**8. Fiscal Implications:** This bill would have a revenue impact on the Commonwealth. The bill removes language classifying facilities that perform five or more first-trimester abortions per month as hospitals for the purpose of complying with regulations establishing minimum standards for hospitals. First trimester abortion facilities, classified as hospitals, currently have biennial inspection requirements with an annual licensing fee. The removal of this requirement presents a revenue loss of a \$75 licensure fee for each of the 14 facilities, or a total of \$1,050 each year. It is assumed that the agency can absorb any reduction in licensing fee revenue. The workload attributed to these inspections is estimated to be half a position, however, there are additional licensure procedures for which this position can be repurposed. Therefore, this bill would not affect expenditures, as this work will be replaced by other licensure inspections.

The Department of Corrections' health plans do not provide elective abortions, therefore the provisions of the bill should not impact the agency.

**9. Specific Agency or Political Subdivisions Affected:** Department of Health.

**10. Technical Amendment Necessary:** No.

**11. Other Comments:** This FIS was revised to correct grammar inaccuracies.
