

13104718D

HOUSE BILL NO. 2180

AMENDMENT IN THE NATURE OF A SUBSTITUTE
 (Proposed by the House Committee on Commerce and Labor
 on January 31, 2013)

(Patron Prior to Substitute—Delegate Rust)

A BILL to amend and reenact § 56-585.2 of the Code of Virginia, relating to electric utilities; renewable energy portfolio standard program.

Be it enacted by the General Assembly of Virginia:

1. That § 56-585.2 of the Code of Virginia is amended and reenacted as follows:

§ 56-585.2. Sale of electricity from renewable sources through a renewable energy portfolio standard program.

A. As used in this section:

"Qualified investment" means an expense incurred in the Commonwealth by a participating utility in conducting, either by itself or in partnership with institutions of higher education in the Commonwealth or with industrial or commercial customers that have established renewable energy research and development programs in the Commonwealth, research and development activities related to renewable or alternative energy sources, which expense (i) is designed to enhance the participating utility's understanding of emerging energy technologies and their potential impact on and value to the utility's system and customers within the Commonwealth; (ii) promotes economic development within the Commonwealth; (iii) supplements customer-driven alternative energy or energy efficiency initiatives; (iv) supplements alternative energy and energy efficiency initiatives at state or local governmental facilities in the Commonwealth; or (v) is designed to mitigate the environmental impacts of renewable energy projects.

"Renewable energy" shall have the same meaning ascribed to it in § 56-576, provided such renewable energy is (i) generated ~~or purchased~~ in the Commonwealth or in the interconnection region of the regional transmission entity of which the participating utility is a member, as it may change from time to time, *and purchased by a participating utility under a power purchase agreement; provided, however, that if such agreement was executed on or after July 1, 2013, the agreement shall expressly transfer ownership of renewable attributes, in addition to ownership of the energy, to the participating utility;* (ii) generated by a public utility providing electric service in the Commonwealth from a facility in which the public utility owns at least a 49 percent interest and that is located *in the Commonwealth, in the interconnection region of the regional transmission entity of which the participating utility is a member, or* in a control area adjacent to such interconnection region; or (iii) represented by renewable energy certificates. "Renewable energy" shall not include electricity generated from pumped storage, but shall include run-of-river generation from a combined pumped-storage and run-of-river facility.

"Renewable energy certificate" means either (i) a certificate issued by an affiliate of the regional transmission entity of which the participating utility is a member, as it may change from time to time, or any successor to such affiliate, and held or acquired by such utility, that validates the generation of renewable energy by eligible sources in the interconnection region of the regional transmission entity or (ii) a certificate issued by the Commission pursuant to subsection J and held or acquired by a participating utility, that validates a qualified investment made by the participating utility.

"Total electric energy sold in the base year" means total electric energy sold to Virginia jurisdictional retail customers by a participating utility in calendar year 2007, excluding an amount equivalent to the average of the annual percentages of the electric energy that was supplied to such customers from nuclear generating plants for the calendar years 2004 through 2006.

B. Any investor-owned incumbent electric utility may apply to the Commission for approval to participate in a renewable energy portfolio standard program, as defined in this section. The Commission shall approve such application if the applicant demonstrates that it has a reasonable expectation of achieving 12 percent of its base year electric energy sales from renewable energy sources during calendar year 2022, and 15 percent of its base year electric energy sales from renewable energy sources during calendar year 2025, as provided in subsection D.

C. It is in the public interest for utilities to achieve the goals set forth in subsection D, such goals being referred to herein as "RPS Goals". Accordingly, the Commission, in addition to providing recovery of incremental RPS program costs pursuant to subsection E, shall increase the fair combined rate of return on common equity for each utility participating in such program by a single Performance Incentive, as defined in subdivision A 2 of § 56-585.1, of 50 basis points whenever the utility attains an RPS Goal established in subsection D. Such Performance Incentive shall first be used in the calculation of a fair combined rate of return for the purposes of the immediately succeeding biennial review conducted pursuant to § 56-585.1 after any such RPS Goal is attained, and shall remain in effect if the

60 utility continues to meet the RPS Goals established in this section through and including the third
61 succeeding biennial review conducted thereafter. Any such Performance Incentive, if implemented, shall
62 be in lieu of any other Performance Incentive reducing or increasing such utility's fair combined rate of
63 return on common equity for the same time periods. However, if the utility receives any other
64 Performance Incentive increasing its fair combined rate of return on common equity by more than 50
65 basis points, the utility shall be entitled to such other Performance Incentive in lieu of this Performance
66 Incentive during the term of such other Performance Incentive. A utility shall receive double credit
67 toward meeting the renewable energy portfolio standard for energy derived from sunlight, from onshore
68 wind, or from facilities in the Commonwealth fueled primarily by animal waste, and triple credit toward
69 meeting the renewable energy portfolio standard for energy derived from offshore wind.

