

2008 SPECIAL SESSION II

INTRODUCED

083066616

HOUSE BILL NO. 6041

Offered June 23, 2008

A *BILL to amend and reenact § 33.1-70.3 of the Code of Virginia, relating to taking new streets into state secondary highway system.*

Patron—Marshall, R.G.

Referred to Committee on Rules

Be it enacted by the General Assembly of Virginia:

1. That § 33.1-70.3 of the Code of Virginia is amended and reenacted as follows:

§ 33.1-70.3. Requirements for taking new streets into state secondary highway system.

A. The local governing body of any county that has not withdrawn from the state secondary highway system or any town within which the Virginia Department of Transportation maintains the streets, may, by resolution, request the Commonwealth Transportation Board to take any new street into the secondary system of state highways for maintenance if such street has been developed and constructed in accordance with the Board's secondary street acceptance requirements. Only those streets constructed in compliance with the secondary street acceptance requirements shall be taken into the state secondary highway system for maintenance. The Board shall promulgate regulations establishing such secondary street acceptance requirements. The secondary street acceptance requirements established pursuant to this section shall include such provisions as the Board deems necessary or appropriate to achieve the safe and efficient operation of the Commonwealth's transportation network. *For purposes of this subsection, the term "new street" shall not include any (i) public way for purposes of vehicular travel that, after January 1, 2009, results from the subdivision of land, including the entire area within the right-of-way, or (ii) street that is developed and constructed after January 1, 2009, and that is primarily intended to access property abutting or in the immediate vicinity of the public way described in clause (i).*

B. In addition to such other provisions deemed necessary or appropriate by the Board, the regulations shall include, but not be limited to (i) requirements to ensure the connectivity of road and pedestrian networks with the existing and future transportation network; (ii) provisions to minimize stormwater runoff and impervious surface area, and (iii) provisions for performance bonding of new secondary streets and associated cost recovery fees.

C. No initial regulation establishing secondary street acceptance requirements pursuant to this section shall apply to subdivision plats and subdivision construction plans that have been submitted and accepted for review by the Virginia Department of Transportation on or before the effective date of such initial regulations. No locality shall be obligated to approve any subdivision plat or subdivision construction plans that are inconsistent with these regulations.
