Referred to Committee on Commerce and Labor

11 Be it enacted by the General Assembly of Virginia:

12 1. That § 1 of the first enactment of Chapters 358 and 382 of the Acts of Assembly of 2013, as 13 amended by Chapter 803 of the Acts of Assembly of 2017, and as amended by Chapters 1187, 14 1188, 1189, 1193, 1194, and 1239 of the Acts of Assembly of 2020, is amended and reenacted as 15 follows:

\$ 1. That the State Corporation Commission (Commission) shall conduct pilot programs under which
a person that owns or operates a solar-powered or wind-powered electricity generation facility located on
premises owned or leased by an eligible customer-generator, as defined in § 56-594 of the Code of
Virginia, shall be permitted to sell the electricity generated from such facility exclusively to such
eligible customer-generator under a power purchase agreement used to provide third party financing of
the costs of such a renewable generation facility (third party power purchase agreement), subject to the
following terms, conditions, and restrictions:

a. Notwithstanding subsection G of § 56-580 of the Code of Virginia or any other provision of law,
a pilot program shall be conducted within the certificated service territory of each investor-owned
electric utility ("Pilot Utility");

b. Except as provided in this subdivision, both jurisdictional and nonjurisdictional customers may 26 27 participate in such pilot programs on a first-come, first-serve basis. The aggregated capacity of all 28 generation facilities that are subject to such third party power purchase agreements at any time during 29 the pilot program shall not exceed 500 megawatts for Virginia jurisdictional customers and 500 30 megawatts for Virginia nonjurisdictional customers for an investor-owned utility that was bound by a rate case settlement adopted by the Commission that extended in its application beyond January 1, 2002, 31 32 or 40 megawatts for an investor-owned utility that was not bound by a rate case settlement adopted by the Commission that extended in its application beyond January 1, 2002. Such limitation on the 33 34 aggregated capacity of such facilities shall constitute a portion of the existing limit of six percent of 35 each Pilot Utility's adjusted Virginia peak-load forecast for the previous year that is available to eligible 36 customer-generators pursuant to subsection E of § 56-594 of the Code of Virginia. Notwithstanding any 37 provision of this act that incorporates provisions of § 56-594, the seller and the customer shall elect 38 either to (i) enter into their third party power purchase agreement subject to the conditions and 39 provisions of the Pilot Utility's net energy metering program under § 56-594 or (ii) provide that 40 electricity generated from the generation facilities subject to the third party power purchase agreement will not be net metered under § 56-594, provided that an election not to net meter under § 56-594 shall 41 not exempt the third party power purchase agreement and the parties thereto from the requirements of 42 this act that incorporate provisions of § 56-594; 43

44 c. A solar-powered or wind-powered generation facility with a capacity of no less than 50 kilowatts and no more than three megawatts shall be eligible for a third party power purchase agreement under a 45 46 pilot program; however, if the customer under such agreement is an entity with tax-exempt status in 47 accordance with § 501(c) of the Internal Revenue Code of 1954, as amended, then such facility is 48 eligible for the pilot program even if it does not meet the 50 kilowatts minimum size requirement. The 49 maximum generation capacity of three megawatts shall not affect the limits on the capacity of electrical 50 generating capacities of 25 kilowatts for residential customers and three megawatts for nonresidential 51 customers set forth in subsection B of § 56-594 of the Code of Virginia, which limitations shall continue 52 to apply to net energy metering generation facilities regardless of whether they are the subject of a third 53 party power purchase agreement under the pilot program;

d. A generation facility that is the subject of a third party power purchase agreement under the pilot
 program shall serve only one customer, and a third party power purchase agreement shall not serve
 multiple customers;

57 e. The customer under a third party power purchase agreement under the pilot program shall be 58 subject to the interconnection and other requirements imposed on eligible customer-generators pursuant 59 to subsection C of § 56-594 of the Code of Virginia, including the requirement that the customer bear

60 the reasonable costs, as determined by the Commission, of the items described in clauses (i), (ii), and 61 (iii) of such subsection;

f. A third party power purchase agreement under the pilot program shall not be valid unless it
conforms in all respects to the requirements of the pilot program conducted under the provisions of this
act and unless the Commission and the Pilot Utility are provided written notice of the parties' intent to
enter into a third party power purchase agreement not less than 30 days prior to the agreement's
proposed effective date; and

67 g. An affiliate of the Pilot Utility shall be permitted to offer and enter into third party power68 purchase arrangements on the same basis as may any other person that satisfies the requirements of69 being a seller under a third party power purchase agreement under the pilot program.