70 D. To qualify for the Performance Incentive established in subsection C, the total electric energy sold
71 by a utility to meet the RPS Goals shall be composed of the following amounts of electric energy or
72 renewable thermal energy equivalent from renewable energy sources, as adjusted for any sales volumes
73 lost through operation of the customer choice provisions of subdivision A 3 or A 4 of § 56-577:

74 RPS Goal I: In calendar year 2010, 4 percent of total electric energy sold in the base year.

75 RPS Goal II: For calendar years 2011 through 2015, inclusive, an average of 4 percent of total
76 electric energy sold in the base year, and in calendar year 2016, 7 percent of total electric energy sold in
77 the base year.

78 RPS Goal III: For calendar years 2017 through 2021, inclusive, an average of 7 percent of total
79 electric energy sold in the base year, and in calendar year 2022, 12 percent of total electric energy sold
80 in the base year.

81 RPS Goal IV: For calendar years 2023 and 2024, inclusive, an average of 12 percent of total electric
82 energy sold in the base year, and in calendar year 2025, 15 percent of total electric energy sold in the
83 base year.

84 A utility may not apply renewable energy certificates issued pursuant to subsection J to meet more
85 than 20 percent of the sales requirement for the RPS Goal in any year.

86 A utility may apply renewable energy sales achieved or renewable energy certificates acquired during
87 the periods covered by any such RPS Goal that are in excess of the sales requirement for that RPS Goal
88 to the sales requirements for any future RPS Goal.

89 E. A utility participating in such program shall have the right to recover all incremental costs
90 incurred for the purpose of such participation in such program, as accrued against income, through rate
91 adjustment clauses as provided in subdivisions A 5 and A 6 of § 56-585.1, including, but not limited to,
92 administrative costs, ancillary costs, capacity costs, costs of energy represented by certificates described
93 in subsection A, and, in the case of construction of renewable energy generation facilities, allowance for
94 funds used during construction until such time as an enhanced rate of return, as determined pursuant to
95 subdivision A 6 of § 56-585.1, on construction work in progress is included in rates, projected
96 construction work in progress, planning, development and construction costs, life-cycle costs, and costs
97 of infrastructure associated therewith, plus an enhanced rate of return, as determined pursuant to
98 subdivision A 6 of § 56-585.1. This subsection shall not apply to qualified investments as provided in
99 subsection K. All incremental costs of the RPS program shall be allocated to and recovered from the
100 utility's customer classes based on the demand created by the class and within the class based on energy
101 used by the individual customer in the class, except that the incremental costs of the RPS program shall
102 not be allocated to or recovered from customers that are served within the large industrial rate classes of
103 the participating utilities and that are served at primary or transmission voltage.

104 F. A utility participating in such program shall apply towards meeting its RPS Goals any renewable
105 energy from existing renewable energy sources owned by the participating utility or purchased as
106 allowed by contract at no additional cost to customers to the extent feasible. A utility participating in
107 such program shall not apply towards meeting its RPS Goals renewable energy certificates attributable to
108 any renewable energy generated at a renewable energy generation source in operation as of July 1, 2007,
109 that is operated by a person that is served within a utility's large industrial rate class and that is served
110 at primary or transmission voltage, except for those persons providing renewable thermal energy
111 equivalents to the utility. A participating utility shall be required to fulfill any remaining deficit needed
112 to fulfill its RPS Goals from new renewable energy supplies at reasonable cost and in a prudent manner
113 to be determined by the Commission at the time of approval of any application made pursuant to
114 subsection B. A participating utility may sell renewable energy certificates produced at its own
115 generation facilities located in the Commonwealth or, if located outside the Commonwealth, owned by
116 such utility and in operation as of January 1, 2010, or renewable energy certificates acquired as part of a
117 purchase power agreement, to another entity and purchase lower cost renewable energy certificates and
118 the net difference in price between the renewable energy certificates shall be credited to customers.
119 Utilities participating in such program shall collectively, either through the installation of new generating
120 facilities, through retrofit of existing facilities or through purchases of electricity from new facilities
121 located in Virginia, use or cause to be used no more than a total of 1.5 million tons per year of green

