**8. Fiscal Implications:** This bill would have a fiscal impact on the Commonwealth. The increase in expenditures was calculated based on applications from approximately 75 outsourcing facilities. The agency states that the provisions of the bill would require a very specialized inspection, so training of a pharmacy inspector in standards of Good Manufacturing Practices is essential. The Board would rely on an inspection by the FDA for facilities located in other states, but a consultant familiar with the complexities of such an inspection would be employed to review those inspections and applications for a permit in Virginia. The bulk of the cost is for the first year of permitting outsourcing facilities, which would need to be inspected every two years.

All direct and allocated costs relating to licensure of outsourcing facilities by the Board of Pharmacy would be attributed to the budget of that board. Analyzing the data through FY 2020 indicates a fee increase will not be necessary. It is anticipated that fees charged to applicants and renewal fees for outsourcing facilities will cover approximately one third to one half of the projected cost. However, the Administrative Office Specialist position will also cover other work for the Board of Pharmacy, so some of the cost for that position can be attributable to other aspects of licensure and discipline.

It is not anticipated that the Board will require a fee increase through 2020 to absorb additional expenditures relating to licensure of outsourcing facilities.
