

**DEPARTMENT OF TAXATION
2024 Fiscal Impact Statement**

1. Patron Nadarius E. Clark

3. Committee Senate Courts of Justice

4. Title Individual Income Tax Credit: Firearm
Safety Device

2. Bill Number HB 35

House of Origin:

☐ Introduced

☐ Substitute

☐ Engrossed

Second House:

☒ In Committee

☐ Substitute

☐ Enrolled

5. Summary/Purpose:

This bill would expand the definition of “firearm safety device” for the purposes of the Firearm Safety Device Tax Credit to include any device that, when installed on a firearm, is designed to prevent the firearm from being operated without first deactivating the device. Under current law, “firearm safety device” is defined to include only firearm storage devices, such as gun safes, gun cases, and lock boxes.

This bill would be effective for taxable years beginning on and after January 1, 2024.

6. Budget amendment necessary: No.

7. Fiscal Impact Estimates are: Preliminary. (See Line 8.)

8. Fiscal implications:

Administrative Costs

The Department of Taxation (“the Department”) considers implementation of this bill as routine and does not require additional funding.

Revenue Impact

This bill would have no impact on General Fund revenues. Although expanding the definition of “firearm safety device” could increase the amount of credits claimed against tax liability, the credit is subject to an annual credit cap of \$5 million under current law. Because the Official General Fund revenue forecast currently assumes a \$5 million annual revenue loss attributable to this credit, no budget amendment is needed.

9. Specific agency or political subdivisions affected:

Department of Taxation

10. Technical amendment necessary: No.

11. Other comments:

Current Law

Firearm Safety Device Tax Credit

During its 2023 Regular Session, the General Assembly enacted the Firearm Safety Device Tax Credit. Virginia allows a nonrefundable individual income tax credit of up to \$300 for the cost incurred in the purchase of one or more firearm safety devices in an eligible transaction. The total amount of credits that may be claimed in aggregate is capped at \$5 million per taxable year.

A “firearm safety device” is defined as a safe, gun safe, gun case, lock box, or other device that is designed to be or can be used to store a firearm and that is designed to be unlocked only by means of a key, a combination, or other similar means.

An “eligible transaction” is defined as a transaction in which a taxpayer purchases one or more firearm safety devices from a dealer that is federally licensed.

Firearm Safety Device Tax Credits are issued on a first-come, first-served basis, and the amount of the credit claimed in any single taxable year cannot exceed the individual’s income tax liability for that taxable year. Taxpayers may carry forward any unused credit for up to five years.

Proposed Legislation

This bill would amend the definition of “firearm safety device” for the purposes of the Firearm Safety Device Tax Credit to include any device that, when installed on a firearm, is designed to prevent the firearm from being operated without first deactivating the device. Under current law, “firearm safety device” is defined to include only firearm storage devices, such as gun safes, gun cases, and lock boxes.

This bill would be effective for taxable years beginning on and after January 1, 2024.
