department 172 of Environmental Quality shall not be required to enter into a grant agreement with a facility designated as a significant discharger or eligible nonsignificant discharger if the Director determines that the use of 173 174 nutrient credits in accordance with the Chesapeake Bay Watershed Nutrient Credit Exchange Program 175 (§ 62.1-44.19:12 et seq.) would be significantly more cost-effective than the installation of nutrient 176 controls for the facility in question.

177 § 62.1-44.19:13. Definitions.

As used in this article, unless the context requires a different meaning: 178

"Annual mass load of total nitrogen" (expressed in pounds per year) means the daily total nitrogen 179 180 concentration (expressed as mg/L to the nearest 0.01 mg/L) multiplied by the flow volume of effluent discharged during the 24-hour period (expressed as MGD to the nearest 0.01 MGD), multiplied by 8.34 181 182 and rounded to the nearest whole number to convert to pounds per day (lbs/day) units, then totaled for 183 the calendar month to convert to pounds per month (lbs/mo) units, and then totaled for the calendar year 184 to convert to pounds per year (lbs/yr) units.

185 "Annual mass load of total phosphorus" (expressed in pounds per year) means the daily total 186 phosphorus concentration (expressed as mg/L to the nearest 0.01mg/L) multiplied by the flow volume of 187 effluent discharged during the 24-hour period (expressed as MGD to the nearest 0.01 MGD) multiplied 188 by 8.34 and rounded to the nearest whole number to convert to pounds per day (lbs/day) units, then 189 totaled for the calendar month to convert to pounds per month (lbs/mo) units, and then totaled for the 190 calendar year to convert to pounds per year (lbs/yr) units.

191 "Association" means the Virginia Nutrient Credit Exchange Association authorized by this article.

223

192 "Attenuation" means the rate at which nutrients are reduced through natural processes during 193 transport in water.

194 "Best management practice," "practice," or "BMP" means a structural practice, nonstructural practice, 195 or other management practice used to prevent or reduce nutrient loads associated with stormwater from 196 reaching surface waters or the adverse effects thereof.

197 "Biological nutrient removal technology" means (i) technology that will achieve an annual average 198 total nitrogen effluent concentration of eight milligrams per liter and an annual average total phosphorus 199 effluent concentration of one milligram per liter, or (ii) equivalent reductions in loads of total nitrogen 200 and total phosphorus through the recycle or reuse of wastewater as determined by the Department.

201 "Delivered total nitrogen load" means the discharged mass load of total nitrogen from a point source 202 that is adjusted by the delivery factor for that point source.

"Delivered total phosphorus load" means the discharged mass load of total phosphorus from a point 203 204 source that is adjusted by the delivery factor for that point source.

"Delivery factor" means an estimate of the number of pounds of total nitrogen or total phosphorus 205 206 delivered to tidal waters for every pound discharged from a permitted facility, as determined by the 207 specific geographic location of the permitted facility, to account for attenuation that occurs during 208 riverine transport between the permitted facility and tidal waters. Delivery factors shall be calculated 209 using the Chesapeake Bay Program watershed model. 210

"Department" means the Department of Environmental Quality.

211 "Enhanced Nutrient Removal Certainty Program" or "ENRC Program" means the Phase III Watershed Implementation Plan Enhanced Nutrient Removal Certainty Program established pursuant to 212 213 subsection G of § 62.1-44.19:14.

"Equivalent load" means 2,300 pounds per year of total nitrogen and 300 pounds per year of total 214 phosphorus at a flow volume of 40,000 gallons per day; 5,700 pounds per year of total nitrogen and 760 215 216 pounds per year of total phosphorus at a flow volume of 100,000 gallons per day; and 28,500 pounds per year of total nitrogen and 3,800 pounds per year of total phosphorus at a flow volume of 500,000 217 218 gallons per day.

219 "Facility" means a point source discharging or proposing to discharge total nitrogen or total 220 phosphorus to the Chesapeake Bay or its tributaries. This term does not include confined animal feeding 221 operations, discharges of stormwater, return flows from irrigated agriculture, or vessels. 222

"General permit" means the general permit authorized by this article.

