**HOUSE BILL NO. 533** 

Offered January 13, 2016

Prefiled January 9, 2016

A BILL to amend and reenact § 56-46.1 of the Code of Virginia, relating to State Corporation Commission; approval of electrical transmission lines; hearing.

Patrons-Bell, J.J. and Murphy

Referred to Committee on Commerce and Labor

10 Be it enacted by the General Assembly of Virginia:

1. That § 56-46.1 of the Code of Virginia is amended and reenacted as follows:

12 § 56-46.1. Commission to consider environmental, economic and improvements in service 13 reliability factors in approving construction of electrical utility facilities; approval required for 14 construction of certain electrical transmission lines; notice and hearings.

15 A. Whenever the Commission is required to approve the construction of any electrical utility facility, it shall give consideration to the effect of that facility on the environment and establish such conditions 16 as may be desirable or necessary to minimize adverse environmental impact. In order to avoid 17 18 duplication of governmental activities, any valid permit or approval required for an electric generating plant and associated facilities issued or granted by a federal, state or local governmental entity charged 19 20 by law with responsibility for issuing permits or approvals regulating environmental impact and 21 mitigation of adverse environmental impact or for other specific public interest issues such as building 22 codes, transportation plans, and public safety, whether such permit or approval is granted prior to or 23 after the Commission's decision, shall be deemed to satisfy the requirements of this section with respect 24 to all matters that (i) are governed by the permit or approval or (ii) are within the authority of, and were 25 considered by, the governmental entity in issuing such permit or approval, and the Commission shall impose no additional conditions with respect to such matters. Nothing in this section shall affect the 26 27 ability of the Commission to keep the record of a case open. Nothing in this section shall affect any 28 right to appeal such permits or approvals in accordance with applicable law. In the case of a proposed 29 facility located in a region that was designated as of July 1, 2001, as serious nonattainment for the one-hour ozone standard as set forth in the federal Clean Air Act, the Commission shall not issue a 30 31 decision approving such proposed facility that is conditioned upon issuance of any environmental permit or approval. In every proceeding under this subsection, the Commission shall receive and give 32 33 consideration to all reports that relate to the proposed facility by state agencies concerned with environmental protection; and if requested by any county or municipality in which the facility is 34 proposed to be built, to local comprehensive plans that have been adopted pursuant to Article 3 (§ 15.2-2223 et seq.) of Chapter 22 of Title 15.2. Additionally, the Commission (a) shall consider the 35 36 37 effect of the proposed facility on economic development within the Commonwealth, including but not 38 limited to furtherance of the economic and job creation objectives of the Commonwealth Energy Policy 39 set forth in §§ 67-101 and 67-102, and (b) shall consider any improvements in service reliability that 40 may result from the construction of such facility.

41 B. Subject to the provisions of subsection J, no electrical transmission line of 138 kilovolts or more 42 shall be constructed unless the State Corporation Commission shall, after at least 30 days' advance notice by (i) publication in a newspaper or newspapers of general circulation in the counties and 43 municipalities through which the line is proposed to be built, (ii) written notice to the governing body of 44 45 each such county and municipality, and (iii) causing to be sent a copy of the notice by first class mail to 46 all owners of property within the route of the proposed line, as indicated on the map or sketch of the 47 route filed with the Commission, which requirement shall be satisfied by mailing the notice to such 48 persons at such addresses as are indicated in the land books maintained by the commissioner of revenue, 49 director of finance or treasurer of the county or municipality, approve such line. Such notices shall include a written description of the proposed route the line is to follow, as well as a map or sketch of 50 51 the route including a digital geographic information system (GIS) map provided by the public utility 52 showing the location of the proposed route. The Commission shall make GIS maps provided under this 53 subsection available to the public on the Commission's website. Such notices shall be in addition to the advance notice to the chief administrative officer of the county or municipality required pursuant to 54 55 § 15.2-2202. As a condition to approval the Commission shall determine that the line is needed and that the corridor or route the line is to follow will reasonably minimize adverse impact on the scenic assets, 56 historic districts and environment of the area concerned. To assist the Commission in this determination, 57 58 as part of the application for Commission approval of the line, the applicant shall summarize its efforts

HB533

82

59 to reasonably minimize adverse impact on the scenic assets, historic districts, and environment of the

60 area concerned. In making the determinations about need, corridor or route, and method of installation, the Commission shall verify the applicant's load flow modeling, contingency analyses, and reliability 61 needs presented to justify the new line and its proposed method of installation. If the local 62 63 comprehensive plan of an affected county or municipality designates corridors or routes for electric 64 transmission lines and the line is proposed to be constructed outside such corridors or routes, in any 65 hearing the county or municipality may provide adequate evidence that the existing planned corridors or routes designated in the plan can adequately serve the needs of the company. Additionally, the 66 Commission shall consider, upon the request of the governing body of any county or municipality in 67 which the line is proposed to be constructed, (a) the costs and economic benefits likely to result from 68 requiring the underground placement of the line and (b) any potential impediments to timely 69 70 construction of the line.

71 C. If, prior to such approval, any interested party shall request a public hearing, the Commission shall, as soon as reasonably practicable after such request, hold such hearing or hearings at such place as 72 73 may be designated by the Commission. In any hearing the public service company shall provide 74 adequate evidence that existing rights-of-way cannot adequately serve the needs of the company.