122 wood chips, bark, sawdust, a tree or any portion of a tree which is used or can be used for lumber and
 123 pulp manufacturing by facilities located in Virginia, towards meeting RPS goals, excluding such fuel
 124 used at electric generating facilities using wood as fuel prior to January 1, 2007. A utility with an
 125 approved application shall be allocated a portion of the 1.5 million tons per year in proportion to its
 126 share of the total electric energy sold in the base year, as defined in subsection A, for all utilities
 127 participating in the RPS program. A utility may use in meeting RPS goals, without limitation, the
 128 following sustainable biomass and biomass based waste to energy resources: mill residue, except wood
 129 chips, sawdust and bark; pre-commercial soft wood thinning; slash; logging and construction debris;
 130 brush; yard waste; shipping crates; dunnage; non-merchantable waste paper; landscape or right-of-way
 131 tree trimmings; agricultural and vineyard materials; grain; legumes; sugar; and gas produced from the
 132 anaerobic decomposition of animal waste.

133 G. The Commission shall promulgate such rules and regulations as may be necessary to implement
 134 the provisions of this section including a requirement that participants verify whether the RPS goals are
 135 met in accordance with this section.

136 H. Each investor-owned incumbent electric utility shall report to the Commission annually by
 137 November 1 identifying:

- 138 1. The utility's efforts, if any, to meet the RPS Goals, specifically identifying:
 - 139 a. A list of all states where the purchased or owned renewable energy was generated, specifying the
 - 140 number of megawatt hours or renewable energy certificates originating from each state;
 - 141 b. A list of the decades in which the purchased or owned renewable energy generating units were
 - 142 placed in service, specifying the number of megawatt hours or renewable energy certificates originating
 - 143 from those units; and
 - 144 c. A list of fuel types used to generate the purchased or owned renewable energy, specifying the
 - 145 number of megawatt hours or renewable energy certificates originating from each fuel type;
 - 146 2. The utility's overall generation of renewable energy; and
 - 147 3. Advances in renewable generation technology that affect activities described in subdivisions 1 and
 - 148 2.

149 I. The Commission shall post on its website the reports submitted by each investor-owned incumbent
 150 electric utility pursuant to subsection H.

151 J. The Commission shall issue to a participating utility a number of renewable energy certificates for
 152 qualified investments, upon request by a participating utility, if it finds that an expense satisfies the
 153 conditions set forth in this section for a qualified investment, as follows:

- 154 1. By March 31 of each year, the participating utility shall provide an analysis, as reasonably
 155 determined by a qualified independent broker, of the average for the preceding year of the publicly
 156 available prices for Tier 1 renewable energy certificates and Tier 2 renewable energy certificates,
 157 validating the generation of renewable energy by eligible sources, that were issued in the interconnection
 158 region of the regional transmission entity of which the participating utility is a member;
- 159 2. In the same annual analysis provided to the Commission, the participating utility shall divide the
 160 amount of the participating utility's qualified investments in the applicable period by the average price
 161 determined pursuant to subdivision 1;
- 162 3. The number of renewable energy certificates to be issued to the participating utility shall equal the
 163 product obtained pursuant to subdivision 2; and
- 164 4. The Commission shall review and validate the analysis provided by the participating utility within
 165 90 days of submittal of its analysis to the Commission. If no corrections are made by the Commission,
 166 then the analysis shall be deemed correct and the renewable energy certificates shall be deemed issued
 167 to the participating utility.

168 Each renewable energy certificate issued to a participating utility pursuant to this subsection shall
 169 represent the equivalent of one megawatt hour of renewable energy sales achieved when applied to an
 170 RPS Goal.

171 K. Qualified investments shall constitute reasonable and prudent operating expenses of a participating
 172 utility. Notwithstanding subsection E, a participating utility shall not be authorized to recover the costs
 173 associated with qualified investments through rate adjustment clauses as provided in subdivisions A 5
 174 and A 6 of § 56-585.1. In any proceeding conducted pursuant to § 56-585.1 or other provision of this
 175 title in which a participating utility seeks recovery of its qualified investments as an operating expense,
 176 the participating utility shall not be authorized to earn a return on its qualified investments.

177 L. A participating utility shall not be eligible for a research and development tax credit pursuant to
 178 § 58.1-439.12:08 with regard to any expense incurred or investment made by the participating utility that
 179 constitutes a qualified investment pursuant to this section.