"MS4" means a municipal separate storm sewer system.

"Nutrient credit" or "credit" means a nutrient reduction that is certified pursuant to this article and expressed in pounds of phosphorus or nitrogen either (i) delivered to tidal waters when the credit is 224 225 generated within the Chesapeake Bay Watershed or (ii) as otherwise specified when generated in the 226 Southern Rivers watersheds. "Nutrient credit" does not include point source nitrogen credits or point 227 228 source phosphorus credits as defined in this section. 229

"Nutrient credit-generating entity" means an entity that generates nonpoint source nutrient credits.

"Permitted facility" means a facility authorized by the general permit to discharge total nitrogen or 230 231 total phosphorus. For the sole purpose of generating point source nitrogen credits or point source phosphorus credits, "permitted facility" shall also mean the Blue Plains wastewater treatment facility 232 233 operated by the District of Columbia Water and Sewer Authority.

234 "Permittee" means a person authorized by the general permit to discharge total nitrogen or total 235 phosphorus.

236 "Point source nitrogen credit" means the difference between (i) the waste load allocation for a 237 permitted facility specified as an annual mass load of total nitrogen, and (ii) the monitored annual mass 238 load of total nitrogen discharged by that facility, where clause (ii) is less than clause (i), and where the 239 difference is adjusted by the applicable delivery factor and expressed as pounds per year of delivered 240 total nitrogen load.

241 "Point source phosphorus credit" means the difference between (i) the waste load allocation for a 242 permitted facility specified as an annual mass load of total phosphorus, and (ii) the monitored annual 243 mass load of total phosphorus discharged by that facility, where clause (ii) is less than clause (i), and where the difference is adjusted by the applicable delivery factor and expressed as pounds per year of 244 245 delivered total phosphorus load.

"State-of-the-art nutrient removal technology" means (i) technology that will achieve an annual 246 247 average total nitrogen effluent concentration of three milligrams per liter and an annual average total 248 phosphorus effluent concentration of 0.3 milligrams per liter, or (ii) equivalent load reductions in total 249 nitrogen and total phosphorus through recycle or reuse of wastewater as determined by the Department.

"Tributaries" means those river basins listed in the Chesapeake Bay TMDL and includes the 250 Potomac, Rappahannock, York, and James River Basins, and the Eastern Shore, which encompasses the 251 252 creeks and rivers of the Eastern Shore of Virginia that are west of Route 13 and drain into the 253 Chesapeake Bay.

254 "Waste load allocation" means (i) the water quality-based annual mass load of total nitrogen or 255 annual mass load of total phosphorus allocated to individual facilities pursuant to the Water Quality 256 Management Planning Regulation (9VAC25-720) or its successor, or permitted capacity in the case of 257 nonsignificant dischargers; (ii) the water quality-based annual mass load of total nitrogen or annual mass 258 load of total phosphorus acquired pursuant to § 62.1-44.19:15 for new or expanded facilities; or (iii) 259 applicable total nitrogen or total phosphorus waste load allocations under the Chesapeake Bay total 260 maximum daily loads (TMDLs) to restore or protect the water quality and beneficial uses of the 261 Chesapeake Bay or its tidal tributaries.

§ 62.1-44.19:14. Watershed general permit for nutrients.

262

A. By January 1, 2006, or as soon thereafter as possible, the The Board shall issue a Watershed 263 264 General Virginia Pollutant Discharge Elimination System Permit, hereafter referred to as the general 265 permit, authorizing point source discharges of total nitrogen and total phosphorus to the waters of the 266 Chesapeake Bay and its tributaries. Except as otherwise provided in this article, the general permit shall 267 control in lieu of technology-based, water quality-based, and best professional judgment, interim or final 268 effluent limitations for total nitrogen and total phosphorus in individual Virginia Pollutant Discharge 269 Elimination System permits for facilities covered by the general permit where the effluent limitations for 270 total nitrogen and total phosphorus in the individual permits are based upon standards, criteria, waste 271 load allocations, policy, or guidance established to restore or protect the water quality and beneficial 272 uses of the Chesapeake Bay or its tidal tributaries.

