

VIRGINIA ACTS OF ASSEMBLY -- 2023 SESSION

CHAPTER 738

An Act to amend and reenact §§ 15.2-968.1 and 46.2-208 of the Code of Virginia, relating to traffic control device violation monitoring systems.

[S 861]

Approved March 27, 2023

Be it enacted by the General Assembly of Virginia:

1. That §§ 15.2-968.1 and 46.2-208 of the Code of Virginia are amended and reenacted as follows:

§ 15.2-968.1. Use of violation monitoring systems to enforce traffic light signals and certain traffic control devices.

A. For purposes of this section:

"Owner" means the registered owner on record with the Department of Motor Vehicles.

"Traffic control device" has the same meaning as set forth in § 46.2-100.

"Traffic control device violation monitoring system" means equipment that produces one or more photographs, microphotographs, video, or other recorded images of vehicles used or operated in violation of signs or markings placed in accordance with § 46.2-830. Traffic control device violation monitoring systems shall not be used to enforce violations of traffic light signals or speed limits.

"Traffic light signal violation monitoring system" means a vehicle sensor installed to work in conjunction with a traffic light that automatically produces two or more photographs, two or more microphotographs, video, or other recorded images of each vehicle at the time it is used or operated in violation of § 46.2-833, 46.2-835, or 46.2-836. For each such vehicle, at least one recorded image shall be of the vehicle before it has illegally entered the intersection, and at least one recorded image shall be of the same vehicle after it has illegally entered the intersection.

B. 1. The governing body of any county, city, or town may provide by ordinance for the establishment of a traffic signal enforcement program imposing monetary liability on the operator of a motor vehicle for failure to comply with traffic light signals in such locality in accordance with the provisions of this section. Each such locality may install and operate traffic light signal ~~photo-monitoring~~ violation monitoring systems at no more than one intersection for every 10,000 residents within each county, city, or town at any one time, provided, however, that within planning District 8, each such locality may install and operate traffic light signal ~~photo-monitoring~~ violation monitoring systems at no more than 10 intersections, or at no more than one intersection for every 10,000 residents within each county, city, or town, whichever is greater, at any one time.

2. In addition to the authority provided in subdivision 1, the governing body of any locality in Planning District 23 may provide by ordinance for the establishment of a traffic control device violation monitoring system imposing monetary liability on the operator of a motor vehicle for failure to comply with traffic control devices in such locality in accordance with the provisions of this section. Such governing body may install and operate a traffic control device violation monitoring system at any intersection deemed by the governing body to be negatively impacted by traffic due to the Hampton Roads Bridge-Tunnel Express Lanes Hampton Segment (4C) Project (HREL-P).

~~B.~~ *C. The operator of a vehicle shall be liable for a monetary penalty imposed pursuant to this section if such vehicle is found, (i) as evidenced by information obtained from a traffic light signal violation monitoring system, to have failed to comply with a traffic light signal within such locality or (ii) as evidenced by information obtained from a traffic control device violation monitoring system, to have failed to comply with a traffic control device within such locality. No operator shall be liable for a penalty pursuant to clause (i) and a penalty pursuant to clause (ii) arising out of the same act. No monetary penalty shall be imposed pursuant to this section for a first offense of failing to comply with a traffic control device, as evidenced by information obtained from a traffic control device violation monitoring system, and such operator shall be issued a written warning.*

~~C.~~ *D. Proof of a violation of this section shall be evidenced by information obtained from a traffic light signal violation monitoring system or traffic control device violation monitoring system authorized pursuant to this section. A certificate, sworn to or affirmed by a law-enforcement officer employed by a locality authorized to impose penalties pursuant to this section, or a facsimile thereof, based upon inspection of photographs, microphotographs, videotape, or other recorded images produced by a traffic light signal violation monitoring system or traffic control device violation monitoring system, shall be prima facie evidence of the facts contained therein. Any photographs, microphotographs, videotape, or other recorded images evidencing such a violation shall be available for inspection in any proceeding to adjudicate the liability for such violation pursuant to an ordinance adopted pursuant to this section.*

~~D.~~ *E. In the prosecution for a violation of any local ordinance adopted as provided in this section, prima facie evidence that the vehicle described in the summons issued pursuant to this section was*

operated in violation of such ordinance, together with proof that the defendant was at the time of such violation the owner, lessee, or renter of the vehicle, shall constitute in evidence a rebuttable presumption that such owner, lessee, or renter of the vehicle was the person who committed the violation. Such presumption shall be rebutted if the owner, lessee, or renter of the vehicle (i) files an affidavit by regular mail with the clerk of the general district court that he was not the operator of the vehicle at the time of the alleged violation or (ii) testifies in open court under oath that he was not the operator of the vehicle at the time of the alleged violation. Such presumption shall also be rebutted if a certified copy of a police report, showing that the vehicle had been reported to the police as stolen prior to the time of the alleged violation of this section, is presented, prior to the return date established on the summons issued pursuant to this section, to the court adjudicating the alleged violation.

