VIRGINIA ACTS OF ASSEMBLY - CHAPTER

Approved

2 An Act to amend and reenact § 32.1-122.03:1 of the Code of Virginia, relating to Board of Health; 3 Statewide Telehealth Plan; Virginia Telehealth Network.

6 Be it enacted by the General Assembly of Virginia:

7 1. That § 32.1-122.03:1 of the Code of Virginia is amended and reenacted as follows: 8

§ 32.1-122.03:1. Statewide Telehealth Plan.

A. As used in this section:

"Remote patient monitoring services" has the same meaning as in § 38.2-3418.16.

"Telehealth services" means the use of telecommunications and information technology to provide 11 access to health assessments, diagnosis, intervention, consultation, supervision, and information across distance. "Telehealth services" includes the use of such technologies as telephones, facsimile machines, 12 13 electronic mail systems, store-and-forward technologies, and remote patient monitoring devices that are 14 15 used to collect and transmit patient data for monitoring and interpretation. Nothing in this definition shall be construed or interpreted to amend the appropriate establishment of a bona fide 16 17 practitioner-patient relationship, as defined in § 54.1-3303. 18

"Telemedicine services" has the same meaning as in § 38.2-3418.16.

19 B. The Board shall develop, by January 1, 2021, amend and maintain, in consultation with the Virginia Telehealth Network, as a component of the State Health Plan a Statewide Telehealth Plan to 20 21 promote an integrated approach to the introduction and use of telehealth services and telemedicine services. The Board shall contract with the Virginia Telehealth Network, or another Virginia-based 22 23 nongovernmental, nonprofit organization focused on telehealth if the Virginia Telehealth Network is no 24 longer in existence, to (i) provide direct consultation to any advisory groups and groups tasked by the 25 Board with implementation and data collection as required by this section, (ii) track implementation of the Statewide Telehealth Plan, and (iii) facilitate changes to the Statewide Telehealth Plan as accepted 26 27 medical practices and technologies evolve.

C. The Statewide Telehealth Plan shall include but not be limited to provisions for:

29 1. The promotion of the inclusion of telehealth services and telemedicine services in the operating 30 procedures of hospitals, primary care facilities, public primary and secondary schools, state-funded 31 post-secondary schools, emergency medical services agencies, and such other state agencies and practices 32 deemed necessary by the Board;

33 2. The promotion of the use of remote patient monitoring services and store-and-forward 34 technologies, including in cases involving patients with chronic illness;

35 3. A uniform and integrated set of proposed criteria for the use of telehealth technologies for prehospital and interhospital triage and transportation of patients initiating or in need of emergency 36 medical services developed by the Board in consultation with the Department of Health Professions, the 37 38 Virginia College of Emergency Physicians, the Virginia Hospital and Healthcare Association, the 39 Virginia Chapter of the American College of Surgeons, the American Stroke Association, the American 40 Telemedicine Association, and prehospital care providers. The Board may revise such criteria from time 41 to time to incorporate accepted changes in medical practice and appropriate use of new and effective 42 innovations in telehealth or telemedicine technologies, or to respond to needs indicated by analysis of 43 data on patient outcomes. Such criteria shall be used as a guide and resource for health care providers 44 and are not intended to establish, in and of themselves, standards of care or to abrogate the requirements 45 of § 8.01-581.20. A decision by a health care provider to deviate from the criteria shall not constitute 46 negligence per se;

4. A strategy for integration of the Statewide Telehealth Plan with the State Health Plan, the 47 48 Statewide Emergency Medical Services Plan, the Statewide Trauma Triage Plan, and the Stroke Triage 49 Plan to support the purposes of each plan;

50 5. A strategy for the maintenance of the Statewide Telehealth Plan through (i) the development of an innovative payment model for emergency medical services that covers the transportation of a patient to a 51 destination providing services of appropriate patient acuity and facilitates in-place treatment of a patient 52 53 at the scene of an emergency response or via telehealth services and telemedicine services, where 54 appropriate; (ii) the development of collaborative and uniform operating procedures for establishing and 55 recording informed patient consent for the use of telehealth services and telemedicine services that are 56 easily accessible by those medical professionals engaging in telehealth services and telemedicine

57 services; and (iii) appropriate liability protection for providers involved in such telehealth and58 telemedicine consultation and treatment; and

6. A strategy for the collection of data regarding the use of telehealth services and telemedicine 59 60 services in the delivery of inpatient and outpatient services, treatment of chronic illnesses, remote patient monitoring, and emergency medical services to determine the effect of use of telehealth services and 61 telemedicine services on the medical service system in the Commonwealth, including (i) the potential for 62 reducing unnecessary inpatient hospital stays, particularly among patients with chronic illnesses or 63 conditions; (ii) the impact of the use of telehealth services and telemedicine services on patient 64 65 morbidity, mortality, and quality of life; (iii) the potential for reducing unnecessary prehospital and interhospital transfers; and (iv) the impact on annual expenditures for health care services for all payers, 66 including expenditures by third-party payers and out-of-pocket expenditures by patients. 67