273 B. This section shall not be construed to limit or otherwise affect the Board's authority to establish 274 and enforce more stringent water quality-based effluent limitations for total nitrogen or total phosphorus 275 in individual permits where those limitations are necessary to protect local water quality. The exchange 276 or acquisition of credits pursuant to this article shall not affect any requirement to comply with such 277 local water quality-based limitations. 278

C. The general permit shall contain the following:

279 1. Waste load allocations for total nitrogen and total phosphorus for each permitted facility expressed 280 as annual mass loads, including reduced waste load allocations where applicable under the ENRC 281 Program. The allocations for each permitted facility shall reflect the applicable individual water 282 quality-based total nitrogen and total phosphorus waste load allocations. An owner or operator of two or 283 more facilities located in the same tributary may apply for and receive an aggregated waste load 284 allocation for total nitrogen and an aggregated waste load allocation for total phosphorus for multiple 285 facilities reflecting the total of the water quality-based total nitrogen and total phosphorus waste load 286 allocations established for such facilities individually;

287 2. A schedule requiring compliance with the combined waste load allocations for each tributary as 288 soon as possible taking into account (i) opportunities to minimize costs to the public or facility owners by phasing in the implementation of multiple projects; (ii) the availability of required services and skilled labor; (iii) the availability of funding from the Virginia Water Quality Improvement Fund as 289 290 291 established in § 10.1-2128, the Virginia Water Facilities Revolving Fund as established in § 62.1-225, 292 and other financing mechanisms; (iv) water quality conditions; and (v) other relevant factors. Following 293 receipt of the compliance plans required by subdivision C 3, the Board shall reevaluate the schedule 294 taking into account the information in the compliance plans and the factors in this subdivision, and may 295 modify the schedule as appropriate;

296 3. A requirement that within nine months after the initial effective date of the general permit, the 297 permittees shall either individually or through the Association submit compliance plans to the 298 Department for approval. The compliance plans shall contain, at a minimum, any capital projects and 299 implementation schedules needed to achieve total nitrogen and phosphorus reductions sufficient to 300 comply with the individual and combined waste load allocations of all the permittees in the tributary. 301 The compliance plans may rely on the exchange of point source credits in accordance with this article, 302 but not the acquisition of credits through payments authorized by § 62.1-44.19:18, to achieve compliance 303 with the individual and combined waste load allocations in each tributary. The compliance plans shall be 304 updated annually and submitted to the Department no later than February 1 of each year. The 305 compliance plans due beginning February 1, 2023, shall address the requirements of the ENRC 306 Program;

307 4. Such monitoring and reporting requirements as the Board deems necessary to carry out the 308 provisions of this article;

309 5. A procedure that requires every owner or operator of a facility authorized by a Virginia Pollutant 310 Discharge Elimination System permit to discharge 100,000 gallons or more per day, or an equivalent load, directly into tidal waters, or 500,000 gallons or more per day, or an equivalent load, directly into 311 312 nontidal waters, to secure general permit coverage by filing a registration statement with the Department 313 within a specified period after each effective date of the general permit. The procedure shall also require any owner or operator of a facility authorized by a Virginia Pollutant Discharge Elimination System 314

343

315 permit to discharge 40,000 gallons or more per day, or an equivalent load, directly into tidal or nontidal waters to secure general permit coverage by filing a registration statement with the Department at the 316 317 time he makes application with the Department for a new discharge or expansion that is subject to an 318 offset or technology-based requirement in § 62.1-44.19:15, and thereafter within a specified period of 319 time after each effective date of the general permit. The procedure shall also require any owner or 320 operator of a facility with a discharge that is subject to an offset requirement in subdivision A 5 of 321 § 62.1-44.19:15 to secure general permit coverage by filing a registration statement with the Department 322 prior to commencing the discharge and thereafter within a specified period of time after each effective 323 date of the general permit. The general permit shall provide that any facility authorized by a Virginia 324 Pollutant Discharge Elimination System permit and not required by this subdivision to file a registration statement shall be deemed to be covered under the general permit at the time it is issued, and shall file 325 a registration statement with the Department when required by this section. Owners or operators of 326 327 facilities that are deemed to be permitted under this section shall have no other obligation under the 328 general permit prior to filing a registration statement and securing coverage under the general permit 329 based upon such registration statement;