E. For purposes of this section, "owner" means the registered owner of such vehicle on record with the Department of Motor Vehicles. For purposes of this section, "traffic light signal violation monitoring system" means a vehicle sensor installed to work in conjunction with a traffic light that automatically produces two or more photographs, two or more microphotographs, video, or other recorded images of each vehicle at the time it is used or operated in violation of § 46.2-833, 46.2-835, or 46.2-836. For each such vehicle, at least one recorded image shall be of the vehicle before it has illegally entered the intersection, and at least one recorded image shall be of the same vehicle after it has illegally entered that intersection.

F. Imposition of a penalty pursuant to this section shall not be deemed a conviction as an operator and shall not be made part of the operating record of the person upon whom such liability is imposed, nor shall it be used for insurance purposes in the provision of motor vehicle insurance coverage. No monetary penalty imposed under this section shall exceed \$50, nor shall it include court costs. Any finding in a district court that an operator has violated an ordinance adopted as provided in this section shall be appealable to the circuit court in a civil proceeding.

G. A summons for a violation of this section may be executed pursuant to § 19.2-76.2. Notwithstanding the provisions of § 19.2-76, a summons for a violation of this section may be executed by mailing by first class mail a copy thereof to the owner, lessee, or renter of the vehicle. In the case of a vehicle owner, the copy shall be mailed to the address contained in the records of the Department of Motor Vehicles; in the case of a vehicle lessee or renter, the copy shall be mailed to the address contained in the records of the lessor or renter. Every such mailing shall include, in addition to the summons, a notice of (i) the summoned person's ability to rebut the presumption that he was the operator of the vehicle at the time of the alleged violation through the filing of an affidavit as provided in subsection D E and (ii) instructions for filing such affidavit, including the address to which the affidavit is to be sent. If the summoned person fails to appear on the date of return set out in the summons mailed pursuant to this section, the summons shall be executed in the manner set out in § 19.2-76.3. No proceedings for contempt or arrest of a person summoned by mailing shall be instituted for failure to appear on the return date of the summons. Any summons executed for a violation of this section shall provide to the person summoned at least 30 business days from the mailing of the summons to inspect information collected by a traffic light signal violation monitoring system *or traffic control device violation monitoring system* in connection with the violation.

H. Information collected by a traffic light signal violation monitoring system *or traffic control device violation monitoring system* installed and operated pursuant to subsection A B shall be limited exclusively to that information that is necessary for the enforcement of traffic light *or traffic control device* violations. On behalf of a locality, a private entity that operates a traffic light signal violation monitoring system *or traffic control device violation monitoring system* may enter into an agreement with the Department of Motor Vehicles, in accordance with the provisions of subdivision B 21 of § 46.2-208, to obtain vehicle owner information regarding the registered owners of vehicles that fail to comply with a traffic light signal *or traffic control device*. Information provided to the operator of a traffic light signal violation monitoring system *or traffic control device violation monitoring system* shall be protected in a database with security comparable to that of the Department of Motor Vehicles' system, and used only for enforcement against individuals who violate the provisions of this section. Notwithstanding any other provision of law, all photographs, microphotographs, electronic images, or other personal information collected by a traffic light signal violation monitoring system *or traffic control device violation monitoring system* shall be used exclusively for enforcing traffic light *or traffic control device* violations and shall not (i) be open to the public; (ii) be sold or used for sales, solicitation, or marketing purposes; (iii) be disclosed to any other entity except as may be necessary for the enforcement of a traffic light *or traffic control device* violation or to a vehicle owner or operator as part of a challenge to the violation; or (iv) be used in a court in a pending action or proceeding unless the action or proceeding relates to a violation of § 46.2-830, 46.2-833, 46.2-835, or 46.2-836 or requested upon order from a court of competent jurisdiction. Information collected under this section pertaining to a specific violation shall be purged and not retained later than 60 days after the collection of any civil penalties. If a locality does not execute a summons for a violation of this section within 10 business days, all information collected pertaining to that suspected violation shall be purged within two business days. Any locality operating a traffic light signal violation monitoring system *or traffic control*

device violation monitoring system shall annually certify compliance with this section and make all records pertaining to such system available for inspection and audit by the Commissioner of Highways or the Commissioner of the Department of Motor Vehicles or his designee. Any person who discloses personal information in violation of the provisions of this subsection shall be subject to a civil penalty of \$1,000 per disclosure. Any unauthorized use or disclosure of such personal information shall be grounds for termination of the agreement between the Department of Motor Vehicles and the private entity.

