## **1996 SESSION**

## INTRODUCED

	961124132
1	HOUSE BILL NO. 1440
1 2 3	Offered January 22, 1996
3	A BILL to require the Department of Medical Assistance Services, in cooperation with the Department
4	of Education to examine the funding and components of the pilot school/community health centers.
5	
6	Patron—Bloxom
7	
8	Referred to Committee on Health, Welfare and Institutions
9	
10	Whereas, several years ago, the General Assembly authorized the development of a limited number
11	of pilot school/community health centers, by leveraging Medicaid funds and appropriating state funds for
12	the initial implement of such centers; and
13	Whereas, in some rural communities, the school/community health centers are virtually the only
14	service delivery for poor children; and
15	Whereas, the effectiveness of these centers can be attested to; however, the original concept of
16	appropriations to the localities in the form of grants for the state share and Medicaid payments for
17	services representing the federal share may need to be evaluated; now, therefore,
18	Be it enacted by the General Assembly of Virginia:
19	<b>1.</b> <i>§1. Pilot school/community health centers.</i>
20	The Department of Medical Assistance Services, in cooperation with the Department of Education
21 22	shall, consistent with the biennium budget cycle, examine and revise the funding and components of the
$\frac{22}{23}$	pilot school/community health centers. Revisions shall be designed to maximize access to health care for poor children, and to improve the funding by making use of every possible, cost-effective means,
23 24	Medicaid reimbursement or program. Any revisions shall be focused on prevention of large costs for
25	acute or medical care and shall include, but not be limited to:
26	1. Funding sources and means of distribution for the state match which will clearly demonstrate that
27	local governments are not funding the state match for these centers.
28	2. The benefits and drawbacks of allowing school divisions to provide services to disabled students
29	as Medicaid providers.
30	3. The appropriate credentials of the providers of care in the school health centers, e.g., licensure by
31	the Board of Education and compliance with federal requirements or licensure by a regulatory board
32	within the Department of Health Professions.
33	4. Utilization of the individualized education plan, when signed by a physician, as the plan of care
34	authorizing services.
35	5. Delivery of medically necessary services, such as rehabilitation services, psychiatric and
36	psychological evaluations and therapy, transportation, nursing.
37	6. Payment for Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services, with
38 39	proper medical oversight. 7. The role of the Medallion and Options programs in regard to the school health centers.
<b>40</b>	Any funds necessary to support revisions to the school/community health center projects shall be
41	included in the budget estimates for the departments, as appropriate, for the next biennium budget.
11	nonnea in the budget estimates for the acpartments, as appropriate, for the next biennam budget.
