## HOUSE BILL NO. 2481

House Amendments in [ ] — January 28, 1997

*A BILL to amend and reenact § 22.1-199.1 of the Code of Virginia, relating to programs to promote educational opportunities.*

Patrons—Van Landingham, Abbitt, Almand, Armstrong, Bennett, Christian, Clement, Connally, Cooper, Cranwell, Crittenden, Croshaw, Cunningham, Darner, Davies, DeBoer, Deeds, Dillard, Grayson, Hall, Heilig, Hull, Jackson, Johnson, Keating, Lovelace, McEachin, Melvin, Moore, Moran, Murphy, Phillips, Plum, Puller, Robinson, Scott, Shuler, Spruill, Stump, Tate, Van Yahres, Watts and Woodrum; Senators: Couric, Houck, Howell, Maxwell, Miller, Y.B., Reynolds and Ticer

Referred to Committee on Education

**Be it enacted by the General Assembly of Virginia:****1. That § 22.1-199.1 of the Code of Virginia is amended and reenacted as follows:**

§ 22.1-199.1. Programs designed to promote educational opportunities.

A. The General Assembly finds that Virginia educational research supports the conclusion that poor children are more at risk of educational failure than children from more affluent homes and that reduced pupil-teacher ratios and class sizes result in improved academic performance among young children; to this end, the General Assembly establishes a long-term goal of reducing pupil-teacher ratios and class sizes for grades K through 3 in those schools in the Commonwealth with high or moderate concentrations of at-risk students.

Effective July 1, 1996, and with such funds as are provided in the Appropriation Act for this purpose, there is hereby established the statewide voluntary pupil-teacher ratio and class size reduction program for the purpose of reaching the long-term goal of statewide voluntary pupil-teacher ratio and class size reductions for grades K through 3 in schools with high or moderate concentrations of at-risk students, consistent with the provisions first provided during the 1994-1995 school year.

In order to facilitate these primary grade ratio and class size reductions, the Department of Education shall calculate the state funding of these voluntary ratio and class size reductions based on the incremental cost of providing the lower class sizes according to the greater of the division average per-pupil cost of all divisions or the actual division per-pupil cost. Localities shall provide matching funds for these voluntary ratio and class size reductions based on the composite index of local ability to pay. School divisions shall notify the Department of Education of their intention to implement the reduced ratios and class sizes in one or more of their qualifying schools by August 1 of each year. By March 31 of each year, school divisions shall forward data substantiating that each participating school has a complying pupil-teacher ratio.

In developing the proposed 1996-1998 biennium budget for public education, the Board of Education shall include funding for these ratios and class sizes. Effective July 1, 1996, the ratios and class sizes shall be included in the annual budget for public education.

B. The General Assembly finds that educational technology is one of the most important components, along with highly skilled teachers, in ensuring the delivery of quality public school education throughout the Commonwealth ~~and~~. *Further, the General Assembly notes that education technology can only be successful if teachers and administrators are provided adequate training and assistance.* To this end, the following program is established. With such funds as are appropriated for this purpose, the Board of Education shall award to the several school divisions grants for expanded access to educational technology. Funding for educational technology training for instructional personnel shall be provided as set forth in the Appropriation Act, *including funds for providing a technology resource assistant for every elementary school in this Commonwealth beginning on July 1, 1998. Any local school board accepting [ these ] funds to hire such technology resource assistants shall commit to providing the required matching funds, based on the composite index of local ability to pay.* Each qualifying school board shall establish an individualized technology plan, which shall be approved by the Superintendent of Public Instruction, for integrating technology into the classroom and into schoolwide instructional programs. The grants shall be prioritized as follows:

1. In the 1994 biennium, the first priority for these funds shall be to automate the library media centers and provide network capabilities in Virginia's elementary, middle and high schools, or combination thereof, in order to ensure access to the statewide library and other information networks. If any elementary, middle or high school has already met this priority, the 1994 biennium grant shall be used to provide other educational technologies identified in the relevant division's approved technology plan, such as multimedia and telecomputing packages, integrated learning systems, laptop computer loan

ENGROSSED

HB2481E

60 programs, vocational technology laboratories or other electronic techniques designed to enhance public  
61 education and to facilitate teacher training in and implementation of effective instructional technology.  
62 The Board shall also distribute, as provided in the Appropriation Act, funds to support the purchase of  
63 electronic reference materials for use in the statewide automated reference system.