6. A procedure for efficiently modifying the lists of facilities covered by the general permit where 330 331 the modification does not change or otherwise alter any waste load allocation or delivery factor adopted pursuant to the Water Quality Management Planning Regulation (9VAC25-720) or its successor, or an 332 333 applicable total maximum daily load. The procedure shall also provide for modifying or incorporating 334 new waste load allocations or delivery factors, including the opportunity for public notice and comment 335 on such modifications or incorporations; and

336 7. Such other conditions as the Board deems necessary to carry out the provisions of this chapter and Section 402 of the federal Clean Water Act (33 U.S.C. § 1342). 337

D. 1. The Board shall (i) review during the year 2020 and every 10 years thereafter the basis for 338 339 allocations granted in the Water Quality Management Planning Regulation (9VAC25-720) and (ii) as a result of such decennial reviews propose for inclusion in the Water Quality Management Planning 340 341 Regulation (9VAC25-720) either the reallocation of unneeded allocations to other facilities registered 342 under the general permit or the reservation of such allocations for future use.

2. For each decennial review, the Board shall determine whether a permitted facility has:

344 a. Changed the use of the facility in such a way as to make discharges unnecessary, ceased the 345 discharge of nutrients, and become unlikely to resume such discharges in the foreseeable future; or

346 b. Changed the production processes employed in the facility in such a way as to render impossible, 347 or significantly to diminish the likelihood of, the resumption of previous nutrient discharges.

348 3. Beginning in 2030, each review also shall consider the following factors for municipal wastewater 349 facilities: 350

a. Substantial changes in the size or population of a service area;

b. Significant changes in land use resulting from adopted changes to zoning ordinances or 351 352 comprehensive plans within a service area;

353 c. Significant establishment of conservation easements or other perpetual instruments that are 354 associated with a deed and that restrict growth or development; 355

d. Constructed treatment facility capacity:

e. Significant changes in the understanding of the water chemistry or biology of receiving waters that 356 357 would reasonably result in unused nutrient discharge allocations over an extended period of time;

358 f. Significant changes in treatment technologies that would reasonably result in unused nutrient 359 discharge allocations over an extended period of time;

360 g. The ability of the permitted facility to accommodate projected growth under existing nutrient 361 waste load allocations; and

362 h. Other similarly significant factors that the Board determines reasonably to affect the allocations 363 granted.

364 The Board shall not reduce allocations based solely on voluntary improvements in nutrient removal 365 technology.

366 E. The Board shall maintain and make available to the public a current listing, by tributary, of all 367 permittees and permitted facilities under the general permit, together with each permitted facility's total 368 nitrogen and total phosphorus waste load allocations, and total nitrogen and total phosphorus delivery 369 factors.

370 F. Except as otherwise provided in this article, in the event that there are conflicting or duplicative 371 conditions contained in the general permit and an individual Virginia Pollutant Discharge Elimination 372 System permit, the conditions in the general permit shall control.