I. A private entity may enter into an agreement with a locality to be compensated for providing the traffic light signal violation monitoring system or equipment *or traffic control device violation monitoring system or equipment*, and all related support services, to include consulting, operations and administration. However, only a law-enforcement officer employed by a locality may swear to or affirm the certificate required by subsection *E D*. No locality shall enter into an agreement for compensation based on the number of violations or monetary penalties imposed.

J. When selecting potential intersections for a traffic light signal violation monitoring system, a locality shall consider factors such as (i) the accident rate for the intersection, (ii) the rate of red light violations occurring at the intersection (number of violations per number of vehicles), (iii) the difficulty experienced by law-enforcement officers in patrol cars or on foot in apprehending violators, and (iv) the ability of law-enforcement officers to apprehend violators safely within a reasonable distance from the violation. Localities may consider the risk to pedestrians as a factor, if applicable.

K. 1. Before the implementation of a traffic light signal violation monitoring system at an intersection, the locality shall complete an engineering safety analysis that addresses signal timing and other location-specific safety features. The length of the yellow phase shall be established based on the recommended methodology of the Institute of Transportation Engineers. No traffic light signal violation monitoring system shall be implemented or utilized for a traffic signal having a yellow signal phase length of less than three seconds. All traffic light signal violation monitoring systems shall provide a minimum 0.5-second grace period between the time the signal turns red and the time the first violation is recorded. If recommended by the engineering safety analysis, the locality shall make reasonable location-specific safety improvements, including signs and pavement markings.

2. *Before the implementation of a traffic control device violation monitoring system at an intersection, the governing body of the implementing locality shall complete an engineering safety analysis that addresses the impact of the HREL-P on congestion, accident rates, and driver disregard for traffic control devices. If recommended by the engineering safety analysis, the locality shall make reasonable location-specific safety improvements, including signs and pavement markings.*

L. Any locality that uses a traffic light signal violation monitoring system *or traffic control device violation monitoring system* shall evaluate the system on a monthly basis to ensure all cameras and traffic signals are functioning properly. Evaluation results shall be made available to the public.

M. Any locality that uses a traffic light signal violation monitoring system to enforce traffic light signals shall place conspicuous signs within 500 feet of the intersection approach at which a traffic light signal violation monitoring system is used. There shall be a rebuttable presumption that such signs were in place at the time of the commission of the traffic light signal violation.

N. Prior to or coincident with the implementation or expansion of a traffic light signal violation monitoring system *or traffic control device violation monitoring system*, a locality shall conduct a public awareness program, advising the public that the locality is implementing or expanding a traffic light signal violation monitoring system *or traffic control device violation monitoring system*.

O. Notwithstanding any other provision of this section, if a vehicle depicted in images recorded by a traffic light signal ~~photo-monitoring system~~ *violation monitoring system or traffic control device violation monitoring system* is owned, leased, or rented by a county, city, or town, then the county, city, or town may access and use the recorded images and associated information for employee disciplinary purposes.

No such report of any conviction or crash shall be made after 60 months from the date of the conviction or crash unless the Commissioner or court used the conviction or crash as a reason for the suspension or revocation of a driver's license or driving privilege, in which case the revocation or suspension and any conviction or crash pertaining thereto shall not be reported after 60 months from the date that the driver's license or driving privilege has been reinstated. The response of the Commissioner under this subdivision shall not be admissible in evidence in any court proceedings.

6. Upon the written request of any business organization or its authorized agent, in the conduct of its business, the Commissioner shall compare personal information supplied by the requester with that contained in the Department's records and, when the information supplied by the requester is different from that contained in the Department's records, provide the requester with correct information as contained in the Department's records. No such information shall include any record of any conviction or crash more than 60 months after the date of such conviction or crash unless the Commissioner or court used the conviction or crash as a reason for the suspension or revocation of a driver's license or driving privilege, in which case the revocation or suspension and any conviction or crash pertaining thereto shall cease to be included in such information after 60 months from the date on which the driver's license or driving privilege was reinstated. The response of the Commissioner under this subdivision shall not be admissible in evidence in any court proceedings.

However, the Commissioner shall not release any photographs pursuant to this subdivision unless the requester provides the depicted individual's name and other sufficient identifying information contained on such

individual's record. The information in this subdivision shall be provided free of charge.

The Department shall release to a requester information that is required for a requester to carry out the requester's official functions in accordance with this subdivision. If the requester has entered into an agreement with the Department, such agreement shall be in a manner prescribed by the Department, and such agreement shall contain the legal authority that authorizes the performance of the requester's official functions and a description of how such information will be used to carry out such official functions. If the Commissioner determines that sufficient authority has not been provided by the requester to show that the purpose for which the information shall be used is one of the requester's official functions, the Commissioner shall refuse to enter into any agreement. If the requester submits a request for information in accordance with this subdivision without an existing agreement to receive the information, the request shall be in a manner prescribed by the Department, and such request shall contain the legal authority that authorizes the performance of the requester's official functions and a description of how such information will be used to carry out such official functions.