64 2. In the 1996 biennium, the first priority for funding shall be consistent with those components of  
65 the Board of Education's revised six-year technology plan which focus on (i) retrofitting and upgrading  
66 existing school buildings to efficiently use educational technology; (ii) providing (a) one network-ready  
67 multimedia microcomputer for each classroom, (b) a five-to-one ratio of pupils to network-ready  
68 microcomputers, (c) graphing calculators and relevant scientific probes/sensors as required by the  
69 Standards of Learning, and (d) training and professional development on available technologies and  
70 software to all levels and positions; and (iii) assisting school divisions in developing integrated voice,  
71 video, and data-connectivity to local, national and international resources. This funding may be used to  
72 implement a local school division's long-range technology plan, at the discretion of the relevant school  
73 board, if the local plan meets or exceeds the goals and standards of the Board's revised six-year  
74 technology plan and has been approved by the Superintendent of Public Instruction.

75 3. The Departments of Education, Information Technology, and General Services shall coordinate  
76 master contracts for the purchase by local school boards of the aforementioned educational technologies  
77 and reference materials.

78 C. The General Assembly finds that effective prevention programs designed to assist children at risk  
79 of school failure and dropout are practical mechanisms for reducing violent and criminal activity and for  
80 ensuring that Virginia's children will reach adulthood with the skills necessary to succeed in the  
81 twenty-first century; to this end, the following program is hereby established. With such funds as are  
82 appropriated for this purpose, the General Assembly hereby establishes a grant program to be disbursed  
83 by the Department of Education to schools and community-based organizations to provide quality  
84 preschool programs for at-risk four-year-olds who are unserved by another such program. The grants  
85 shall be used to provide full-day and at least school-year programs for at-risk four-year-old children that  
86 include quality preschool education, health services, social services, parental involvement, and  
87 transportation. The Department of Education, in cooperation with such other state agencies which may  
88 coordinate child day care and early childhood programs, shall establish guidelines for quality preschool  
89 education and criteria for the service components, consistent with the findings of the November 1993  
90 study by the Board of Education, the Department of Education, and the Council on Child Day Care and  
91 Early Childhood Programs. During the 1995-96 fiscal year, the Board of Education shall, with such  
92 funds as are appropriated for this purpose, distribute grants, based on an allocation formula providing  
93 the state share of the grant per child, as specified in the Appropriation Act, for thirty percent of the  
94 unserved at-risk four-year-olds in the Commonwealth pursuant to the funding provided in the  
95 Appropriation Act. During the 1996-97 fiscal year, grants shall be distributed, with such funds as are  
96 appropriated for this purpose, based on an allocation formula providing the state share of the grant per  
97 child, as specified in the Appropriation Act, for sixty percent of the unserved at-risk four-year-olds in  
98 the Commonwealth, such sixty percent to be calculated by adding services for thirty percent more of the  
99 unserved at-risk children to the thirty percent of unserved at-risk children in each locality provided  
100 funding in the Appropriation Act.

101 In order for a locality to qualify for these grants, the local governing body shall commit to providing  
102 the required matching funds, based on the composite index of local ability to pay. Localities may use,  
103 for the purposes of meeting the local match, local expenditures for existing qualifying programs and  
104 shall also continue to pursue and coordinate other funding sources, including child care subsidies. Funds  
105 received through this program shall be used to supplement, not supplant, any funds currently provided  
106 for preschool programs within the locality.

107 D. The General Assembly finds that local autonomy in making decisions on local educational needs  
108 and priorities results in effective grass-roots efforts to improve education in the Commonwealth's public  
109 schools only when coupled with sufficient state funding; to this end, the following block grant program  
110 is hereby established. With such funds as are provided in the appropriations act, the Department of  
111 Education shall distribute block grants to localities to enable compliance with the Commonwealth's  
112 requirements for school divisions in effect on January 1, 1995. Therefore, for the purpose of such  
113 compliance, the block grant herein established shall consist of a sum equal to the amount appropriated  
114 in the appropriations act for the covered programs, including the at-risk add-on program; dropout  
115 prevention, specifically Project YES; Project Discovery; English as a second language programs,  
116 including programs for overage, nonschooled students; Advancement Via Individual Determination  
117 (AVID); the Homework Assistance Program; programs initiated under the Virginia Guaranteed  
118 Assistance Program, except that such funds shall not be used to pay any college expenses of  
119 participating students; Reading Recovery; and school/community health centers. Each school board may  
120 use any funds received through the block grant to implement the covered programs and other programs  
121 designed to save the Commonwealth's children from educational failure.