373 G. The Board shall adopt amendments to the Water Quality Management Planning Regulation and modifications to Virginia Pollutant Discharge Elimination System permits or registration lists to 374 establish and implement the Phase III Watershed Implementation Plan Enhanced Nutrient Removal 375 376 Certainty Program (ENRC Program) as provided in this subsection. The ENRC Program shall consist of

7 of 9

PROJECT NAME	DESCRIPTION (COMPLIANCE SCHEDULE)
HRSD-Chesapeake/Elizabeth STP	Consolidate into regional system and close treatment facility (1/1/2023)
HRSD-Boat Harbor WWTP	Convey by subaqueous crossing to Nansemond River WWTP for nutrient removal (1/1/2026)
HRSD-Nansemond River WWTP	Upgrade and expand with nutrient removal technology of 4.0 mg/L total nitrogen (1/1/2026) and 0.30 mg/L total phosphorus (1/1/2032)
HRSD-Nassawadox WWTP	Convey to regional system for nutrient removal $(1/1/2026)$
Spotsylvania CoFMC WWTF	Convey to Massaponax WWTF and close treatment facility (1/1/2026)
Spotsylvania CoMassaponax WWTF	Expand with nutrient removal technology of 4.0 mg/L total nitrogen and 0.30 mg/L total phosphorus to consolidate and close FMC WWTF (1/1/2026)
Spotsylvania CoThornburg STP	Upgrade with nutrient removal technology of 4.0 mg/L total nitrogen and 0.30 mg/L total phosphorus (1/1/2026)
HRRSA-North River WWTP	Phosphorus removal tertiary filtration upgrade (1/1/2026)
South Central Wastewater Authority WWTF	Upgrade with nutrient removal technology of 4.0 mg/L total nitrogen and 0.30 mg/L total phosphorus (1/1/2026)
HRSD-Williamsburg WWTP	Upgrade with nutrient removal technology of 4.0 mg/L total nitrogen (1/1/2026) and 0.30 mg/L total phosphorus (1/1/2032)
HRSD-VIP WWTP	Upgrade with nutrient removal technology of 4.0 mg/L total nitrogen (1/1/2026) and 0.30 mg/L total phosphorus (1/1/2032)
HRSD-James River WWTP	Upgrade with nutrient removal technology of 4.0 mg/L total nitrogen (1/1/2026) and 0.30 mg/L total phosphorus (1/1/2028)
HRSD-Army Base WWTP	Convey to VIP WWTP for nutrient removal (1/1/2032) or upgrade with nutrient removal technology of 4.0 mg/L total nitrogen (1/1/2026) and 0.30 mg/L total phosphorus (1/1/2032)

into the applicable Virginia Pollutant Discharge Elimination System permit or registration list. Each priority 414 project facility shall be in compliance by complying with applicable annual average total nitrogen and total phosphorus concentrations for compliance years 2026, 2028, and 2032 or, only for a facility 415 subject to an aggregated waste load allocation, by exercising the option of achieving an equivalent 416 417 discharged load by the date set out in the schedule of compliance based on the applicable total nitrogen 418 and total phosphorus annual average concentrations and actual annual flow treated without the acquisition and use of point source credits generated by permitted facilities not under common 419 420 ownership. Noncompliance shall be enforceable in the same manner as any other condition of a Virginia 421 Pollutant Discharge Elimination System permit.

422 2. Nitrogen waste load allocation reductions - HRSD-York River WWTP:

423 *Reduce the total nitrogen waste load allocation for the HRSD-York River WWTP to 228,444 lbs/year* **424** *effective January 1, 2026.*

425 3. James River HRSD SWIFT nutrient upgrades:

426 Reduce total nitrogen waste load allocations for HRSD treatment works in the James River basin to **427** the following allocations effective January 1, 2026:

428	FACILITY NAME	TOTAL NITROGEN WASTELOAD ALLOCATION
429		(lbs/year)
430	HRSD-Army Base WWTP	219,307
431	HRSD-Boat Harbor STP	304,593
432	HRSD-James River STP	243,674
433	HRSD-VIP WWTP	487,348
434	HRSD-Nansemond STP	365,511
435	HRSD-Williamsburg STP	274,133
436	Reduce total phosphorus	waste load allocations for HRSD treatment works in the James River basin

436 *As a constant of the following allocations effective January 1, 2026:*

438	FACILITY NAME	IOTAL PHOSPHORUS WASTELOAD ALLOCATION
439		(lbs/year)
440	HRSD-Army Base WWTP	27,413
441	HRSD-Boat Harbor STP	38.074

SB1354H1