75 If, prior to such approval, written requests therefor are received from the governing body of any county or municipality through which the line is proposed to be built or from 20 or more interested 76 parties, the Commission shall hold at least one hearing in the area which that would be affected by 77 construction of the line, for the purpose of receiving public comment on the proposal. If any hearing is 78 to be held in the area affected, the Commission shall direct that a copy of the transcripts of any 79 previous hearings held in the case be made available for public inspection at a convenient location in the 80 81 area for a reasonable time before such local hearing.

D. As used in this section, unless the context requires a different meaning:

"Environment" or "environmental" shall be deemed to include in meaning "historic," as well as a 83 consideration of the probable effects of the line on the health and safety of the persons in the area 84 85 concerned.

86 "Interested parties" shall include the governing bodies of any counties or municipalities through 87 which the line is proposed to be built, and persons residing or owning property in each such county or 88 municipality. 89

"Public utility" means a public utility as defined in § 56-265.1.

90 "Qualifying facilities" means a cogeneration or small power production facility which meets the 91 criteria of 18 C.F.R. Part 292. 92

"Reasonably accommodate requests to wheel or transmit power" means:

93 1. That the applicant will make available to new electric generation facilities constructed after 94 January 9, 1991, qualifying facilities and other nonutilities, a minimum of one-fourth of the total 95 megawatts of the additional transmission capacity created by the proposed line, for the purpose of wheeling to public utility purchasers the power generated by such qualifying facilities and other 96 nonutility facilities which are awarded a power purchase contract by a public utility purchaser in 97 98 compliance with applicable state law or regulations governing bidding or capacity acquisition programs for the purchase of electric capacity from nonutility sources, provided that the obligation of the applicant 99 will extend only to those requests for wheeling service made within the 12 months following 100 101 certification by the State Corporation Commission of the transmission line and with effective dates for 102 commencement of such service within the 12 months following completion of the transmission line; and

103 2. That the wheeling service offered by the applicant, pursuant to subdivision D 1, will reasonably further the purposes of the Public Utilities Regulatory Policies Act of 1978 (P. L. 95-617), as 104 demonstrated by submitting to the Commission, with its application for approval of the line, the cost 105 methodologies, terms, conditions, and dispatch and interconnection requirements the applicant intends, 106 subject to any applicable requirements of the Federal Energy Regulatory Commission, to include in its 107 108 agreements for such wheeling service.

109 E. In the event that, at any time after the giving of the notice required in subsection B, it appears to the Commission that consideration of a route or routes significantly different from the route described in 110 111 the notice is desirable, the Commission shall cause notice of the new route or routes to be published and mailed in accordance with subsection B. The Commission shall thereafter comply with the provisions of 112 113 this section with respect to the new route or routes to the full extent necessary to give affected localities and interested parties in the newly affected areas the same protection afforded to affected localities and 114 115 interested parties affected by the route described in the original notice.

F. Approval of a transmission line pursuant to this section shall be deemed to satisfy the 116 requirements of § 15.2-2232 and local zoning ordinances with respect to such transmission line. 117

G. The Commission shall enter into a memorandum of agreement with the Department of 118 119 Environmental Quality regarding the coordination of their reviews of the environmental impact of 120 electric generating plants and associated facilities.

121 H. An applicant that is required to obtain (i) a certificate of public convenience and necessity from 122 the Commission for any electric generating facility, electric transmission line, natural or manufactured 123 gas transmission line as defined in 49 Code of Federal Regulations § 192.3, or natural or manufactured 124 gas storage facility (hereafter, an energy facility) and (ii) an environmental permit for the energy facility 125 that is subject to issuance by any agency or board within the Secretariat of Natural Resources, may 126 request a pre-application planning and review process. In any such request to the Commission or the 127 Secretariat of Natural Resources, the applicant shall identify the proposed energy facility for which it 128 requests the pre-application planning and review process. The Commission, the Department of 129 Environmental Quality, the Marine Resources Commission, the Department of Game and Inland 130 Fisheries, the Department of Historic Resources, the Department of Conservation and Recreation, and other appropriate agencies of the Commonwealth shall participate in the pre-application planning and 131 132 review process. Participation in such process shall not limit the authority otherwise provided by law to the Commission or other agencies or boards of the Commonwealth. The Commission and other 133 134 participating agencies of the Commonwealth may invite federal and local governmental entities charged 135 by law with responsibility for issuing permits or approvals to participate in the pre-application planning 136 and review process. Through the pre-application planning and review process, the applicant, the Commission, and other agencies and boards shall identify the potential impacts and approvals that may 137 138 be required and shall develop a plan that will provide for an efficient and coordinated review of the 139 proposed energy facility. The plan shall include (a) a list of the permits or other approvals likely to be 140 required based on the information available, (b) a specific plan and preliminary schedule for the 141 different reviews, (c) a plan for coordinating those reviews and the related public comment process, and 142 (d) designation of points of contact, either within each agency or for the Commonwealth as a whole, to 143 facilitate this coordination. The plan shall be made readily available to the public and shall be 144 maintained on a dedicated website to provide current information on the status of each component of the 145 plan and each approval process including opportunities for public comment.

146 I. The provisions of this section shall not apply to the construction and operation of a small
147 renewable energy project, as defined in § 10.1-1197.5, by a utility regulated pursuant to this title for
148 which the Department of Environmental Quality has issued a permit by rule pursuant to Article 5
149 (§ 10.1-1197.5 et seq.) of Chapter 11.1 of Title 10.1.

**150** J. Approval under this section shall not be required for any transmission line for which a certificate **151** of public convenience and necessity is not required pursuant to subdivision A of § 56-265.2.
