**§ 10.1-1103.1. Forest Conservation Plan.**

*A. The Department shall establish a Forest Conservation Plan (the Plan) to conserve the Commonwealth's forest resources that identifies and incentivizes the protection of forests and other similar sensitive natural areas as an integral part of state forestry planning and the local comprehensive planning process. In developing the Plan, the Department shall (i) examine the current status and trends of forests and tree canopies in the Commonwealth; (ii) identify threats to forest and tree canopy conservation efforts including development, climate change, and invasive species; (iii) identify priority forests for conservation using the Department's Forest Conservation Value Model; (iv) incorporate local forest-related and tree canopy-related goals; (v) identify current and potential funding streams and state and local entities that will be vital to achieve forest and tree canopy conservation goals; and (vi) prioritize potential forest conservation efforts in areas adjacent to streams or wetlands, areas with steep slopes or highly erodible soils, and areas adjacent to wildlife corridors or large contiguous blocks of forest.*

*B. The Plan shall be developed in coordination with a stakeholder advisory group that shall include representatives from the Department of Environmental Quality, agricultural and forestry industries, environmental and conservation organizations, local governments, the Virginia Cooperative Extension, professional environmental technical experts, and other stakeholders as the Department deems appropriate.*

*C. The Department shall update the Plan at least once every five years. Following any such update, the Plan shall be made available on its website and submitted to the Governor and the Chairmen of the House Committee on Agriculture, Chesapeake and Natural Resources and the Senate Committee on Agriculture, Conservation and Natural Resources.*
